For Immediate Release	
May 12, 2011	Contact:
Lynzey Donahue (202) 307-9075 / (202) 307-9065;	
Tonya Dillard, General Services Administration (404) 331-0535 tonyar.dillard@gsa.gov	

Washington – The personal effects of Ted Kaczynski, aka the Unabomber, will be sold via an online auction by the U.S. Marshals beginning May 18, 2011. U.S. District Judge Garland Burrell of the Eastern District of California ordered the sale in August 2010. Proceeds from the auction will be used to compensate Kaczynski’s victims.

The auction will run from May 18 to June 2, 2011. The online catalog, which will include approximately 60 lots of property, will be on the Web at www.gsaauctions.gov beginning May 18. Items to be sold include personal documents, such as driver’s licenses, birth certificates, deeds, checks, academic transcripts, photos, and his handwritten codes; typewriters; tools; clothing; watches; several hundred books; and more than 20,000 pages of written documents, including the original handwritten and typewritten versions of the ”Unabom Manifesto.”

“The U.S. Marshals Service has been given a unique opportunity to help the victims of Theodore Kaczynski’s horrific crimes,” said U.S. Marshal Albert Nájera of the Eastern District of California. “We will use the technology that Kaczynski railed against in his various manifestos to sell artifacts of his life. The proceeds will go to his victims and, in a very small way, offset some of the hardships they have suffered.”

Photos of selected auction lots are available at www.flickr.com/photos/usmarshals/ (click on “Sets”). The catalog, photos and descriptions of all the lots will be available at www.gsaauctions.gov when the auction goes live on May 18.

These photos, released by the U.S. Marshals Service, display several of the lots being sold in an online auction of the personal effects of Ted Kaczynski, aka the “Unabomber.” The General Services Administration is conducting the sale on behalf of the U.S. Marshals from May 18 to June 2. Proceeds from the auction will be used to compensate Kaczynski’s victims. The auction will be online at www.gsaauctions.gov. (U.S. Marshals photo)

The U.S. Marshals Service occupies a uniquely central position in the federal justice system. It is the enforcement arm of the federal courts, involved in virtually every federal law enforcement initiative.

Additional information about the U.S. Marshals can be found at <http://www.usmarshals.gov>.

1. Typed Version of Manifesto

This is Kaczynski's typed version of the "Unabom Manifesto," which was ultimately published in 1995 in the Washington Post and New York Times.

Final Bid: 5,016 USD

Bidders: 13

throughout this material
replace the phrase "passive activity"
activity" by "avertive activity"

Introduction

In this article we argue that the industrial
revolution and its consequences have been a disaster
for the human race. They have greatly increased the
efficiency of those of us who live in
"advanced" countries, but they have also
caused human beings to suffer from
psychological suffering (and this world of physical
suffering as well) and have affected human beings
in the natural world. The continued development
of technology will make the situation all
worse. Unless human beings learn to
control and direct the growth of technology
and avoid greater damage to the natural world,
it will probably lead to further moral corruption
and psychological suffering, and it may lead to
increased physical suffering even in "advanced"
countries.

2. The industrial-technological system may succeed
in it may break down, but it is not
likely to remain a low level of physical and
psychological suffering, but only after passing
through a long and very painful period
of adjustment and only at the cost of
destroying human beings and other organisms
to industrial products, and more so in the
process of adjusting the system to the point of
allowing the system to be in a state of
allowing the system to be in a state of
allowing the system to be in a state of
allowing the system to be in a state of

3. If the system breaks down, the consequences

Autonomy

22. Autonomy as a part of the human process
may not be necessary for every individual, but
most people need it. The degree of
autonomy in working toward their goals, then,
should be related to their own abilities
and need to understand their own situation and control
it. Not every person is able to control their
situation, however, and control is a highly individual
skill, usually enough to act as a member of a
SMALL group. This is not to say that people
a good many thousands may make a successful
group effort to attain their goals, but that
the group process will be a success, but if the
individuals are not able to control their own
situation, then the need for autonomy becomes
clear. The need for autonomy becomes
clear when the individual is in a state
where he cannot control his own situation
because he is made an object of the
group making the collection decision in a
group and he is not able to control his
situation, then the need for autonomy
becomes clear. The need for autonomy
becomes clear when the individual is in a
state where he cannot control his own
situation because he is made an object
of the group making the collection decision
in a group and he is not able to control
his own situation, then the need for
autonomy becomes clear. The need for
autonomy becomes clear when the
individual is in a state where he
cannot control his own situation
because he is made an object of the
group making the collection decision
in a group and he is not able to
control his own situation, then the
need for autonomy becomes clear.

own situation because he is made
an object of the group making the
collection decision in a group and
he is not able to control his own
situation, then the need for
autonomy becomes clear.

Human Suffering

16.7. If the industrial system breaks down
people will die, since the world's population
will be too large to sustain itself. It
will be necessary to work for the
survival of the species. The world
will be a very different place
and we will have to learn to live
in a very different way. The
world will be a very different
place and we will have to learn
to live in a very different way.
The world will be a very different
place and we will have to learn
to live in a very different way.

16.8. The industrial system has
caused human beings to suffer
from psychological suffering (and
this world of physical suffering as
well) and have affected human
beings in the natural world. The
continued development of technology
will make the situation all worse.
Unless human beings learn to control
and direct the growth of technology
and avoid greater damage to the
natural world, it will probably lead
to further moral corruption and
psychological suffering, and it may
lead to increased physical suffering
even in "advanced" countries.

and direct the growth of technology
and avoid greater damage to the
natural world, it will probably lead
to further moral corruption and
psychological suffering, and it may
lead to increased physical suffering
even in "advanced" countries.

The Issue of Loneliness

21b. Because of the need for isolation and for
control of the individual, a person may
experience a sense of isolation and
loneliness. This is a very common
feeling in a society where the
individual is often isolated from
others. The need for isolation and
control is a very common feeling
in a society where the individual
is often isolated from others. The
need for isolation and control is

Lot 2

2. Handwritten Copy of Manifesto

This is Kaczynski's handwritten rough draft of the "Unabom Manifesto," which was ultimately published in 1995 in the Washington Post and New York Times.

Final Bid: 20,053 USD

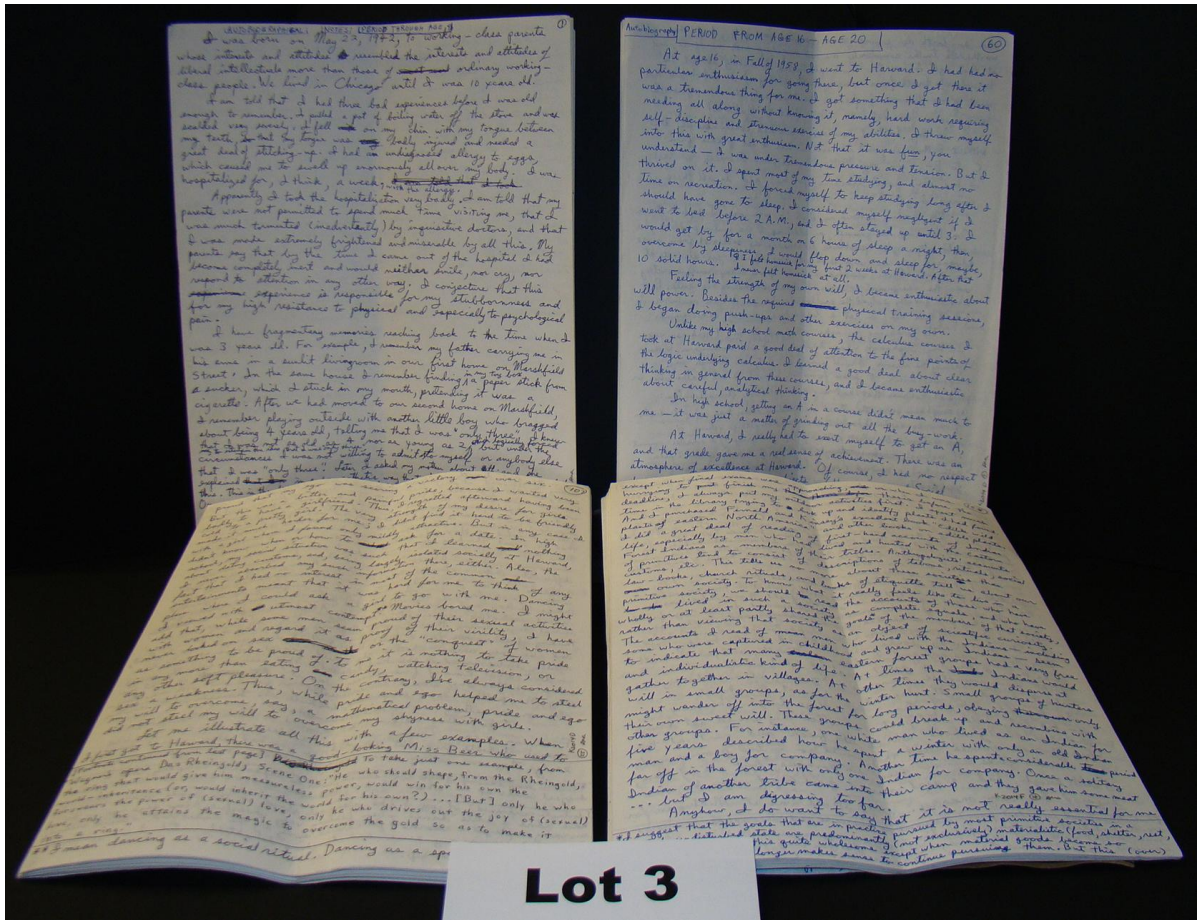

Bidders: 11

3. 1979 Autobiography

Among all kinds of other observations about himself, in this document Kaczynski describes the circumstances, while he was a graduate student at the University of Michigan, he first realized that murdering others was at least a temporary cure for his general unhappiness. He shortly thereafter makes a considered decision to actually become a serial killer. He develops and implements a plan to learn necessary skills for both wilderness living and murder, culminating in the emergence of the "Unabomber" about 10 years later.

