On Organizing Urban Guerrilla Units  
By  
Field Marshall D.C.

## Dedication

I dedicate these notes to the memory of Brother Jonathan Jackson and Comrade Carlos Harighella. I also named my son, who was born by Barbara on August 18, 1978, Jonathan Carlos Cox.

Brother Jonathan was the 17 years old Afro-American Revolutionary who went off into the fascist courtroom in Maria County, California and executed the first contemporary political kidnapping Babylon. He was cut down in his finest hour during his escape by those fascist pigs who have no regard for humanity. Taking the example of Brother Jonathan to an even higher level we will truly free all political prisoners!

Comrade Carlos Marighella was a Brazilian Revolutionairy who participated in the first kidnapping of an American Ambassador in Brazil in exchange for political prisoners. He was ambushed by the fascist pigs in Brazil on November 4, 1969. He was 58 when he died.

...

... they moved ahead and struck a blow against this system of world slavery knowing full well the consequence for revolutionary activity is victory or death.....

Field Marshall D.C.

October 8 1970

# Self-Defense

I will begin by pointing out that we must not allow the racist power structure to define our struggle. What I mean is the language that we use like everything else in this society is in the service of the racist, capitalist bandits. They control the educational institutions, the news media and the means of production that turn out all the educational material. Sometimes we are trapped by the rhetoric (words) of the slavemaster. In our 400-year struggle for survival it has been the guns and force manifested in the racist military that occupy our communities that directly oppress, repress, brutalize, and murder us. So for us to talk about survival we must talk about self-defense against this brutality and murder that is defined by the racist power structure as "Justifiable Homicide". So when a guerilla unit moves against this oppressive system by executing a pig or attacking its institutions, by any means, sniping, stabbing, bombing, etc., in defense against the 400 years of racist brutality, murder and exploitation, this can only be defined correctly as self-defence. The slavemaster however, through his lackeys, puppets and apologists, calls it "terrorism", the work of crazed men, criminals insane killers etc. We must define our struggle, not the pigs.

Carlos Marighella, an urban guerilla in brazil, who was assassinated November 4, 1969, just one month before Fred Hampton and Mark Clark, said, "The accusation of assault or terrorism no longer has the pejorative (negative) meaning it used to have. It has acquired new clothing, it does not discredit, on the contrary it represents a focal point of attraction.

"Today, to be an assailant or terrorist is a quality that ennobles any honorable man because it is an act worthy of a revolutionary engaged in armed struggle against the shameful military dictatorship and its monstrosities'".

So with that I say this: guerilla units (self-defense groups} must be formed and blows must be struck against the slavemaster until we have secured our survival as a people.

# Personnel

In organizing self-defense groups (urban guerilla units} at this stage of the struggle, the most important consideration is whether or not the person to be incorporated into the group understands fully that what he or she is doing is the right thing to do. At this stage of the struggle if any members of a guerilla unit are weakminded or do not understand that the only way to put an end to brutality, murder. And exploitation by this racist power structure, is to organize guerilla units and counter attacks; practice has shown that if this weakminded person is ever captured he or she will certainly not be able to withstand the methods of persuasion used by the fascist pigs amo they will talk, give up information. So the first priority for any guerilla unit is xj bfc a.Tc itd az£t/.

Because of the consequences if anything goes wrong during ah operation, members within the group must maintain a face to face relationship and get to know each other's strengths and weaknesses thoroughly amd participate fully ln the planning of operations. Liberalism ai this level can cost the lives of comrades and/or jeopardize the success of ah operation\*

At this time guerilla units should have no more than four to six members\* the struggle at this stage requires no operation that can't be handled by four to six people, also security is sacrificed the larger tug group, at this time guerilla units should be formed all across babylon, the north, the south, the east and the west, however, units must work autonomously, under no circumstances should one uh it seek out amd try to make contact with another unit. Due to the fact that this level of struggle in babylon is in its embryonic stages, there are many agents, fools amd provocateurs running around all across the country. When a member of one unit is captured, he op she will only be able to give up information on one group. Their own!!!

# Know the Enemy

At this stage the pigs have three things going for themselves:

Communication ——— C.

Mobility ————— M.

Information ——— I.

C. M. I.

(C) With the technological advances of. Today in Babylon, the pig forces have been able to really uptight their communication. They have radios, telephones, radio-telephones and they even have computers in their patrol care and video cameras thai see in the dark. Foot patrolmen also carry small compact 2-way radios. The occupying forces tn our communities have more or less instant communication. Therefore it is possible to aleut the total pig force in any major city in a matter of seconds.

(M) Since the major rebellions began in 1965 with wii-t-ti, pig forces have adopted the technique of saturating "High crime areas1' (black communities) with many patrol cars personnel carriers. Most major cities now employ helicopters, with the develop-ment of the campus struggles they have also increased thetr patrols of campus com-munities such as ih the berkeley, california area around the uhl- vercity of california. Their technical ability to communicate and their technique of having patrol care only a few blocks apart provide them with good mobility, when an alert or distress signal is received the pigs are ablf to saturate the "trouble area" within 30 seconds to 1 minute in every major city in babylon.

