(several references to **power-hungry** types throughout **U-14**). |

A copy of a 1967 *Esquire Magazine* article, “The Human Race Has, Maybe, Thirty-Five Years Left,” by David Lyle, was found among other documents in Ted’s trunk at Wanda Kaczynski’s house.

A comparison of the last three (3) paragraphs of six-page article is as follows:

“Esquire Magazine”

“The **control of human behavior** by artificial means will have become by the year 2000 a frightening possibility. Government—’big brother’ —might use **tranquilizers, or hallucinogens like L.S.D.**, to keep the population from becoming unruly or overindependent.”

“More and more **subtle forms of conditioning** will lead people to react in predictable ways desired by government or by commercial interests **without people quite knowing how they are hoodwinked.**”

“Which sounds like **Buck Rogers stuff**, until you remember that **the gravity belt is here,...**”

“U” Documents

U-14. Paragraph 157 “Assuming that industrial society survives, it is likely that technology will eventually acquire something approaching complete control over human behavior...Hallucinations can be induced or moods changed by drugs.”

U-14. Paragraph 159 “Will public resistance prevent the introduction of technological control of human behavior? It certainly would if an attempt were made to introduce such control all at once. But since technological control will be **introduced through a long sequence of small advances, there will be no rational and effective public resistance.**”

U-14. Paragraph 160 “To those who think that all this **sounds like science fiction**, we point out that **yesterday’s science fiction is today’s fact.**”