Final Bid: 17,780 USD

Bidders: 30

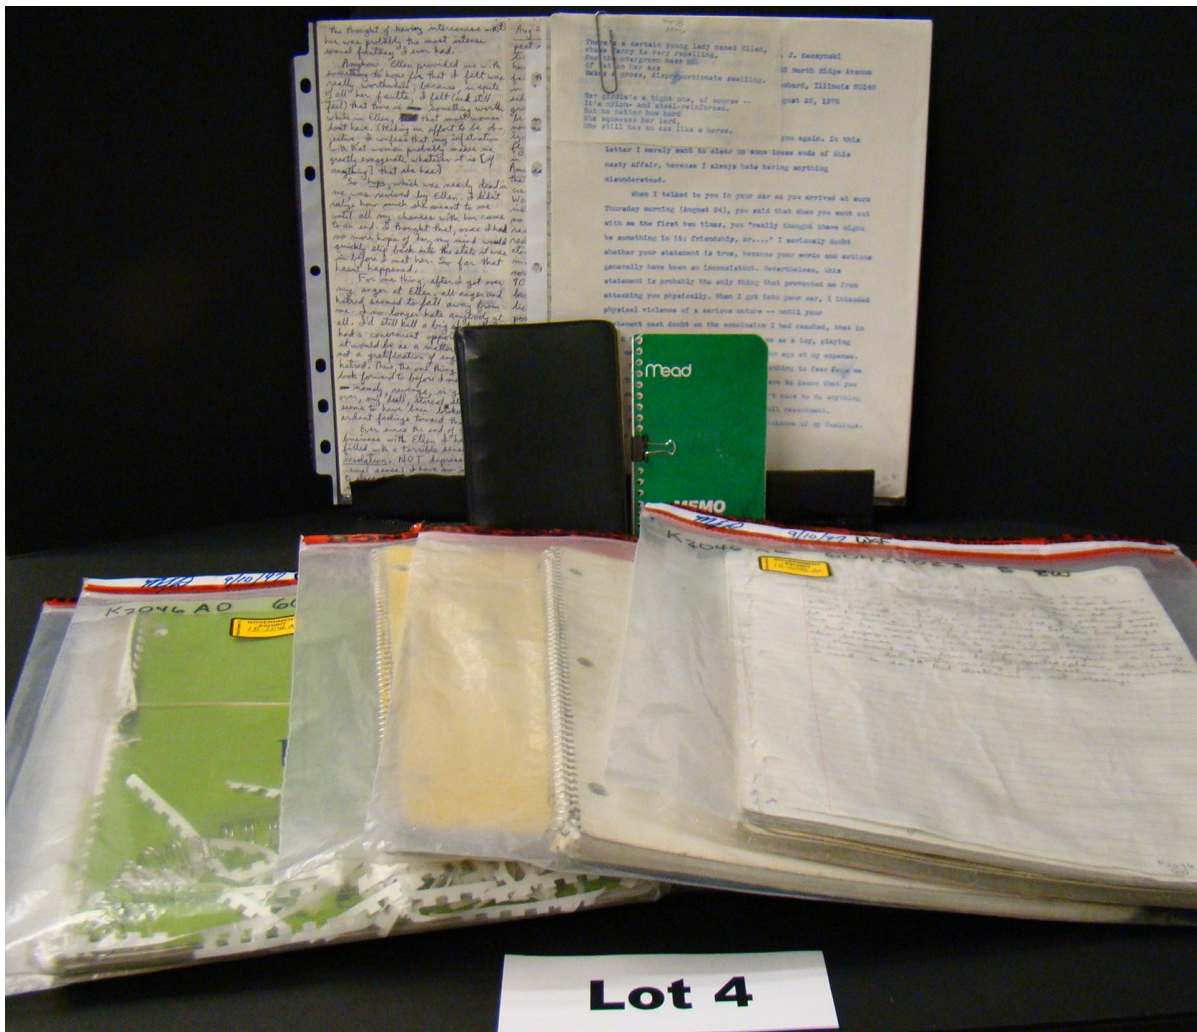

AUTOBIOGRAPHICAL NOTES PERIOD THROUGH AGE 10

I was born on May 23, 1942, to working-class parents whose interests and attitudes resembled the interests and attitudes of liberal intellectuals more than those of ~~most~~ ordinary working-class people. We lived in Chicago until I was 10 years old.

I am told that I had three bad experiences before I was old enough to remember. I pulled a pot of boiling water off the stove and was scalded very severely, I fell ~~on~~ on my chin with my tongue between my teeth, so that my tongue was ~~very~~ badly injured and needed a great deal of stitching-up. I had an undiagnosed allergy to eggs, which caused me to swell up enormously all over my body. I was hospitalized for, I think, a week, with ~~it~~ ~~told~~ that I took