(I) The pigs use hany methods for gathering information such as the method of ihfiltratioh using undercover agents. We must also be vigilant of the community in-formants, many merchants who operate im our communities act as informants. Also taxi cab drivers must be watched carefully. Hany cities how wave policemen rosing as gab drivers. In cities like new york, they even have policemen posing as garbage-mn, telephone repairmen, gas and lightmen, etc, one method the pigs have used successfully is to marrass known prostitutes, dope addicts, etc., and threaten to lock these people up if they dont give them the information they want. Too many times they have been succf5sful using this method. The pigs have also perfected some techniques for asking questions\* hany people who don't relate to pigs, when questioned by them, try to be smart and witty ano unknowingly give the pigs precisely the information they are looking for. So the rule to follow when arrested or questioned by pigs 15 jjzvg 4 bant and adrift u4 , , , \* . . *Ptjuocf this is all that you have to do. Don\*7 say anything else and don't ££fn anything. Np nrihltmeio.. When 4 guerilla unit has successfully carried out ah operation and the pigs have no clues, their method of investigation is*

## Fast Data

# A Computer for S.F. Patrolmen

By Jim Brewer

A computer system to supply vital information to the policeman on the street is being developed at the Hall of Justice in cooperation with a Maryland firm specializing in police information systems.

The project is part of the

system will enable patrolmen on the street to obtain information on possible suspects, warrants for arrest, and other data within seconds, according to C. J. ...  
Foster, the

**Introducing a crimestopper so advanced Dick Tracy doesn't have it yet.**

It should come as no news flash to you that there's no one easy way to stop crime. But it may surprise you to know that a lot of the job is wrapped up in one man. The guy whose job it is to get the police to the scene fast. The police dispatcher. As the calls come in, he has to track down the radio car closest to the scene. And that's just for openness. Because next he has to find out if it's available. And then get in touch with it by radio. Which is exactly where our new crimestopper comes in. The digicom system from GTE Sylvania. Digicom records the availability of all radio cars on a TV screen down at headquarters. It even records their exact location. (When the radio patrolman touches a spot on his dialmap, the same spot lights up on the dispatcher's duplicate map.) As for the cop on patrol, with digicom in his car, he can actually run five license plate checks a minute directly through the state computer file. And check up on suspicious characters. Unlike conventional radio, nobody can listen in, and the channels are never congested. Because digicom doesn't transmit voices. It transmits data. Electronically. Naturally, all of this means a lot to the police, who need all the help they can get nowadays. The cop on the spot can make faster decisions, because he's better informed. That goes for the dispatcher, too. But it also means something to the average citizen. Knowing which car to send where can not only save time, but lives. And at the very least, can just plain get help to a lot of people fast. Of course, the police can't carry digicom around with them like Dick Tracy's waist-radio. Yet.

*jacking up the community and asking questions, they seek information they get bits and pieces here and there and sometimes they are able to piece enough information together to make a bust. So.....keep your mouth shut.*

\*\*\* Combatting C.M.I.

To answer the question of how do we combat the pigs1 c.Mj we must first see what we have going for ourselves. We should relate to the principle of self reliance, in other words u-4 t tdtix jltfu. Gat io tiraax you. Ntei. In checking out the practice of guerilla units we see that we have the power to determine what is to happen, when it is to happen,. Ano how it is supposed to go down. What-ilh.E.Ft-hew4 the element of surprise. The pigs have c.M.L, and guerilla units have w.W.H.

To consider a guerilla operation successful is not to just plan and execute, but to plan, execute amd escape. There have been too many instances of members of guerilla units who have planned and executed ri&hteous blows against the system, only to be captured, wounded, or killed. Th£se are the consequences for revolutionary activity. However, we must keep casualtle? Within an acceptable minimum. The slogan must be *Maximum damage to the enemy—-minimum damage to us.* Practice has shown that when planning w.W.H. If it is done with a knowledge and an understanding of c.M.I., ca\$ual- lties will be kept within an acceptable minimum, too often much attention is given to a plan up to the point of execution without giving the same attention to evasion amd escape.

**PIGS DISGUISED AS PEOPLE**

*A cop as "rabbi" works Brooklyn.*

*This "lady" uses socks for her bosom.*

*"Old blind black" waits for muggers.*

*The "hippie" traps drug sellers.*

This is a cue sided approach, a subjective approach. W.W.H. Is only cne side of tmf coin, c.M.I. Is the other side. Evasion and escape is the phase of ah operation that determines success. Because guerilla units use w.W.H., the pigs1 c.M.I, does not go I hlte operation until a guerilla ln it actually commits 'tself by actually executing some type of guerilla activity, as I hent ioned earlier, once c.M.I. Is activated, pigs start arriving on the set 30 seconds to

1 minute in every major city in babylon. Therefore the success or failure of a guerilla operation is dependent upon thf attention given, to and the planning of evasion and escape. As I see it learning to deal 4ith c.M.E. Is the number one military problem facing revolutionary forces in babylon today.

[Picture of dead cop omitted.]

# Example

I will recall here an operation I had the honor of participating in, I will show how the members- of our unit dealt with w.W.H. And c.Hu\* for security reasons it is necessary that no names are mentioned. However, since I ho\* operate outside established the boot of the text I will keep as close to the incident as possible it is unfortunate that some of the lessons learned these past few years have not been passed on for security reasons. This is a feeble attempt on my part to rectify that shortcoming.