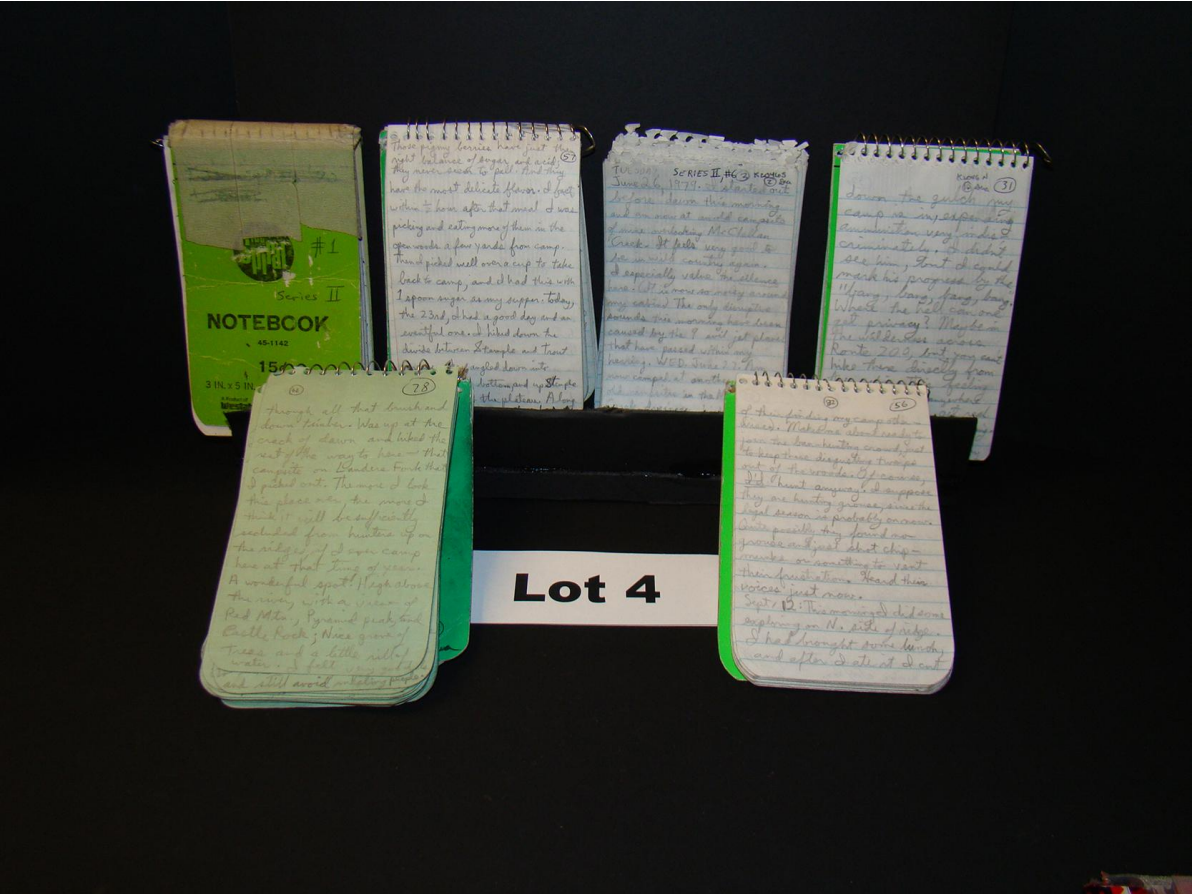

4. Personal Journals

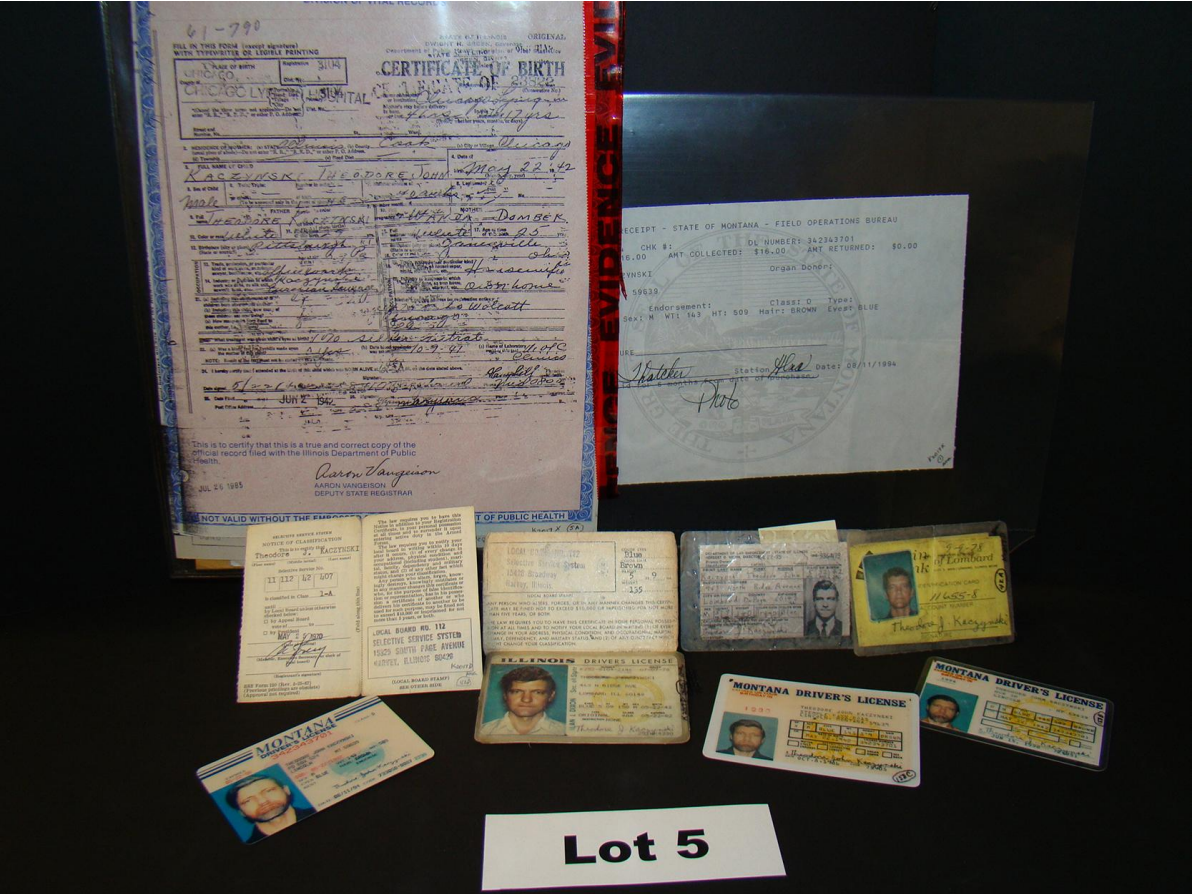

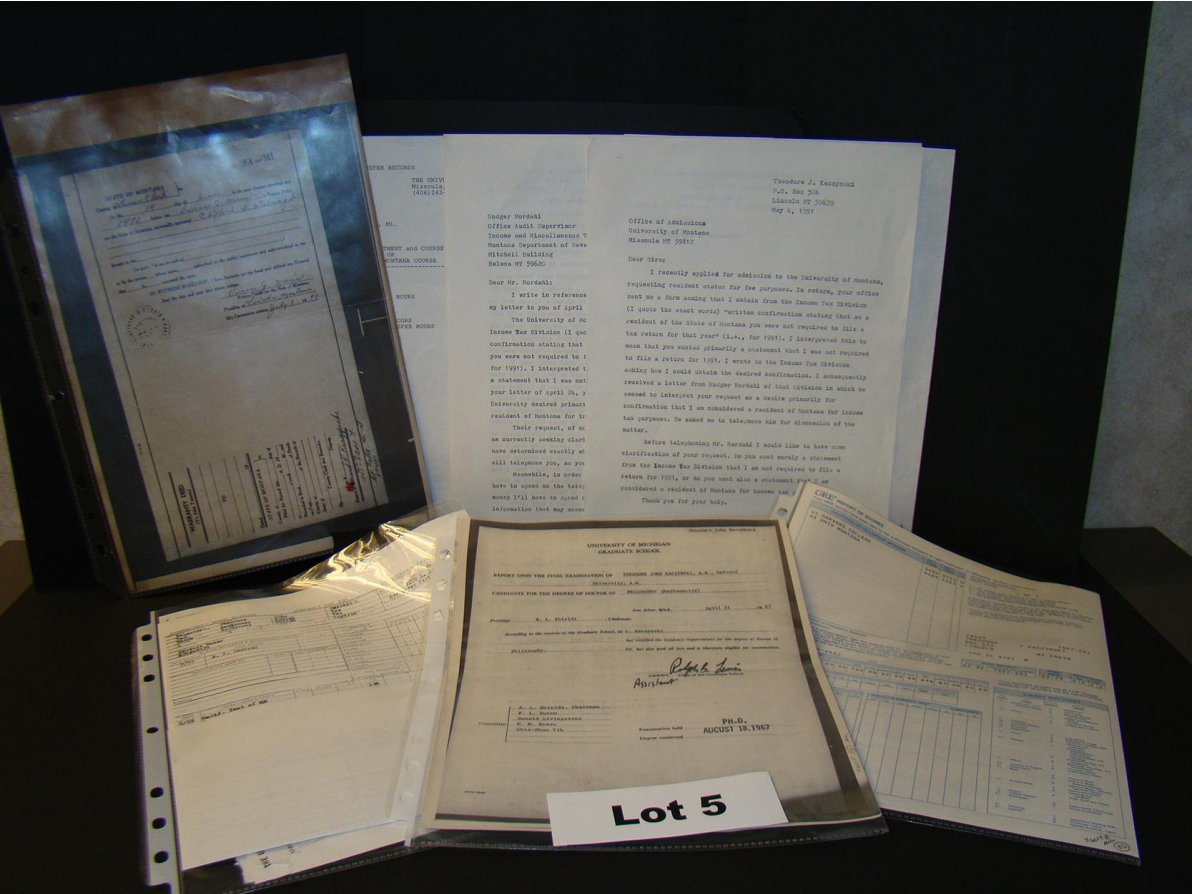

One lot to consist of approximately 20 personal journals. These handwritten notebooks describe in diary fashion Theodore Kaczynski's thoughts and feelings about himself, society and living in the wilderness. They include admissions to specific UNABOM and other crimes.

Final Bid: 40,676 USD

Bidders: 21

5. Birth Certificates and Licenses (and Uni. Applications[?])

One Lot to Consist of:

- Birth Certificates
- Montana driver's license with photo
- Illinois driver's license with photo
- Montana driver's license without photo
- Original Social Security Card with signature
- Main Bank of Lombard Card with photo
- State of Illinois Firearm Owner ID with photo
- Selective Service Notice of Classification
- Lewis and Clark Library card with signature
- Driver's license receipt Montana.

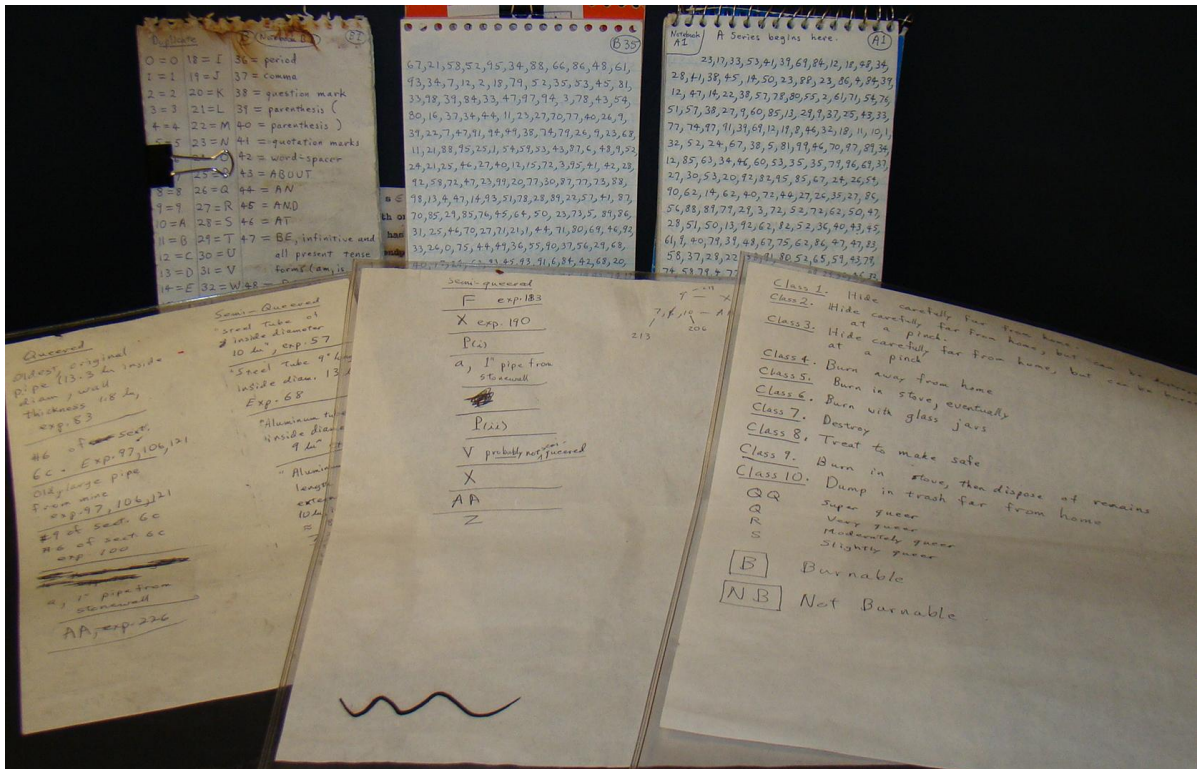

A main investigative theory of the UNABOM Task Force was that the UNABOM subject was a white male who spent his life until early adulthood in Illinois, followed by moves to Utah and California. This turned out to be exactly the pattern Kaczynski followed. The items listed in this lot confirms this information.

Kaczynski was not acquainted with any of his UNABOM victims. They were instead representational targets that personified some aspect of society he hated. Kaczynski identified them through news media reports and library research. Kaczynski held a Montana driver's license with a photo, Montana driver's license without a photo, a receipt for his Montana driver's license and a Lewis and Clark county library card, all of which confirmed his residence. Kaczynski's original plan upon deciding to become a serial killer, was to live "Off the grid" as much as possible in the wilderness of British Columbia, periodically venturing out to commit murders and then returning to lay low until it was time to kill again. In furtherance of this in 1969, he explored parts of British Columbia, and applied to the Canadian government for permission to live there. That permission was denied, however, probably in part because of the large number of young American men already living legally and illegally in Canada who were seeking to avoid the draft during the height of the Vietnam war.

Final Bid: 8,016 USD

Bidders: 18

6. TJK Code System and Definition

One lot to consist of TJK code system and definitions.

These coded documents and code keys produced by Kaczynski were decoded by the FBI and determined to contain many admissions and discussions of the UNABOM crimes.

A code sheet belonging to Ted Kaczynski, aka the Unabomber, is displayed as personal items of Kaczynski are auctioned off online with proceeds to benefit the victims' families Wednesday, May 18, 2011 in Atlanta. The codes were decoded by the FBI and determined to contain many admissions and discussions of Kaczynski's crimes.

Final Bid: 5,053 USD

Bidders: 15

7. Academic Records

One lot to consist of copy of Harvard application for admission, transcript for high school, GRE report scores, dissertation letters from committee, correspondence with university of Montana, and grade reports.

Kaczynski was admitted as a freshman to Harvard university at the age of 16. A copy of his Harvard application for admission, application for freshman housing, and Harvard transcripts are included in this lot. Kaczynski a gifted student with a genius level IQ, was admitted as a freshman to Harvard university at the age of 16. Already socially isolated, his experience at Harvard only furthered this trend. Also at Harvard, Kaczynski had his first real encounter with the field of psychology, when he volunteered to participate in a study. This study subjected unwitting participants to withering attacks on their beliefs and value systems, to see how they would react. This experience helped place psychology and psychiatry high on the list of scientific disciplines Kaczynski hated most. Kaczynski was an avid researcher and writer. He corresponded with a wide range of institutions. This lot includes correspondence with the university of Montana. Kaczynski maintained copies of his grades and academic records such as his grade reports.