I was a member of a unit that had three members. We had just added three new members who were dealing with the question of checking out the new people when those stupid oakland pigs tried to kill Huey. We were aware that the political consciousness of the people was low and if we made a move they might not see any relationship. But we knew the pigs would know and we wanted them to know that we would no longer see the likes of Malcolm and Huey moved on without them having to pay their dues. We decided to do a sniping job. We felt that with the new members we had best do something light the first time working together. We knew it didn't take six people to do one sniping job\* however, we felt this would give us an opportunity to observe the new members under actual combat conditions that weren't too strenuous-

After deciding what to do the next step was to pick the target. The method we used was to assign each member of the unit the task of submitting a target within a week. At the end of the week we got together and went over the choices and picked what we thought was the best one submitted. The police substation in the Hunters Point projects in San Francisco, the reasons we selected this particular target were that the pigs perpetrated a lot of brutality and murder on the people in the area and we related very heavily to the statement, *"The racist dog policemen must withdraw immediately from our communities, cease their wanton murder and brutality and torture of Black people, or face the wrath of the armed people"*. A tactical reason was the location of the sub-station itself, it sat at the furthest end of the projects away from the entrance and the main streets. Across the street was the Hunters Point Naval Shipyard, there was a huge cyclone fence separating the shipyard, from the projects to keep people from trespassing on government property\* also there were no entrance roads from the side of the ship-yards. So in addition the station was at the end of all the roads deep off in the projects and it could only be approached from one direction\*

The next step was reconnaissance\* the dictionary defines reconnaissance as the process of obtaining information about an enemy area, the troops in it, etc., by examination or survey, for the next week it was the responsibility of each member of our unit to go over the entire area around the target daily, also at night. At the end of

the week of reconnaissance we got together to haph out our strategy and tactics. Immediately after getting our heads together and discussing our observations we all agreed that although we had originally planned for this to be a sniping job, the conditions were such that we could assault the target and deal with every one there. After a week of practically constant surveillance, no more than six pigs were ever seen inside at any one time, this took care of what the next thing was to decide *when*.

We decided on Monday night, we felt this would be the best night because the week-ends, especially Saturday night, had heavy patrols because of the tendency for the people to exert their misplaced aggressions on the weekends\* also being the first work night of the week we felt not too many people would be on the street, this turned out to be the case. So the decision was to move the first Monday night after we had completed all of our preparations, we decided 11:00 p.m. would be the best time\* we discovered- during our surveillance that the shifts were changed at 1:00 a.m., but he felt that was too late because at that time there is not much traffic and our movements would be more conspicuous. 11:00 was late enough so that not very many people would be just hanging out on the streets. The next thing to deal with was how.

Because there were six of us we decided to use a small delivery van or pickup with a camper\* the reason for that was we knew that once the job was done six niggers in a car riding away from the area would look very suspect.

Next we decided one man would be left with the vehicle to keep it running, one man would be placed on the rear door of the station with a .12 gauge pump in case one of the cowardly pigs tried to run away and the remaining four of us would actually carry out the assault, we went through several rehearsals we called them dry runs so when the time came everyone would know exactly what to do and this would eliminate confusion at the decisive moment. Also if a patrol car came on the scene unexpectedly two of us were assigned to deal with that.

During this period the S.F.P.O. was bragging about how they could respond to an alert anywhere in the city within 1 and 1/2 minutes. So we gave ourselves 30 seconds to clear the area after the first shot was fired\* we found a good location approximately 1 minute away to stash our cars.

The next thing was armament. The man with the vehicle would have a 9mm pistol. The man on the backdoor would have a *12 gauge shotgun* *and the four of us who were to assault the station would use 30 caliber hi carbines with 30 shot magazines* *me also carried 2 extra magazines in case a patrol car caught on the scene unexpectedly- while we were getting down. In case we were stopped while we were getting away we carried 500 rounds of ammo [in the truck it might sound like we were loaded for bear but we wanted to be prepared for any eventuality\* each of us also carried a .44mm pistol.*

It was finally time for us to move. Early in the evening we met and went over our plans. Everything was okay\* the next thing we did was to put on cotton gloves, breakdown our weapons and wipe each part down to completely eliminate any fingerprints\* this was done in case someone dropped one. We didn't want to give those pigs anything to go on\* we then sent out a man to find us some transportation\* we would

always wait until the last minute to rip off our transportation because with the pigs communication it is possible for a stolen vehicle to be on the hot sheet in less than an hour. We always wanted our ride to be as cool as possible. He returned with a pickup with a camper (4 the back\* I drove with one man riding shotgun, and the other comrades rode in the camper. I wore a black trench coat buttoned all the way up. Underneath I wore a suit and tie with a white shirt. After the attack I took off the trench coat and tried to look square. We arrived at the target and as an additional bonus there was a wet, heavy fog, typical of San Francisco. We parked and made a last minute check of the area, at that time a patrol car drove up, with two nigger pigs, this was good because there only appeared to be one pig inside at the time. One of the pigs was wfl-ca\*frittd, whom we knew had a reputation for helping brothers out when they were being harassed by white racist rigs. The other pig was a big burly bootlicking pig named tfeoe, the year before he had shot a brother in the fill-more district and the people moved on him\* to quote him, "He was accused of mfcx-te. Po-tice bjturcfl.A". He had to go, but we decided to give a pass which turned out to be a mistake, in January of 1966 the s,f,p,d, created a truly gestapo pivjiiw of the s.F.P.D, called the san fernando tac-t-cat squad and was one of the first niggers to sign up.

We waited for them to get inside the station- we got our stuff and moved out. The man was placed on the back door and the four of us were at the corner of the building. At this point there wasn't anything to do but to do it. We paused without anyone saying a word. We all looked at each other (swallowed, then stepped on around the corner single file, the windows we were to fire through were very low, about waist high, the windows ran the whole length of the station, if you stood outside you could see through every room, but inside you couldn't see what was happening in any room but the one you were in. I was in. Front and how we were supposed to fire until I reached the windows covering the last room. I passed one room and there was a pig looking out at me. He was cqd, 50 I was cqd + however, when the mm hen in ml said the pig assumed the pig knew what was happening,. He called the pig a dirty motherfucker and opened up fire. I ran to the last window and *Waterfield and George* were already on the floor. It appeared they were trying to find something to hide under. I opened fire and the rest of the comrades opened fire and for a minute it sounded like the fourth of July. I fired and hit *George* about six or seven times, turned to the other brothers., signalled and we got in the wind\* we picked up the man on the back door, jumped in. The truck and split. As we were on our way out of the area, it was approximately one minute before the first pig car passed us on the way to the station with its red light flashing and its siren wailing. It took us two minutes to leave the area, reach the place where we had stashed our cars, transfer the weapons to the car I was driving and go our separate ways. I stashed the weapons at our stash pad, then drove to a pad.

Just a little review here. We used .30 caliber carbines with military ball ammunition- if I remember correctly he was hit six or seven times. He had emergency surgery, was in intensive care and lived for one month before he died. True enough, he was a

big surly pig &ut we were firing from no more than ten feet\* based on this experience I recommend the ,30 caliber carbine be used for target practice. It just does not have the knock down power we need. Prior to this operation we had trained extensively with our weapons and we didn't have to worry about them. This was very key to our success\* not having to think about our weapons, we were able to concentrate on the job itself, for this operation it took the pigs ten minutes to seal off the area and set up road blocks, but because of our planning around the pigs' c\*m.I\* we were all well away and safe in those ten minutes.

# Explosion Fells 2 Officers

# Berkeley Police Bombed

## 2 Blasts As Shifts Changing

### Three Cars Are Destroyed

Three cars were blown up in a parking lot adjacent to the Berkeley police station precisely at the midnight shift change today. Two reserve officers who were in the parking lot were injured by the two blasts.

Police cleared the street and people spent several hours sorting out the debris. Police officers were still in the lot when the second blast occurred.

Tremendous force of blast utterly shattered these two police cars, wrought serious damage to others

# More on Dealing with C.M.I.

We must begin to make direct attacks against the pigs' c.M.L au-rilla units must seek out and destroy vital links in the pigs\* communication and transportation system. So make them spend millions, billions of dollars oh erecting cyclone fences, installing flood lights, erecting guard huts aho establishing foot patrols around every one of their communications' installations and every one of their vehicle parking lots in babylon.

*Attack them at will.* Retaliate and avenge every revolutionary death in the world that is done in the name of freedom and liberation from the pegs of the united states, and their lackeys, and their evil system of world slavery.

When we examine our history and study past slave revolts we see that almost without exception they were crushed because of agents and informers of the slavemaster. So when after an investigation we discover ahl agent in our midst they must be eliminated swiftly, the slogan must be, "Death to all informers".

If we begin to intensify our efforts in these directions this will definitely deal blows and take away the pigs' advantage of C.M.I.

The use of incendiarys ano explosives are very important elements in the arsenal of guerilla units. Will play a very Important role in helping us deal with the pigs' c\*m+I. Also sabotage in general will play a very important role in our struggle, simply because sabotage gives us more time in which to deal with C.M.I.

# Correcting Mistaken Ideas

I have, seen many articles in underground papers about weapons and many of them have put forth some erroneous ideas. The thing we must keep foremost in our minds is we are in Babylon and we must deal with our situation with the resources available in Babylon, there is nothing more I would like to do than write and talk about the AK 47. This is one of the finest assault weapons in the world. However, they are not available in Babylon, neither is the ammunition. So it would only be an exercise in futility and a total waste of time, I have also seen long dissertations on the merits of the likes of the .303 Enfield, the VMM Mauser etc., all kinds of bastard weapons and calibers, not that these weapons are not good weapons, but our stash is the enemy's stash, believe me they don't have any of those oddball weapons or calibers in their arsenal. As a rule weapons must be the same caliber. The time is fast approaching, it might be here, when we will no longer be able to buy ammunition, when this day comes the source of ammunition is the pigs' arsenal. So if you get caught in this situation with the likes of a .303 or a 4.7mm or some other foreign caliber weapon, at that point it is no better than a club.

By the same token if you have the finest weapons and don't know how to use them they are no better than clubs. However with enough of the correct practice and knowing where to place the bullet it is possible to kill an elephant with a .22.

However with enough practice with the following pieces and arming yourself ideologically, it is possible for you too to become a match for one hundred, the same as those 11 panthers who were attacked by 500 pigs, had a 5 hour battle and survived, in December of 1969 in Los Angeles.

# Self-Defence Weapons

Due to the brainwashing done by T.V., movies, comics, etc., there are a lot of incorrect ideas about firearms that must be cleared up, the first thing to understand is there is no one piece gun) that covers any and all situations. Although they show pigs on t.V. And in the movies killing people a block away with a snubnosed- .30 revolver, in reality this is not very practical and shouldn't even be attempted. From seeing too much Wyatt Earp and Matt Dillon, too many people think that if they have a hand gun, either a pistol or revolver, that they are ready for anything. All that is necessary to give you a different perspective is to examine the armament of the pigs that occupy our communities anywhere in Babylon. When you do that you will discover that most pig cars have at least one .12 gauge pump or automatic shotgun, one or two bolt action rifles with a scope mounted for sniping purposes and, of course, the pigs have strapped on at least one hand gun, either automatic pistol or a revolver. In San Francisco, the S.F. Tactical Squad members carry two hand guns, their standard service revolver plus a second hand gun which is their personal preference, in many cases an automatic pistol, so, at this time let's examine these three. Types of weapons the shotgun, the rifle and the hand gun,

**The Shotguns;** the pigs use the .12 gauge shotgun, either pump or automatic, loaded with 00 buckshot generally in crowd situations such as rebellions, the standard load is nine pellets per shell. However, there is the magnum load of twelve pellets per shell. These magnum loads are to be used only in magnum shotguns. If you use magnum loads in a regular shotgun, you might not live to tell it.