Final Bid: 1,009 USD
Bidders: 11

8. Smith Corona portable typewriter

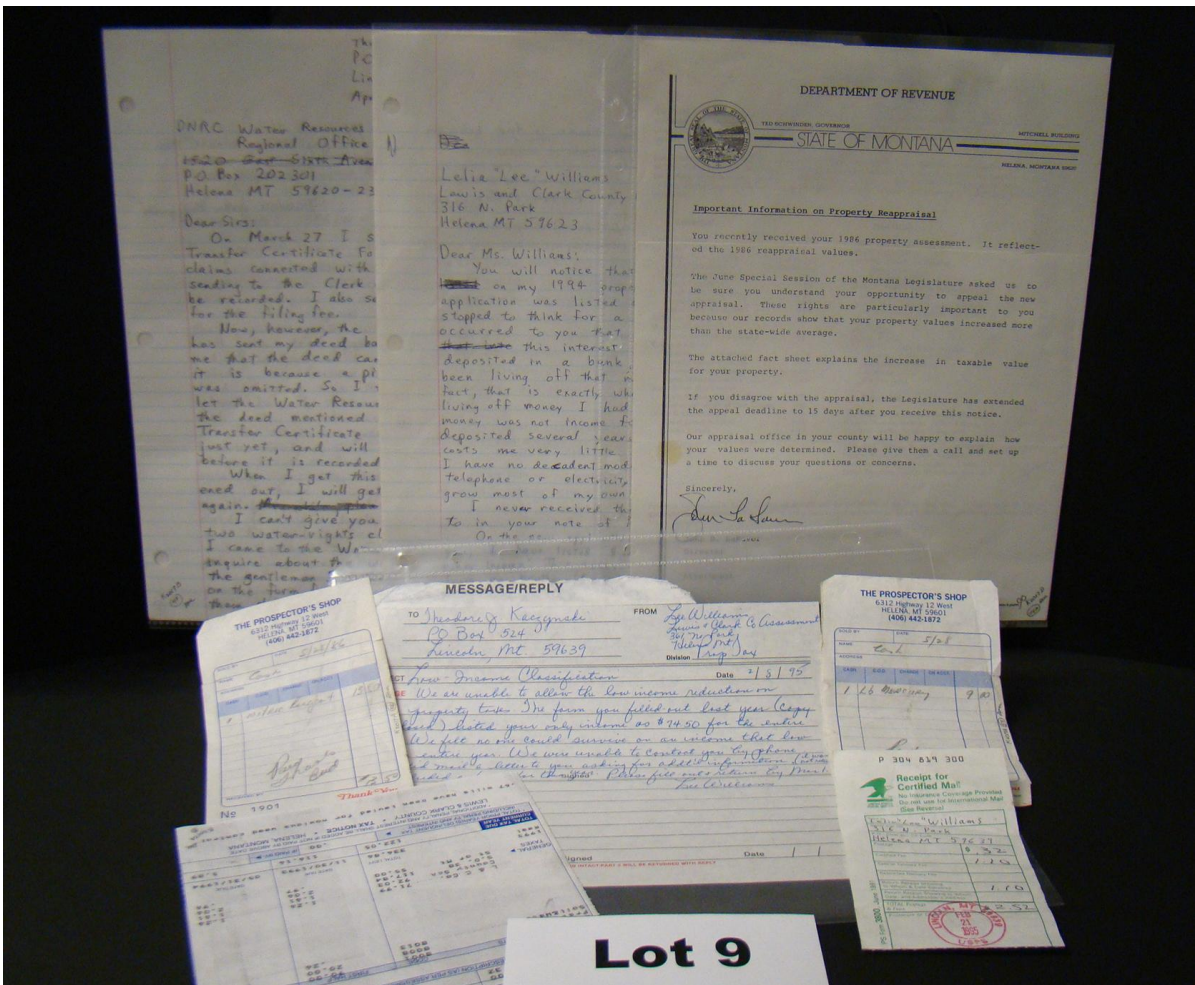

One Smith-Corona portable manual typewriter (black in color).

This is the L3 Smith-Corona portable manual typewriter that Kaczynski used to type most of his UNABOM documents, including the "UNABOM Manifesto." This typewriter was seized by the FBI during the search of his cabin in April 1996.

Final Bid: 22,003 USD

Bidders: 24

9. Property Deeds and Letters

One lot to consist of the following:

Deed to Montana property: This is the deed to Kaczynski's Montana property.

When Kaczynski's original plan to live in the British Columbia wilderness didn't work out, he turned to Alaska as his "Plan B". He traveled there but was unable to secure land in a suitable location. He therefore turned to his third choice: Montana. Scouting western Montana in 1970, he found and purchased a plot of land just outside the town of Lincoln. There, he built what would later become known as the UNABOM cabin, from which Kaczynski would plan and carry out all his UNABOM attacks starting in 1978. The UNABOM cabin is currently on display at the Newseum in Washington D.C.

This lot will also include handwritten letters to county assessor's office.

These are Kaczynski's handwritten letters to the County Assessor's Office in Montana pertaining to his Montana property.

Final Bid: 1,013 USD

Bidders: 15

10. Mental Health Records

Despite his hatred of psychologists and psychiatrists, Kaczynski was acutely aware of his own unhappiness and on at least a couple of occasions sought professional assistance to deal with it. Much of his unhappiness he attributed to his social ineptness, especially regarding women and his lifelong inability to achieve a satisfying romantic relationship. This lot includes letters written by Theodore Kaczynski in regards to seeing a therapist and treating his anxiety and other issues.

Final Bid: 2,006 USD

Bidders: 15

11. Medical Documents

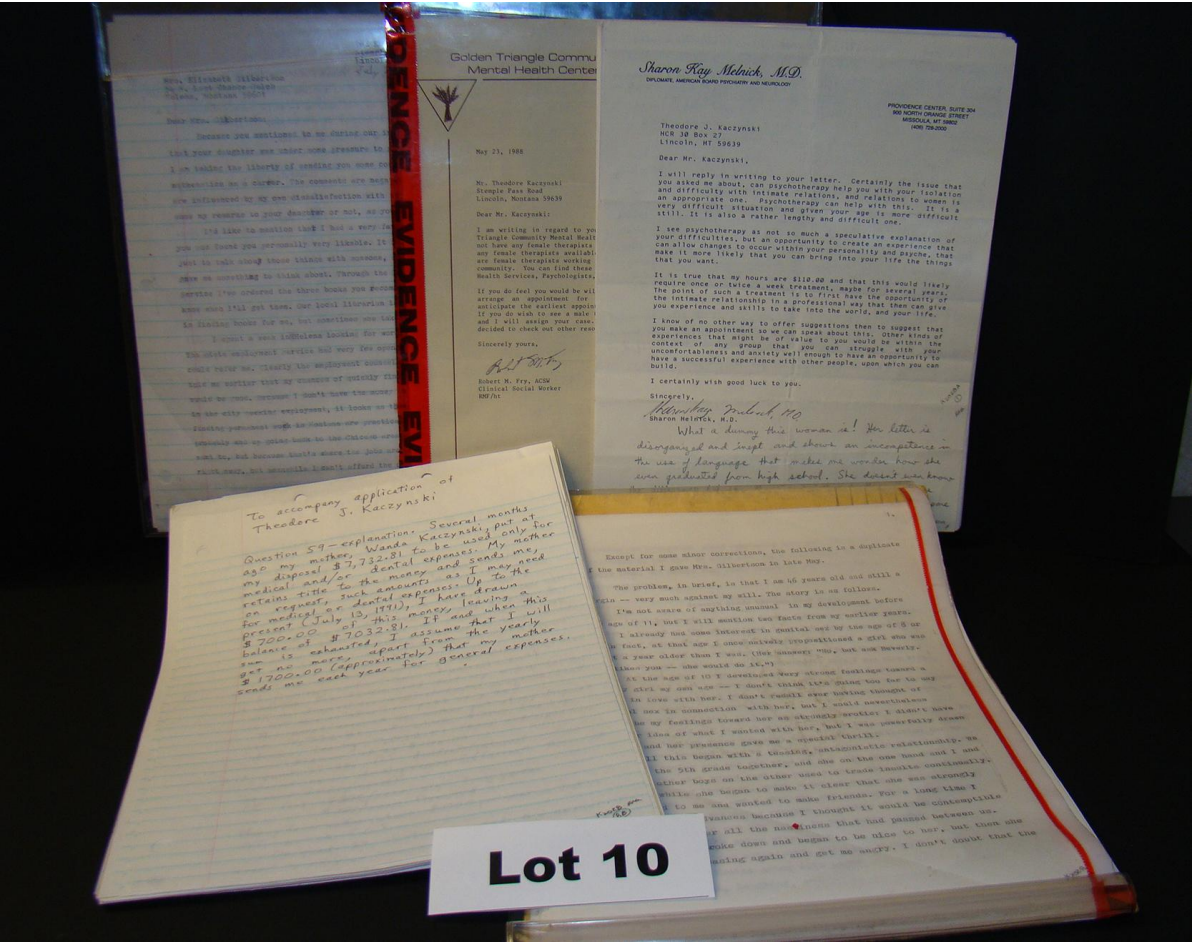

One lot to consist of medical documents. As Kaczynski grew older, he visited numerous medical specialists with questions about his health. This lot includes copies of letters he wrote to various medical specialists.

Final Bid: 425 USD

Bidders: 5

12. Five books from Ted's Cabin Library

Kaczynski had a rather extensive collection of books in his Montana cabin. The books included these titles, which had special relevance to the UNABOM investigation and federal search warrant to enter Kaczynski's Montana cabin:

Golden Triangle Community Mental Health Center

Sharon Kay Melnick, M.D.
PSYCHIAL, PSYCHOLOGICAL, PSYCHOSOMATIC AND NEUROLOGY

PROVIDENCE CENTER, SUITE 204
180 NORTH CHURCH STREET
PROVIDENCE, RI 02902
PH: 847-7000

Theodore J. Kaczynski
HCR 30 Box 27
Lincoln, NE 68509

Dear Mr. Kaczynski,

I will reply in writing to your letter. Certainly the issue that you asked me about, can psychotherapy help you with your isolation and difficulty with intimate relations, and relations to women is an appropriate one. Psychotherapy can help with this. It is a difficult situation and given your age is more difficult still. It is also a rather lengthy and difficult one.

I see psychotherapy as not so much a speculative explanation of your difficulties, but an opportunity to create an experience that can allow changes to occur within your personality and psyche, that make it more likely that you can bring into your life the things that you want.

It is true that my hours are \$110.00 and that this would likely require once or twice a week treatment, maybe for several years. The benefit of such a treatment is to first have the opportunity of the intimate relationship in a professional way that then can give you experience and skills to take into the world, and your life.

I know of no other way to offer suggestions than to suggest that you make an appointment so we can talk about this, other lines of context of any group that you are struggling with. You have a successful experience with other people, upon which you can build.

I certainly wish good luck to you.

Sincerely,
Sharon Melnick, M.D.

What a lovely this woman is! Her letter is disorganized and brief and shows an incompleteness in the use of language that makes me wonder how she ever graduated from high school. She doesn't even know

May 23, 1988

Mr. Theodore Kaczynski
Simpson Park Road
Lincoln, Montana 59639

Dear Mr. Kaczynski:

I am writing in regard to you Triangle Community Mental Health Center. I have no formal therapists and female therapists available. I am female therapist working community. You can find these Health Services, Psychologists.

If you do feel you would like to arrange an appointment for someone the earliest possible. If you do wish to see a male and I will arrange your care. Sincerely yours,

Robert M. Fry, ACM
Clinical Social Worker
M.D.

To accompany application of Theodore J. Kaczynski

Question 59 - explanation: Several months ago my mother, Wanda Kaczynski, put up my dental expenses. My mother my dental and/or medical and sends me medical bills to the amount as I may be requested such amounts. Up to the present (July 13, 1988), I have drawn \$2000.00 of this money, leaving the balance of \$7032.81. I assume that I will get no more apart from my mother \$1700.00 (approximately) that my mother sends me each year for dental expenses.

Except for some minor corrections, the following is a duplicate of the material I gave Mrs. Silbertson in late May.