The pigs also use slugs, one giant lead ball. They use slugs to knock armor plate off of doors and windows. There is also a tear gas shell now designed to be fired from a .12 gauge shotgun.

*Every black home should have at least one .12 gauge Shotgun to be used to protect the door. Use 00 buckshot and it will deal with any criminals trying to enter uninvited.*

Cuban guerillas used shotguns very successfully in the revolutionary war led by Che and Fidel, they would set up ambushes close to roads usually only a few feet away and shotguns loaded with 00 buckshot would have a devastating effect upon the occupant of cars and/or trucks. We can do the same.

There is another use of the shotgun at this point of our struggle, that is: the barrel of the shotgun is smooth bore (there are no grooves inside the barrel) therefore no groove marks appear on the pellets. Therefore the shotgun is ideal for executions because one of the methods of investigation used by the pigs is checking groove marks. This process of investigation used by the pigs is part of what is known as a ballistic check.

They can't make an investigation based on ballistic marks when you use a shotgun. Therefore, this is an ideal weapon for executions at this time-

**The rifle:** can be in caliber .30-06 or .308 or 7.62 mm

Nato1 with a four power (4)0 scope, or stronger, mounted is a sniping weapon. A specialist piece. This virulent (deadly) combination is for one purpose and due purpose only - yet or\* seized piece-d at a\$. ...So each self-defensive unit needs only one such weapon at this time, there is nothing more to be said about that, though. It is either semi-automatic or fully automatic. Ideally it will have a mechanism that allows you to adjust the fire to either semi-auto or full auto. The limit available is that posed by the limit of the enemy's arsenal. Here we will discuss the most common seen in our communities carried by the occupying Gestapo pig forces,

The ar-15 caliber .223 is the semi-automatic civilian model called "M16" model of the m-16 used in Vietnam. The m-16 fires either semi-auto or fully auto. After the lives of many brothers were lost in Vietnam because the weapon was new and untested, it has now been debugged and is fairly reliable, it can be found on all military bases and some Gestapo pig arsenals, the ar-15 was taken off the public market and has been replaced by the ar-160 caliber .223 the same as the ar-15 and m-16 the ar-15 does not appear to be as good as the ar-16, however many pig departments are stocking up on them.

Another good assault rifle is the M16, caliber .30\*3 7,62 mm NATO. This is a very good weapon although it has been replaced by the lighter m-16 in the fascist military,

most national guard units, at least in california, are equipped with the mt14. Check your local national guard availability.

The M16 is in good working order is very reliable the .45 acp caliber. It fires either semi or fully auto, one rewarding feature is it uses the same ammunition as the .45 auto pistol. Therefore with one type of ammunition is necessary. Buy for your stash. Check your local police/mafia arsenal for availability.

Finally the good old M14 caliber 30-06. Very good, plenty of them around heavy and accurate way out, easy to set and plenty of ammo around, check your pawn shops and gun shops also some national guard units and college ROTC units have them readily available.

The M7-30 can be used for target practice and training. Assault rifles are to be used in fire fights, more commonly known as shoot-outs. People waging wars of liberation around the world also use assault rifles to annihilate (wipe out) their enemies in ambushes and in counter attacks against fascist military outposts as we have also done.

**Handguns:** There are two types, semi-automatic and revolvers. There are 50 many different brands and calibers, I will only deal with what I consider to be the best choices.

.357 magnum made by either colt or smith & wesson. It holds six shots and with armor piercing ammo is supposed to crack an engine block. Many pig departments have switched or are switching from .38 special to .357, there was an incident where a brother was defending himself against a pig and fired at the pig with a special, the

**Caliber .45 Model 1911A1 Automatic Pistol.**

**Colt Trooper Mark III revolver.**

bullet hit the pig's badge and has deflected. Has the brother been using a .357 magnum that would have been one bar-b-cued pig.

9 mm automatic. Pzazozj although pistols are called "Aii\* iivltzfi", they are really semi-automatic, the trigger has to be reset for every shot. I recommend the Browning 9mm automatic- it costs £3 with a 13 shot magazine. With a round in the chamber that makes 14 shots available. If you're up against someone with a six shot revolver they will have to reload two times and you've still got two shots left. You can also purchase a 21 shot magazine. That's a lot of firepower for a hand gun.

.45 alltoluzc fzizozr this is still the side-arm issued to the U.S\* fascist military troops. It uses the same ammo as the Thompson sub. They also can be purchased in stores. There also seems to be a lot of these available in the streets. Check with your local street merchants.

# Weapons Training

*Practice-Practice-Practice-Practice-Practice-Practice-Practice-Practice-*. In order to perform well in your work on all levels it is necessary to practice. The more you practice the better you perform. Don't think just because you have read something you can do it. You can. Memorize a book on how to drive a car but until you get behind a wheel and practice you still can't drive.

The first things to understand before you ever put a round of ammo in a chamber are basic safety rules. 99% of all accidental shootings happen with guns that aren't supposed to be loaded and/or by people that say "I'm sorry, I didn't know it was loaded". Therefore, rule is: *Always*. *Always* change the magazine. Always point the gun up and away from people. Keep your finger off the trigger and follow the following procedure, point gun away from area where someone could possibly be shot. If it is a revolver swing out the cylinder, if it is a pistol, remove the magazine and pull back the slide\* even after you have unloaded the gun and see that it is unloaded, treat the gun in the manner as if it were still loaded, never touch the trigger unless you are practicing trigger squeeze (explanation later?), firing on training ground or dealing with the enemy never point a gun at anyone you don't intend to shoot. I can't stress these points enough\* they seem simple enough, however, people generally who haven't had any experience with pieces violate these rules constantly- if I have ever shot accidentally by some idiot it will be very difficult to suppress the desire to blow his or her head off, providing I'm only wounded\*

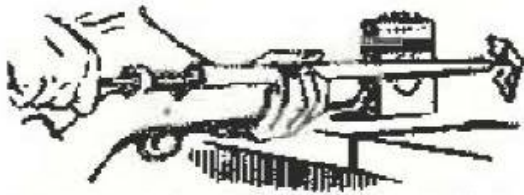

*"In Guerilla terminology, strategy is understood as the analysis of the objectives to be achieved in the light of the total military situation and the overall ways of achieving these objectives."*

*Ernesto "Che" Guevara*

Due to the fact that self-defense actively will not see you united to daylight hours you should learn to break your piece down and assemble it even in the dark\* visually through the night.

After you've gotten this down, the next step is to learn how to aim and fire your weapons properly. All of this is to be done before you ever put your first round of ammo in the chamber, the first thing to deal with is proper sight alignment. Sight alignment is lining up your front sight with your rear sight correctly. Your front sight lined up with your rear sight and both lined up on the target is called the "point of aim", the correct sight picture basically is having the front not too high or too low, not to the right or to the left, but having the target resting on top of the front sight, the sight picture

THE NEXT STEP IS: *Learn to disassemble and assemble your pieces. Also care and maintenance.*

**CLEAN BARREL AND METAL PARTS WITH GOOD COMMERCIAL SOLVENT**

**CLEAN BORE UNTIL DRY PATCH COME THROUGH AS CLEAN AS POSSIBLE**

**RUN OILY PATCH THROUGH BARREL**

**BORE SHOULD BE CLEANED THROUGH BREECH END WHERE POSSIBLE**

**ALL METAL PARTS SHOULD GET LIGHT COAT OF OIL**

**STORE IN HORIZONTAL POSITION**

**AFTER STORAGE RUN CLEAN PATCH THROUGH BORE BEFORE FIRING**

**REMOVE ALL EXCESS GREASE AND OIL**

will not always appear perfect, but if the correct sight picture is understood practice will bring improvement.

The next thing to get down with is; trigger. "that's right, you squeeze the trigger. You don't pull it or jerk it, contrary to whatever you saw on t.v. Trigger squeeze is the process of putting slow steady pressure on the trigger until a shot goes off. If you try to anticipate the shot, you will jerk. And mess up your aim.

One other thing to watch for is; breath control (which also messes up your aim, one method of breath control is: take a deep breath, let out half of it, hold the rest of it, then begin your trigger squeeze,

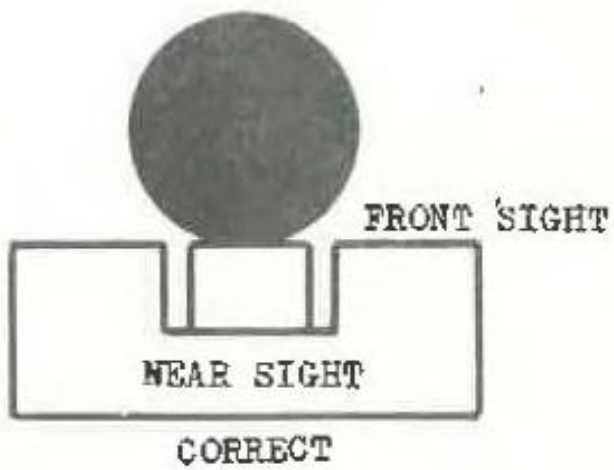

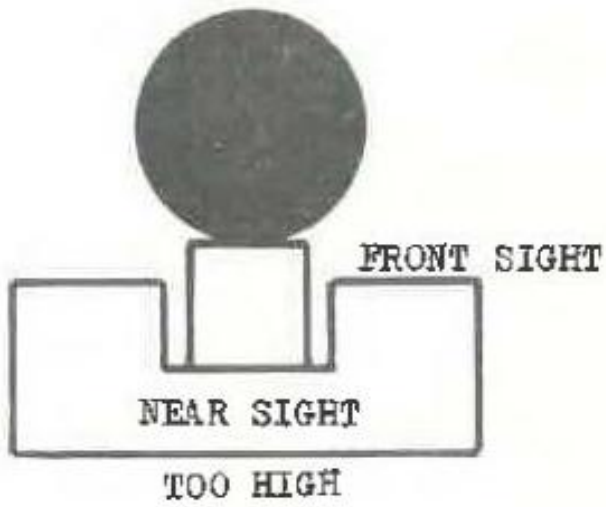

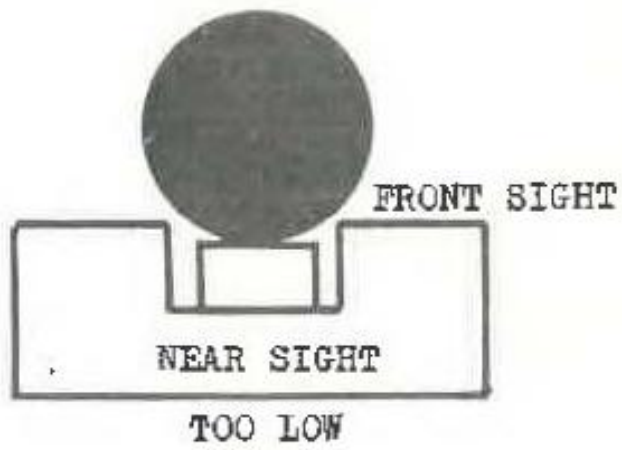

One thing to guard against is {flinching, flinching is caused by being intimidated by the sound and kick of your weapon. With

Proper trigger squeeze and breath control, you won't have any problems with flinching. If you have problems keeping all your shots in a fairly small group or. If you have a problem just getting your shots on the target anywhere you are probably flinching, have someone watch you as you fire. And they will be able to tell you whether or not you are flinching.