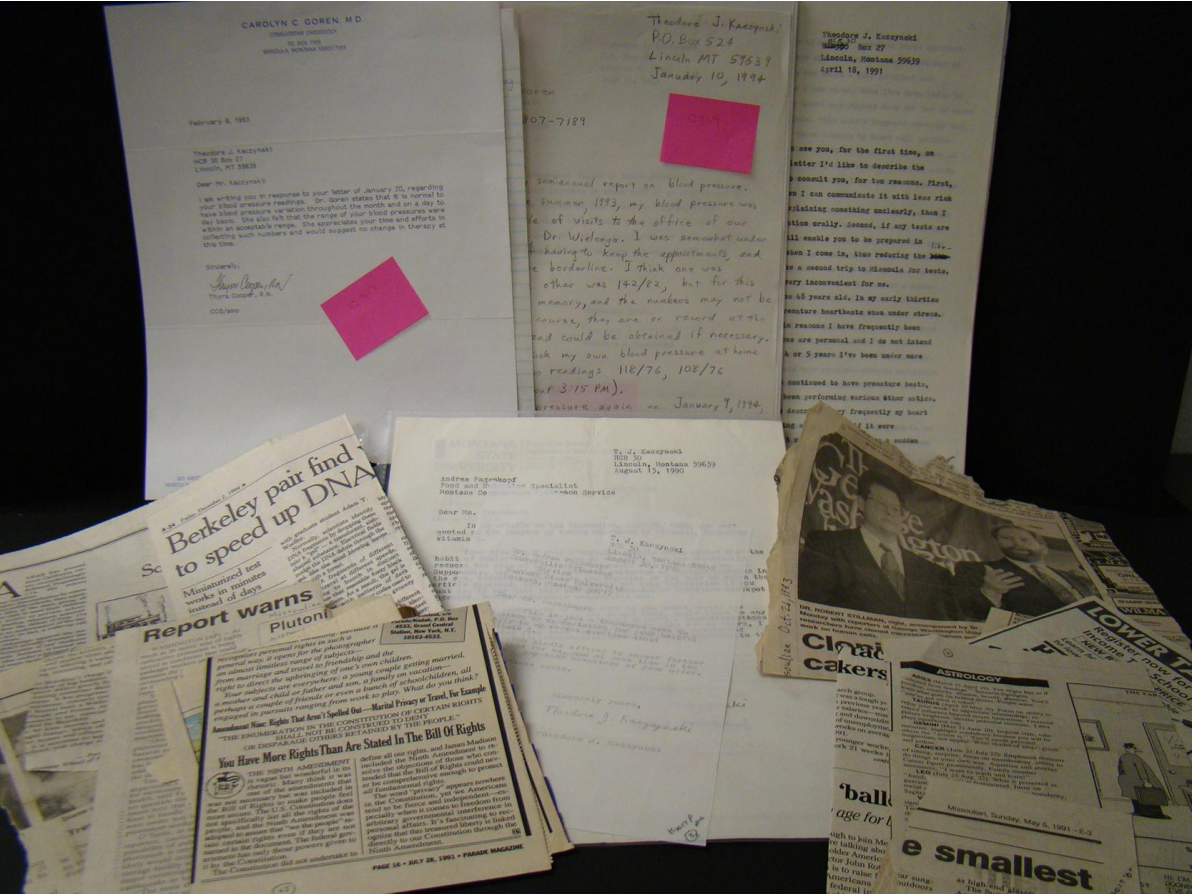

The problem, in brief, is that I am 46 years old and still a virgin - very much against my will. The story is as follows.

I was not aware of anything unusual in my development before the age of 11, but I will mention two facts from my mother's perspective. I already had some interest in genital sex by the age of 8 or 9. In fact, at that age I consciously approached a girl who was a year older than I was. (This discovery may not seem remarkable to you - she would do it, too.)

At the age of 10 I developed very strong feelings toward a girl my own age who I don't think I've dated yet. In fact, I was in love with her. I don't recall ever having a conversation with her in connection with her, but I was very close to her. I was very close to her, but I was never really close to her. I was very close to her, but I was never really close to her.

It was in connection with her that I first became aware of my feelings toward her as strongly as I do now. I don't know what I wanted with her, but I was very close to her. I was very close to her, but I was never really close to her.

Lot 10

Lot 12

- Chinese Political Thought in the Twentieth Century by Chester C. Tan
- The Technological Society by Jacques Ellul
- The True Believer by Eric Hoffer
- Violence in America
- The Ancient Engineers by L. Sprague De Camp.

Final Bid: 2,528 USD

Bidders: 7

13. Bank Statements

One lot to consist of checks, and statements from western federal savings bank.

Once he moved to Montana, Kaczynski subsisted "off the grid" as much as possible. His expenses sometimes amounted to no more than a few hundred dollars per year. For needs he couldn't provide himself, Kaczynski bartered vegetables he grew, occasionally took odd jobs for short periods, and accepted birthday money from his mother and brother. Funds to sustain his UNABOM activities (mainly supplies and travel) were a constant drain on Kaczynski's meager resources. Kaczynski supplemented his UNABOM funds by extracting money from his mother and brother for help with fictitious problems such as medical expenses. The Western Federal Savings Bank documents in this lot illustrate how Kaczynski managed his finances. A section of the UNABOM search warrant affidavit discussed how much money Kaczynski lived off of through the years.

Final Bid: 803 USD

Bidders: 11

14. Typed and Handwritten Letters

One lot to consist of typed and handwritten letters, some signed by "FC". "FC", allegedly standing for "Freedom Club," was the name Kaczynski invented for a purported group of people responsible for the UNABOM bombings. Letters Kaczynski wrote to news media organizations and some individuals, taking credit for UNABOM attacks, were signed "FC."

Final Bid: 4,453 USD

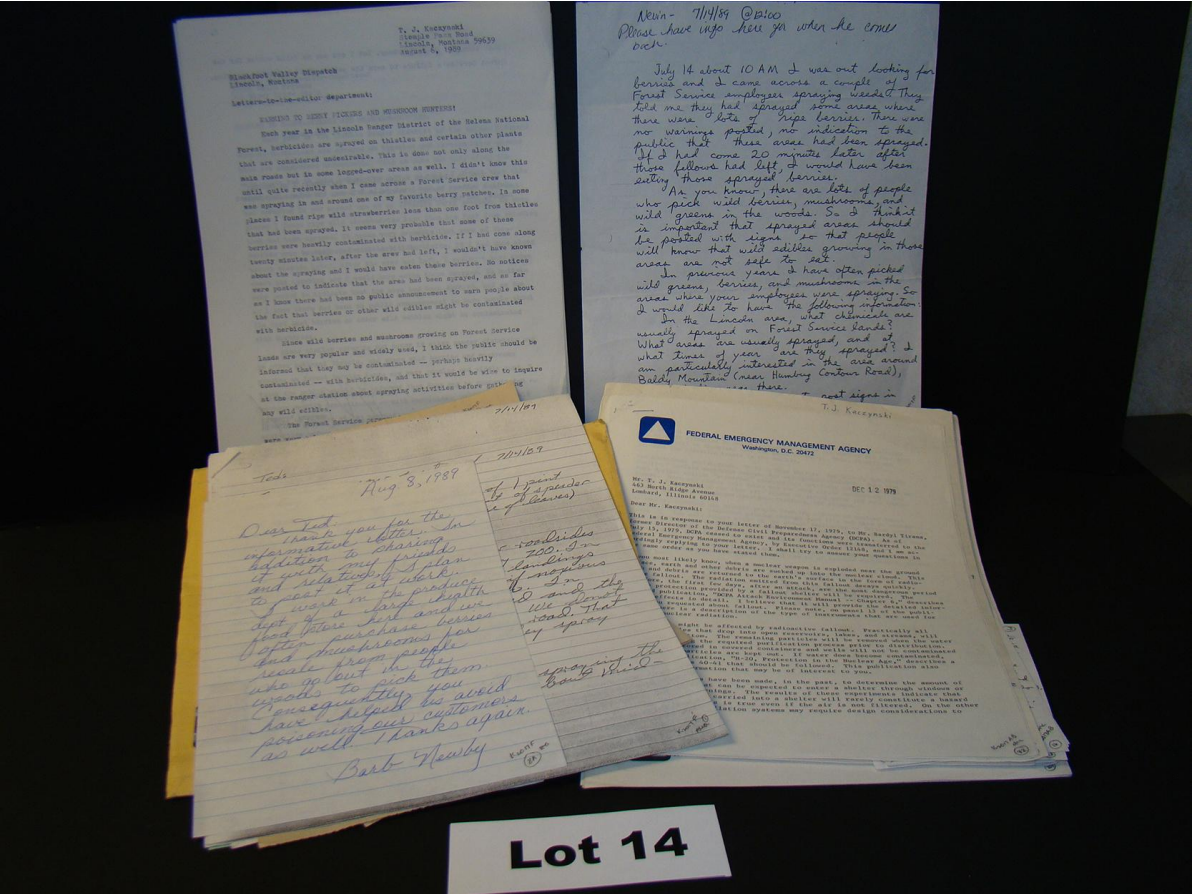

Bidders: 14

15. A manual for wilderness survival and Ted's notes

One lot to consist of manual titled "Your chance to live". Kaczynski did extensive research on how to survive in the wilderness, and collected pamphlets such as these: "Stalking the wild asparagus" by Euell Gibbons and the U.S. Government National Defense Civil Preparedness Agency's "Your chance to live." Kaczynski acquired Gibbon's book shortly after leaving Harvard, and used it to practice gathering wild edible plants in forests around Chicago.

Final Bid: 3,103 USD

Bidders: 9

Letters about the unmarked spraying of pesticides

1.
SUGGESTIONS FOR EARTH FIRSTIERS

From PJ

Earth First! wants to eliminate the industrial form of society. This is clearly a revolutionary goal. Yet it seems that many or most Earth First!ers still think and act like reformers, not like revolutionaries.

This is illustrated by Barry Chernay's response to the bombing in which we assassinated the president of the California Forestry Association. According to newspaper reports Chernay was upset by the bombing because he was afraid that there would be retaliatory attacks on Earth First!ers. Now we respect (with certain qualifications) the nonviolent principles of Earth First! even though we don't think it would be practical for everyone to abide by them and if any Earth First!ers get beaten up in retaliation for our bombing we certainly sympathize with them. But Chernay's reaction shows that his mentality is that of a reformer, not a revolutionary.

To a revolutionary, what is important is not the short-term goal of saving this or that bit of wilderness or securing some grudging tolerance from timber industry sympathizers. What is important is the long-term goal of undermining and dismantling industrial society so that a new society can be built. From this point of view, attacks on Earth First!ers, because such behavior tends to increase the social stresses in industrial society and help to turn people against the system.

It is important to distinguish between what the industrial system "wants" and what certain people who claim to represent the system may want or may do. By what the system "wants" we mean that which helps to assure the survival and growth of the industrial system. This corresponds approximately with what is desired by the most rationally self-interested and "responsible" members of the system controlling elite. But people who believe themselves to be supporters of the system act in ways that are harmful to the system and thus serve as unwitting allies of those who want to overthrow the system.

Take police brutality as an example. The most rational and "responsible" members of the system's elite are against police brutality. They want the police to use just enough force (and no more than just enough) to insure public order and obedience to the system's rules, because they know that police brutality increases social stresses and tends to break down respect for the system. And cops (or timber industry goons) who beat people up regard themselves as pro-system and into those who are against the system, but the behavior of such cops really part of the system, not as a kind of disease of the system.