It would be ideal if you could incorporate into your group a veteran of the military service. Veterans are of great value and assistance in helping with the above training,. Also when you are ready to begin practice with live ammunition. When practicing with live ammo make sure your location is where you won't be harassed by pigs. Actual combat conditions can be deadly as a training ground. When practicing with live ammo remember: it's not just about popping caps for the hell of it\* the whole purpose is to prepare yourself to be a "soldier" which will only come as a result of correct practice\*

*"In military language, tactics are the practical methods of achieving the grand strategic objectives. In one sense they complement strategy and in another they are more specific rules within it."*

*Ernesto "Che" Guevara*

# A Word to the Brothers in the Military

If you check the history of the united states since the pilgrims landed at plymouth rock you will see that black people have played a part in every war that the united states has engaged in. In every instance, when blacks were armed and sent into battle, it was in the interest of those in power, whose interest it was to keep niggers in their place. After each time that blacks were used as cannon fodder and the particular dispute was over, the blacks were disarmed and sent back to a life of suffering and deprivation, the very things that blacks were told they were sent into battle to safeguard, such as freedom and democracy, have been historically denied black people. This includes the present war of genocide that is being waged against the indo-chinese people. It is also interesting to note that in more than one instance, when the bodies of black brothers that have been killed in vietnam have arrived in their home towns the racist dogs would not allow them to be buried in the local cemetery, a whole book can be written on how white and the vietnamese people have been victimized by this cruel and barbarous war, that is perpetrated in the interest of the ruling clique of swine in babylon.

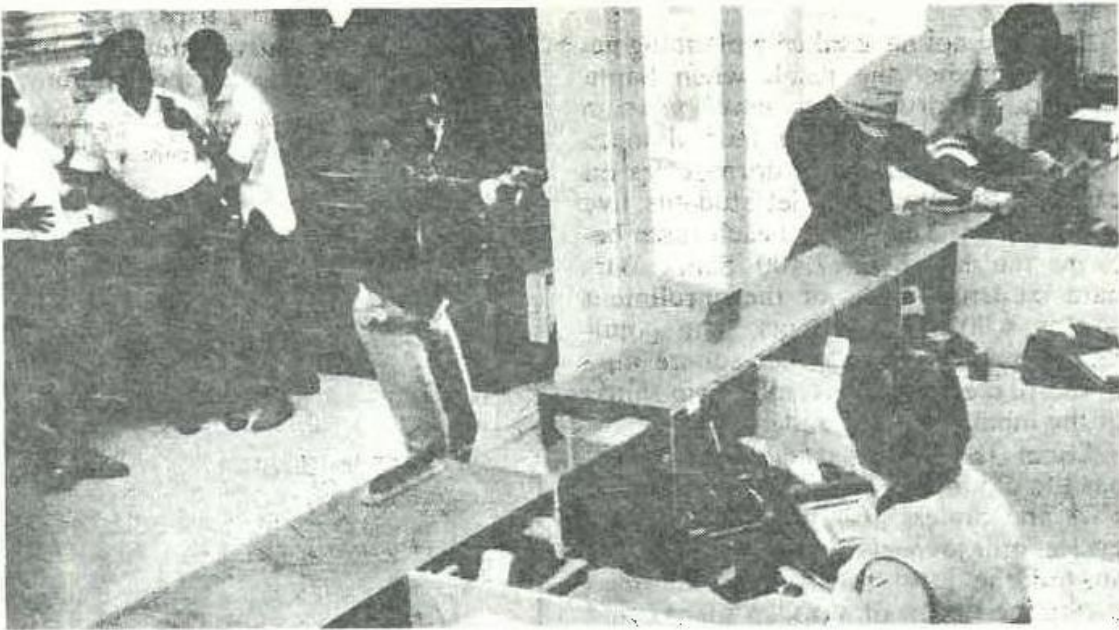

I appeal to all of you brothers in the flos\* military, and I appeal to all of you that have fathers, brothers, uncles, cousins and any other type of relative or friend in the pig's military to encourage them to do the same. Say hello to come on home. You are needed at home to wage war against these lying pigs in the name of freedom and liberation for yourselves and all oppressed people\* do not let the pigs disarm you until time. I'm bringing them home. If you check and see what the pigs are doing to black people right at home, you can see that you need everything that you can get\* we need everything that you can get. If you can get a tank, get it\* in the meantime, while you are still in the service there is plenty you can do. You don't have to wait until you get out. Turn your weapons against your racist officers. Destroy as much of the war machinery you can get your hands on. Blow up trucks, airplanes, especially helicopters that they have begun to use when they attack us right here in babylon. Blow up communication machinery, blow up fuel dumps, ammunition dumps, blow up everything that can be used against any people anywhere. One of the most important things you can do is supply freedom fighters from among the people with weapons, we need sub-machine guns, hand grenades, plastic explosives, some of those nice compact rocket launchers and bazookas, also we need all the ammunition you can get. We need any type of weapons that we can use in our war of true liberation, that has already begun. As

we have seen in the past, you brothers in the pigs' military are in a very strategic position, don't let them disarm you and send you home empty handed this time. You have picked up thf gun, willingly or mot, for the same racists that send you to jail aud won1! Give you a jo&. So keep the guns and use them for your and your people's benefit.