Similarly, the irresponsible politicians who are currently repealing environmental laws may be acting as unwitting allies of revolutionaries. If their actions lead to a few more cases like Love Canal and the Exxon Valdez oil spill, they will be helping to destroy respect for the system. Moreover the actions of these politicians help to

APPENDIX

by Mira Goldberg that appeared in the Earth First! Journal, February 3, 1995) will help us to illustrate the leftist

le, December 21, 1994 issue of Earth First!, David Orton article, "Rethinking Environmental-First Nations Relations" in which he criticized some "First Nations" (i.e. Indians) for overlooking in destructive economic exploitation of the land and some environmentalists for uncritically accepting the same. A response to "Rethinking Environmental-First Nations," Goldberg answers Orton, and in doing so she shows the leftist trait of intense identification with

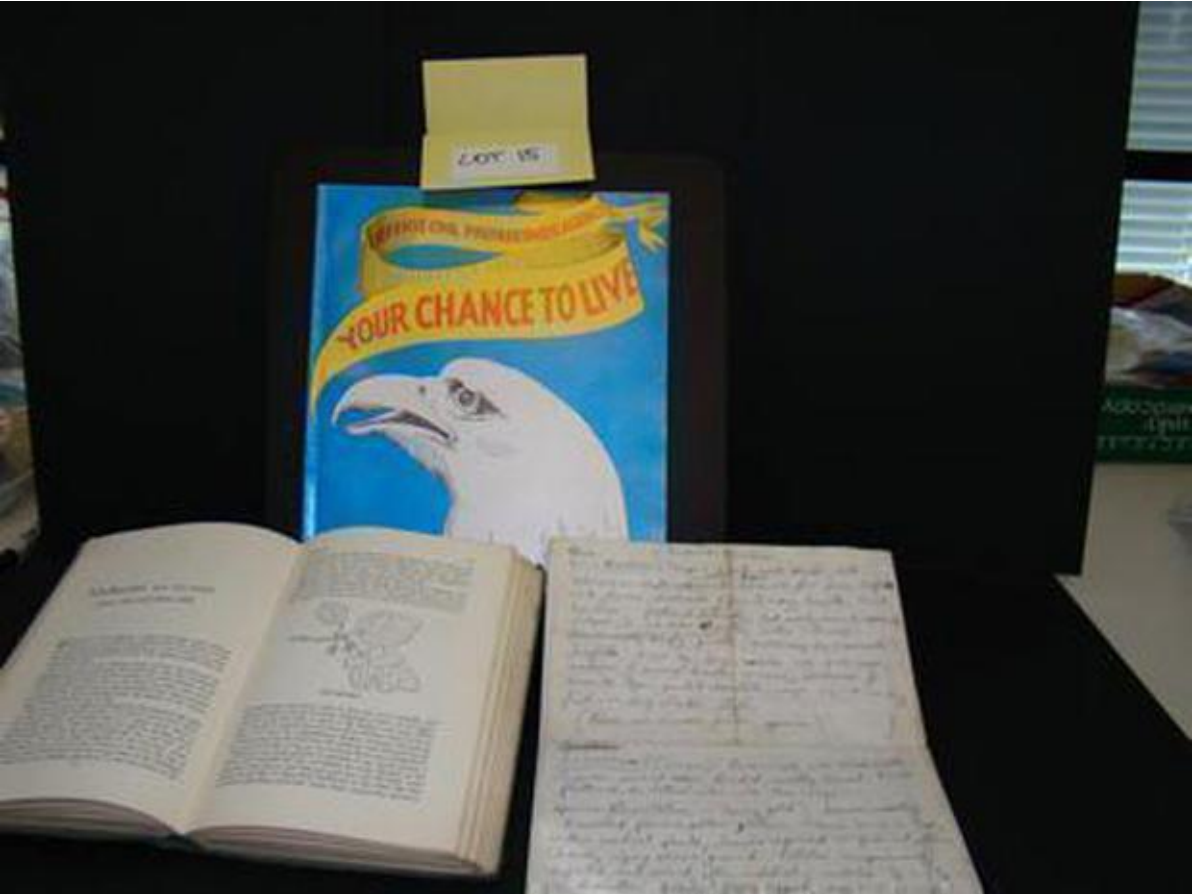

Orton that we (PJ) mention in paragraph 15, 229, 230 of and coupled with this the trait of hypersensitivity that in paragraph 11, i.e. Orton's article was reasonable and made it clear that he was criticizing only SOME Indians and not all with environmentally destructive policies, and he had the opinion that there were more "good" Indians than "bad" environmentalists. "Such native 'biocentrals' (he wrote) would strongly identify with the First Nations than radical environmentalists in the mainstream movement are." responds to ~~some~~ Orton's article as if it were a nasty attack on Indians. She even implies that ~~some~~ Orton's thinking "is" (last paragraph of her article). She seems to think for white people ever to criticize any Indians (sent her article).

Goldberg prudently admits that not all Indians are perfect - there are "laborers" - but then in the closing to her article (her article) she tries to find excuses for them and bad actions on the insufficiently subservient attitudes of environmentalists. Compare paragraphs 15, 229 of our (PJ's)

for a leftist, Goldberg is fond of certain auto-workers, (p. 229 of PJ's article.) In her brief article she uses "Indian" ones, "biocentrals" (i.e. Indians) and "laborers" (i.e. auto-workers) to illustrate her point. This is absurd. The word "biocentrals" was originally coined by Orton to refer to the extermination of the Indians by the whites, for example, it seems to me that the word "biocentrals" was applied to some nineteenth century events in which the whites were relocated through forced marches in which the word was extremely high. But to apply the word "biocentrals" to the treatment of Indians by whites is to compare it to the treatment of the whites, and that is ridiculous in the eyes of

Lot 14

Suggestions for Earth First!

16. List of Names

One Lot to Consist of a List of Names. Kaczynski Was an Avid Researcher, Planner and Note Taker. This is One of Kaczynski's Handwritten Research Papers With a List of Names of Individuals.

Final Bid: 1,119 Usd

Bidders: 14

17. Official Maps From Various Cities

Kaczynski meticulously planned his UNABOM attacks, which for his security always occurred in cities outside Montana. Sometimes he placed bombs by hand, and sometimes he mailed them. Even the mailed bombs, though, were always placed into the mail stream in states other than Montana. Whether placed or mailed, Kaczynski would carry bombs for hundred of miles, mainly using public transportation such as trailways and greyhound buses. Kaczynski mapped out his UNABOM travels in advance, using gas station-type paper maps like these found in his cabin. This lot includes his notes.

Final Bid: 463 USD

Bidders: 11

18. Letters to and From Parents

One lot to consist of letters to and from parents (mostly mother). These approximately 155 letters illustrate the complicated relationship between Kaczynski and his parents. These letters were important to both the prosecution and defense in establishing Kaczynski's emotional history in preparation for trial.

Final Bid: 2,103 USD

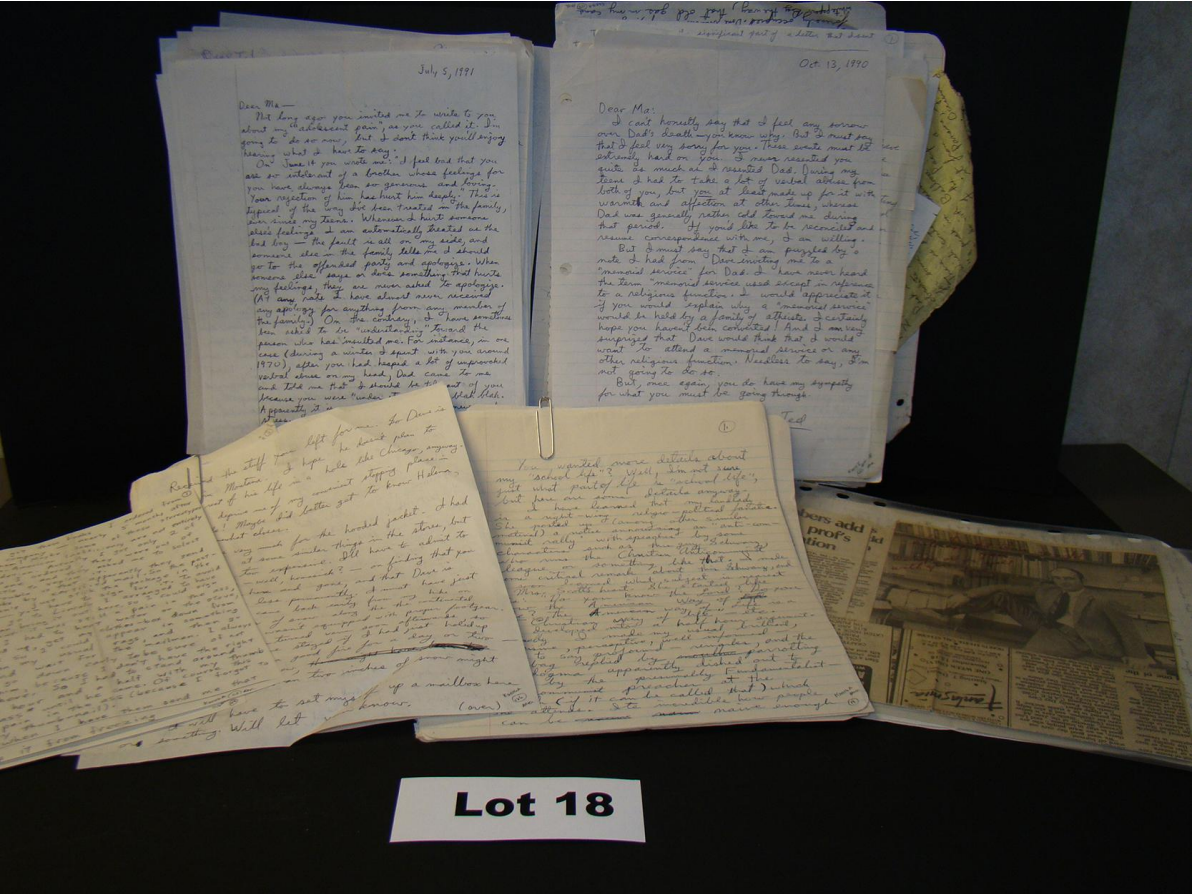

Bidders: 12

19. Letters to and From Brother Dave

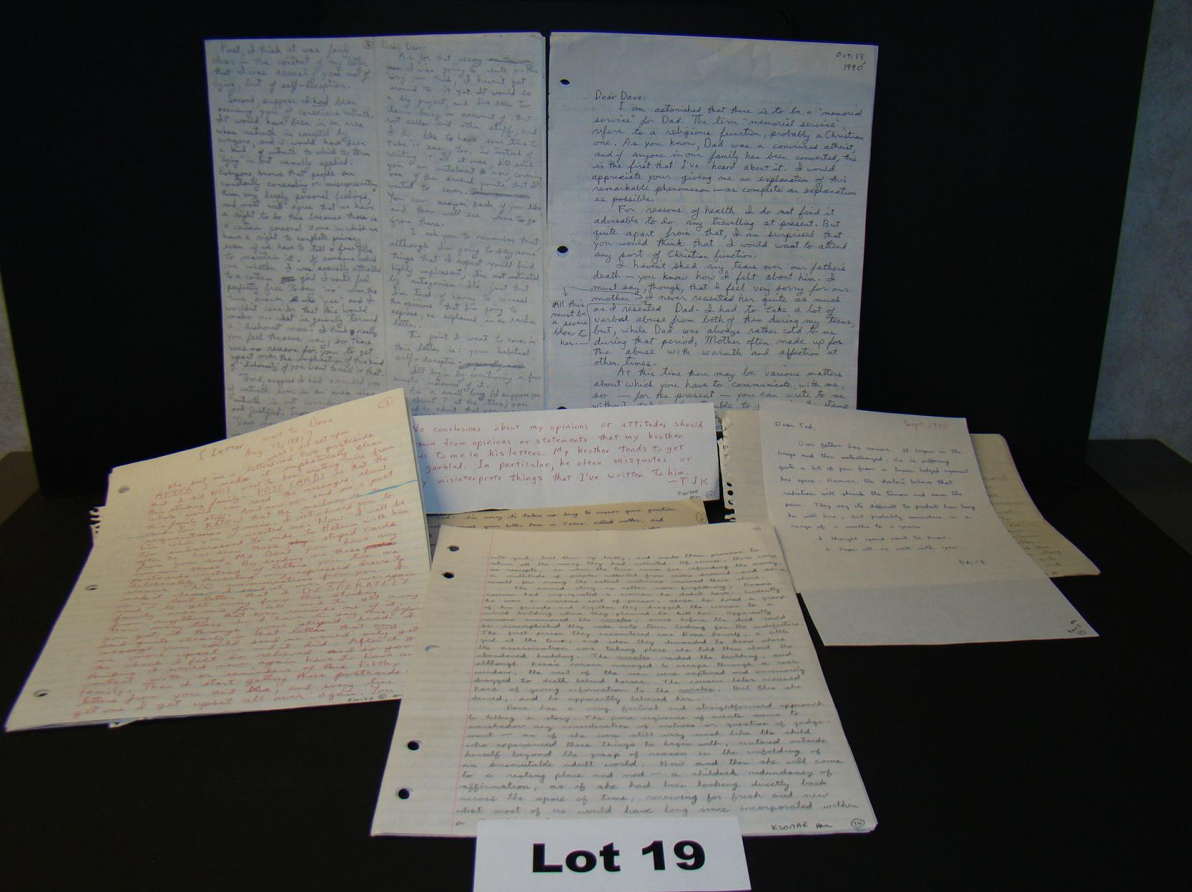

These letters were important in establishing Kaczynski's whereabouts during different UNABOM events between 1978-1995. They were used in the development of an investigative timeline and information derived from them was used in the UNABOM search warrant affidavit.

Final Bid: 3,553 USD

Bidders: 22

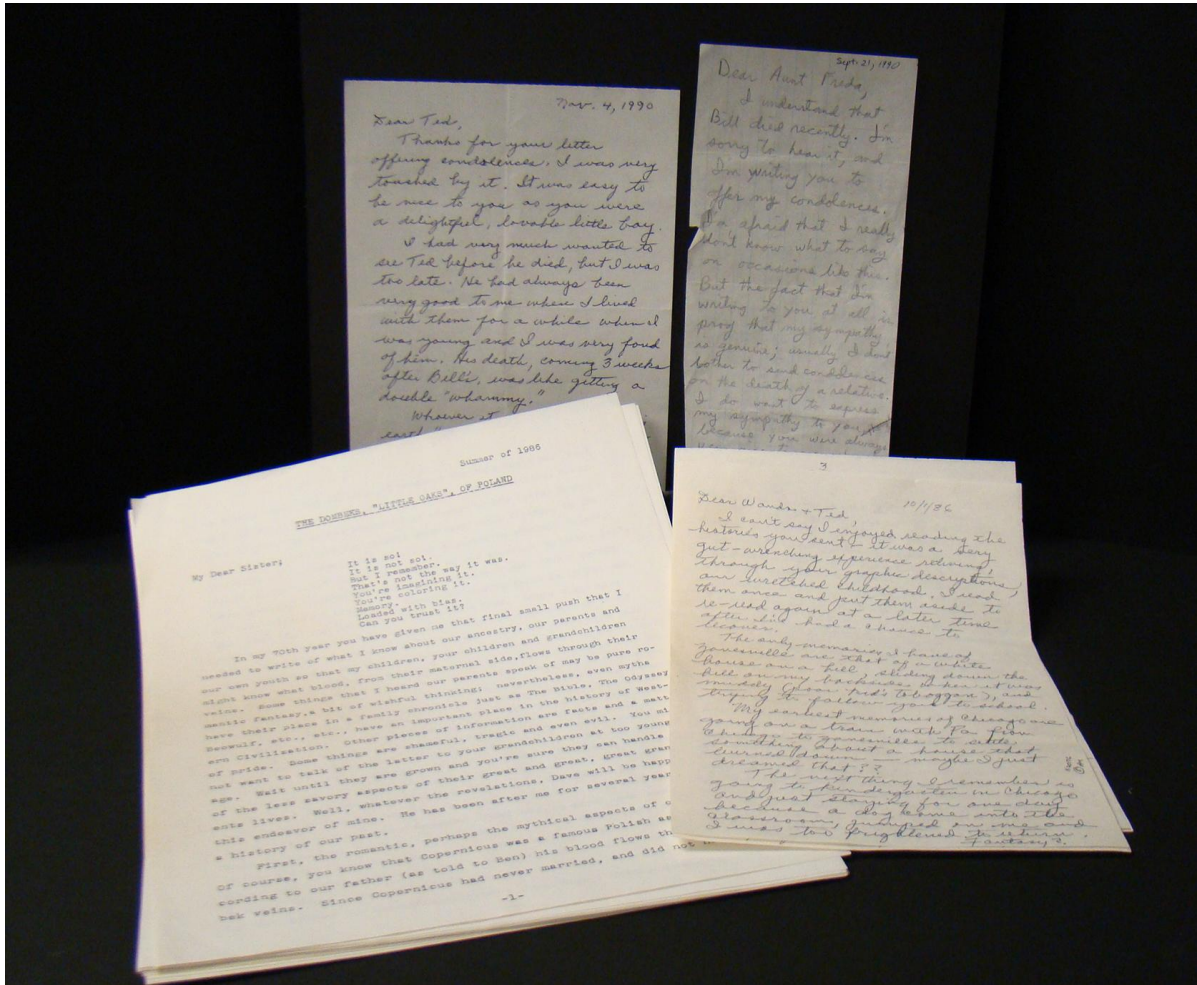

Lot 19

20. Letters to and From Aunt Freda

One lot to consist of letters to and from aunt Frieda. These four letters contain detailed information about the family of Kaczynski's mother, Wanda.

Final Bid: 901 USD

Bidders: 12

21. Letters to and From Juan Sanchez

One lot to consist of letters to and from Juan Sanchez. Kaczynski kept detailed written accounts of his UNABOM and other criminal activities. They were stored in handwritten journals in his Montana cabin. To reduce the chance his identity as the Unabomber might be discovered by a burglar who read the journals, Kaczynski

taught himself Spanish and wrote much of his most incriminating journal entries in that language. Juan Sanchez brother David. David was aware of Kaczynski's interest in learning Spanish, though not the reason. Kaczynski arranged through David to correspond with Sanchez, so Kaczynski could practice his Spanish with a native speaker. Kaczynski kept around 60 of the letters.

Final Bid: 1,008 USD

Bidders: 13

22. Stamps and Office Supplies

One lot to consist of stamps and supplies. Kaczynski segregated his UNABOM supplies from his other belongings and handled them so as to minimize his risk of being identified and apprehended. For example he purchased postage stamps from cities outside Lincoln, Montana, wore disguises while buying the stamps, and always handled the stamps with gloves or tools so as to leave no fingerprints. Once inside his cabin Kaczynski kept the stamps in envelopes with notations as to their origins and measure taken to keep them safe for UNABOM use.

Final Bid: 1,699 USD

Bidders: 8

23. Hoodie and Sunglasses

Kaczynski used different methods to disguise his identity when he traveled to commit UNABOM crimes. He maintained several different pairs of sunglasses. Included among the sunglasses were these, strongly resembling those believed to have been worn by Kaczynski when he was seen in February of 1987 in Salt Lake City as he committed a UNABOM crime. A subsequent artist drawing based on the memory of the witness resulted in the infamous sketch of the mysterious Unabomber wearing a gray hooded sweatshirt and aviator sunglasses. This was the only time during all of the UNABOM crimes that the subject was ever seen. The artist drawing became a universal symbol of the hunt for the UNABOMBER and has been circulated worldwide.

Final Bid: 20,025 USD

Bidders: 19

24. Bible (King James Version)

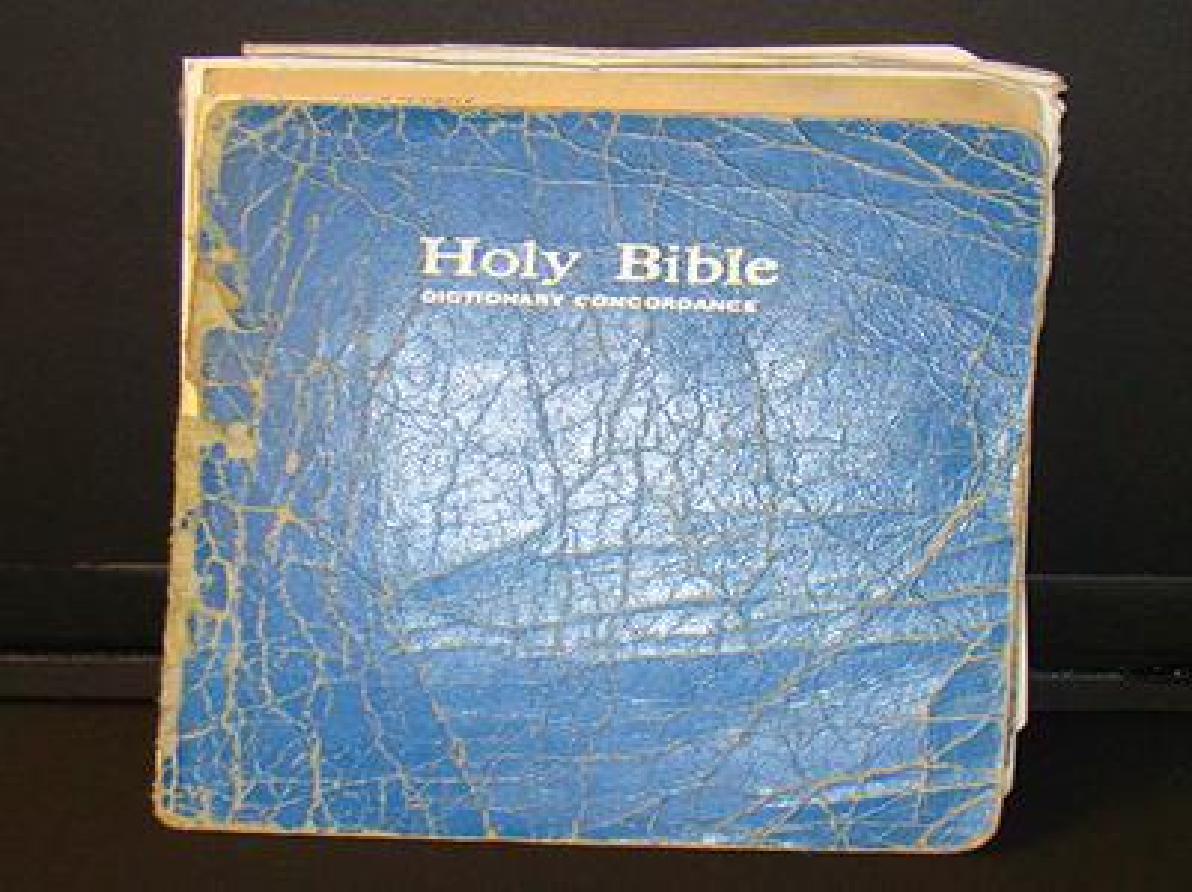

A Medium-sized Blue Bible (King James Version). This King James Version of the Holy Bible Contains Passages Underlined With Blue Pen.