Also when your unit is sent into some community to put down the people, turn your weapons over to the people. It would fie even better if you helped them fight. Here I will quote eldridge cleaver, the minister of information of the Black Panther Party: *"You are either with your people or against them, you are either part of the solution or part of the problem, weither help our people, by refusting to help them make it easier for the enemy to destroy us, there are no two ways about it, either quit the army now or start destroying it from the inside".*

*"Wherever death may surprise us, it will be welcome, provided that this, our battle cry reach some receptive ear, that another hand reach out to take up arms and that other men come forward to intone our funeral dinge with the staccato of machine guns and new cries of battle and victory;"*

*Ernesto "Che" Guevara*

# Fund Raising

I would like to sat a little here about fund raising. The growing humber of political prisoners and prisoners of war, their families ano the families of our fallen comrades must be provided for in addition to the evert dat needs of the fighting units. So this must be provided for.

Due to the level the struggle has reached 1 ah doubtful if the traditional means of fund raising can provide all the necessary funos to meet all the needs of our struggle. All such efforts must se intensified. However, those fuhos raised by traditional means must be augmented by funds raised by other means. The means of armed attacks upon financial institutions for the purpose of taking back the profits of the world slave system. There should be ho places where the pigs keep iheir stash that are safe from attacks by guerilla units for the purpose of puno raising. Because we have used this method traditionally and most of us are used to this type of activity, I feel it necessary to issue a warning that this type of activity should not be taken lightly. The same amount of planning must go into fund raising as a unit would put into assaulting a police station. The pigs' c.M.L. Covers all spheres and must be accounted for when planning any revolutionary activity.

# How we must initiate armed struggle within an urban guerrilla context

Since the year 1619 when the first slave ship landed with human cargo from Africa, to toil as slaves in the world, innumerable methods have been used to gain our freedom and liberation. From praying and begging to insurrections. From sit-ins to riots, and now we are witnessing the birth of the urban guerrilla.

Throughout this history and along with all of this activity there has been an overabundance of rhetoric. Our people have been talked to, lied to, tricked, begged and cajoled into trying all kinds of fruitless methods to gain freedom and liberation. There are even those people who have tried to make armed struggle and revolution palatable through rhetoric and con-games, imagine, in order to con the masses into picking up the gun to wage. An armed revolutionary struggle is almost the most barbarous power structure in all history! This is the way of cowards, advocating for the masses what they themselves are afraid of. This will not work. What is required is correct examples and

The overall strategy must be to organize those forces, ready to get down at this time, plan tactics, make preparations and then launch an organized attack upon the power structure. This will in turn educate and mobilize the masses and lastly bring about the day when enough of the masses see the validity of armed struggle. They will then begin to use it to bring an end to the evil system of world slavery headed by the racist power structure of Babylon—this is the overall view.

Initially the revolutionary forces must be organized in such a way as to provide the maximum security possible without great machinery so cumbersome that it's non-functional. Material resources

Must be obtained to support and sustain the existing forces. While these preparations are being made, political education and training must be intense. After this machinery is together then begin to initiate action.

The following is a partial list of things required to sustain guerrillas operating in urban areas in Babylon;

- Money

- Arms and munitions

- Real areas bases

Transportation  
Communication  
Infiltration and propaganda  
security and intelligence  
training  
political education  
local needs  
method of recruitment  
logistics of material resources

*Tactically*, in order to firmly establish armed struggle as a tool, the masses will accept and use, actions must be within. A context they can relate to as being in the service of their needs. Whatever mass actions are going down in the community armed actions must go down in support of these actions—say there is mass activity in a community around the welfare issue, the development of this struggle must be followed closely and at the proper time armed actions must be initiated in support of the particular demands.

In order not to end up operating in a vacuum doing large actions that the masses can only relate to abstractly, actions must be planned in support of their day to day demands. We must always keep our goal in mind, which is to educate the masses to the fact that armed struggle is the only real way by which an end can be brought to the bullshit the pigs are putting down. As enough of the masses join us we can finally deal the decisive blow to rid the planet of all evil gentry.

This brings us to what we will call propaganda actions. These actions will be of such a nature that they will receive nationwide and worldwide coverage through the pigs' newsmedia, e.g. political mappings in exchange for political prisoners and/or other demands. These actions will give the guerillas the opportunity to speak. In their own name and put forward their program—the first such action can also be used to inform the people and the pigs of the guerillas' existence.

Don't waste time on polemics with other organizations. Let those who disagree, disagree. I say the only laboratory to test ideas is practice. Those with ideas that others do not agree with can only be proven correct or incorrect through action not rhetoric.

We either seize this moment in history and step on the world stage of armed revolutionary struggle against all oppression and exploitation or we turn our backs on our historical task and leave the masses struggling and stumbling on the darkened path, the path darkened by a thousand years of the most barbaric treatment of man by man in all history. (The struggle will continue. But at this time. We have the power in our hands to speed up time. It is time for all of you who have something to teach, by example on the battlefield, to step forward, and need I remind anyone that *"The duty of a revolutionary is to make revolution"*. D.C.