25. Various Newspapers and Clippings

One lot to consist of various newspapers and clippings. A main theme in Kaczynski's UNABOM writings was his disdain for scientific and technological progress and its negative impact on human society and the natural world. This variety of articles reflecting Kaczynski's research appears to focus on such themes.

Final Bid: 453 USD

Bidders: 6

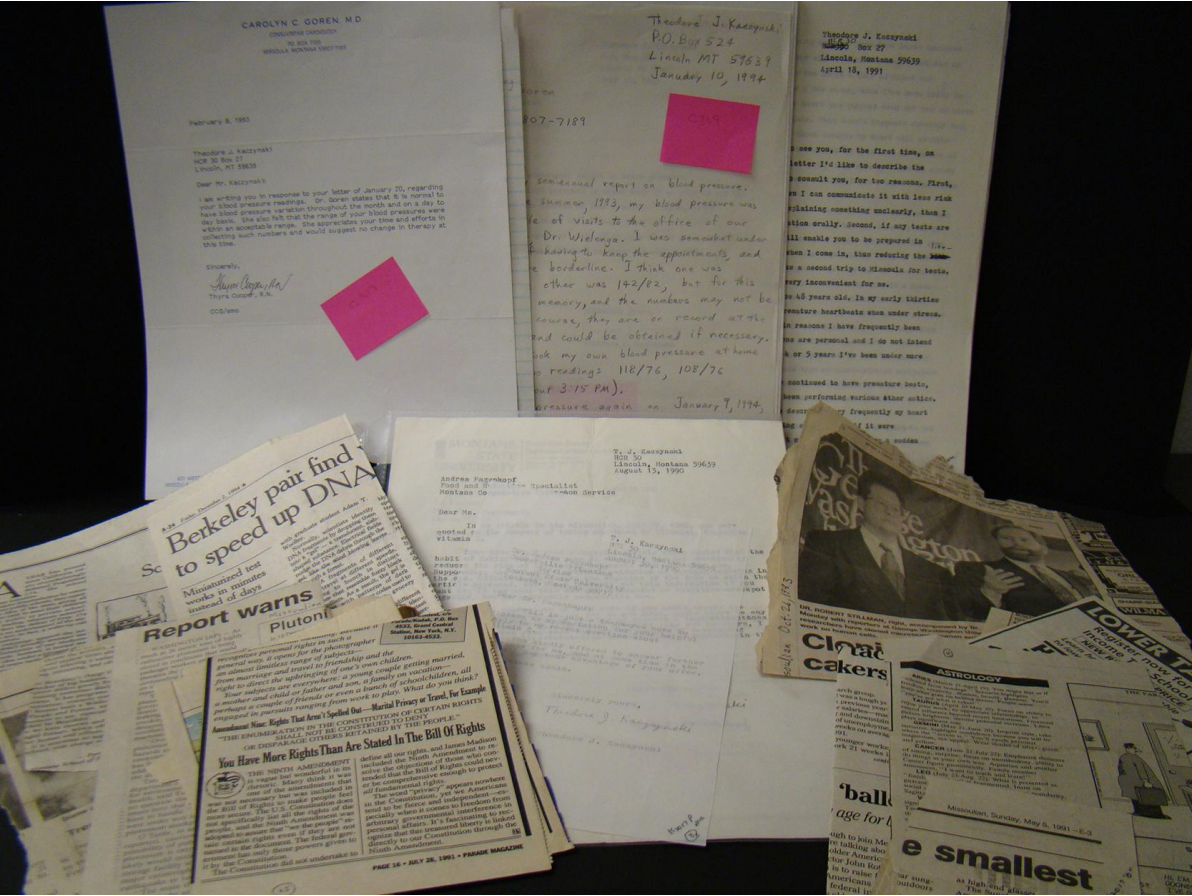

26. Personal Notes

One lot to consist of the following:

Spanish notes on note cards:

Kaczynski maintained note cards on a variety of topics. Some of his note cards were written in English and some were written in Spanish. These note cards are in Kaczynski's handwriting.

Handwritten list of wild foods he ate and various notes on food he ate:

Kaczynski survived in the wilderness by enhancing his knowledge of the plants and animals surrounding him. These original handwritten lists of wild foods he ate and various notes he maintained on that food reflect his wilderness survival skills and interests.

Drawings of animals and people:

These drawings of animals and people were among items taken during the search of Kaczynski's Montana cabin.

Final Bid: 5,873 USD

Bidders: 10

27. Yearbooks From Harvard

These Harvard yearbooks are reflective of Kaczynski's attendance at Harvard University.

Final Bid: 3,753 Usd

Bidders: 9

28. Brown Leather Empty Portfolio

One lot to consist of brown leather empty portfolio. This brown leather portfolio found in Kaczynski's cabin during the search was empty.

Final Bid: 533 Usd

Bidders: 13

29. Various Academic Research Articles

One lot to consist of various academic research articles. These academic research articles, some with notes handwritten by Kaczynski, concern mathematical calculations and bomb shelter construction. Included are notebooks found in Kaczynski's cabin which also discussed experiments he conducted to build functioning bombs. The pages showing how bombs can be made were redacted.

Final Bid: 2,004 USD

Bidders: 12

30. Coin Medallion

This coin medallion was found during the search of Kaczynski's Montana cabin.

Final Bid: 1,293 USD

Bidders: 11

31. Black and White Passport Photo

These black and white photos are dated March 27, 1971.

Final Bid: 703 USD

Bidders: 12

32. Miscellaneous Photos of Kaczynski

One lot to consist the following:

Color photos: these are personal photos of Kaczynski from Chicago and Montana dated 1968, 1970, and 1976.

One full length black and white photo: this is a photo of Kaczynski reading a newspaper during Christmas.

Final Bid: 1,203 Usd

Bidders: 14

33. Black and White Photos of TJK

These are two identical pictures of Kaczynski standing.

34. Color Photos

These photos are of Theodore Kaczynski in 1982 and his brother David.

Final Bid: 553 USD

Bidders: 10

35. Color Photos

These pictures are of David Kaczynski's cabin at Terlingua ranch in Texas in 1987. David always looked up to his older brother, they were close as children. They lived in Montana together in the early 1970's, visited each other after that, and corresponded into the late 1980's. Like Theodore Kaczynski, David acquired a remote cabin, though David's cabin was in Texas and he lived in it only sporadically.

Final Bid: 403 USD

Bidders: 7

36. Color Photos Dated 1976 and 1978

An individual picture of Theodore Kaczynski and another with Theodore, his brother David and their father.

Final Bid: 952 USD

Bidders: 15

37. Various Newspaper Clippings

Various newspaper clippings discussing Unabomber activities.

Final Bid: 725 USD

Bidders: 4

38. Tax Forms and Receipts

Tax forms, receipts and documents. Included in this lot is correspondence between Kaczynski and the Lewis and Clark county treasurer's office.

Final Bid: 438 USD

Bidders: 8

Lot 36

39. Mathematical Journals

Mathematical journals and two newspaper letters to the editor all written by Kaczynski. This lot contains two letters, one concerns "Runaway technology," a theme which would become prominent in later UNABOM writings. The other discusses land development and human societal impact on Alaska.

Final Bid: 1,231 USD

Bidders: 13

40. Letters to and From TJK

Letters to and from TJK and professors at university of Wisconsin-Milwaukee, university of California-Santa Barbara, and Michigan state university: this lot includes Kaczynski's handwritten notes and translations, as well correspondence between Kaczynski and various university professors. Translated stories from Spanish writer Juan Davalos, Horacio Quiroga, Javier de Viana and story titled "The addict" unknown author in personal handwriting.

Final Bid: 1,263 USD

Bidders: 15

41. Academic Journals

One lot to consist of the following academic journals. "Boundary functions for functions defined in a disk"; this is an article published by Kaczynski in the journal of mathematics and mechanics vol 14, no 4, July 1965. "The set of curvilinear convergence of a continuous function defined in the interior of a cube": this is an article published by Kaczynski in the American mathematical society vol. 23, no 2, November 1969. "The set of curvilinear convergence of a continuous function defined in the interior of a cube": this is an article published by Kaczynski in the American mathematical society vol. 23, no 2, November 1969. "On a boundary property of continuous functions": this is an article published by Kaczynski in the Michigan mathematical journal vol. 13, 1969. "Boundary functions for bounded harmonic functions: this is an article published by Kaczynski in transactions of the American mathematical society volume 137 march, 1969. "Boundary functions and sets of curvilinear convergence for continuous functions": this is an article published by Kaczynski in transactions of the American mathematical society volume 137 March, 1969.

Final Bid: 1,302 USD

Bidders: 11

42.

43.

44.

45.

46.

47. Measuring Instrument and Hand Tools

One lot to consist of measuring instrument, small hand tools and miscellaneous metal parts to include screws and bolts.

These small hand tools were removed from Kaczynski's cabin during the search.

This was one of Kaczynski's home-made "tool kits." Kaczynski kept small tools in several make-shift containers, including tools in the Tide box.

Kaczynski's construction of UNABOM explosive devices was all done by hand, without assistance of power tools, and using where possible wood and metal scraps obtained from trash. He went to great lengths to create necessary parts himself, with the general exception of screws and nails. He cast some metal parts (including aluminum) by melting metal scraps on his cabin's wood burning stove. Parts he had to purchase, Kaczynski took pains to buy far away from home, sometimes while wearing disguises. He also made some of his own hand tools. These efforts were detailed in his writings.

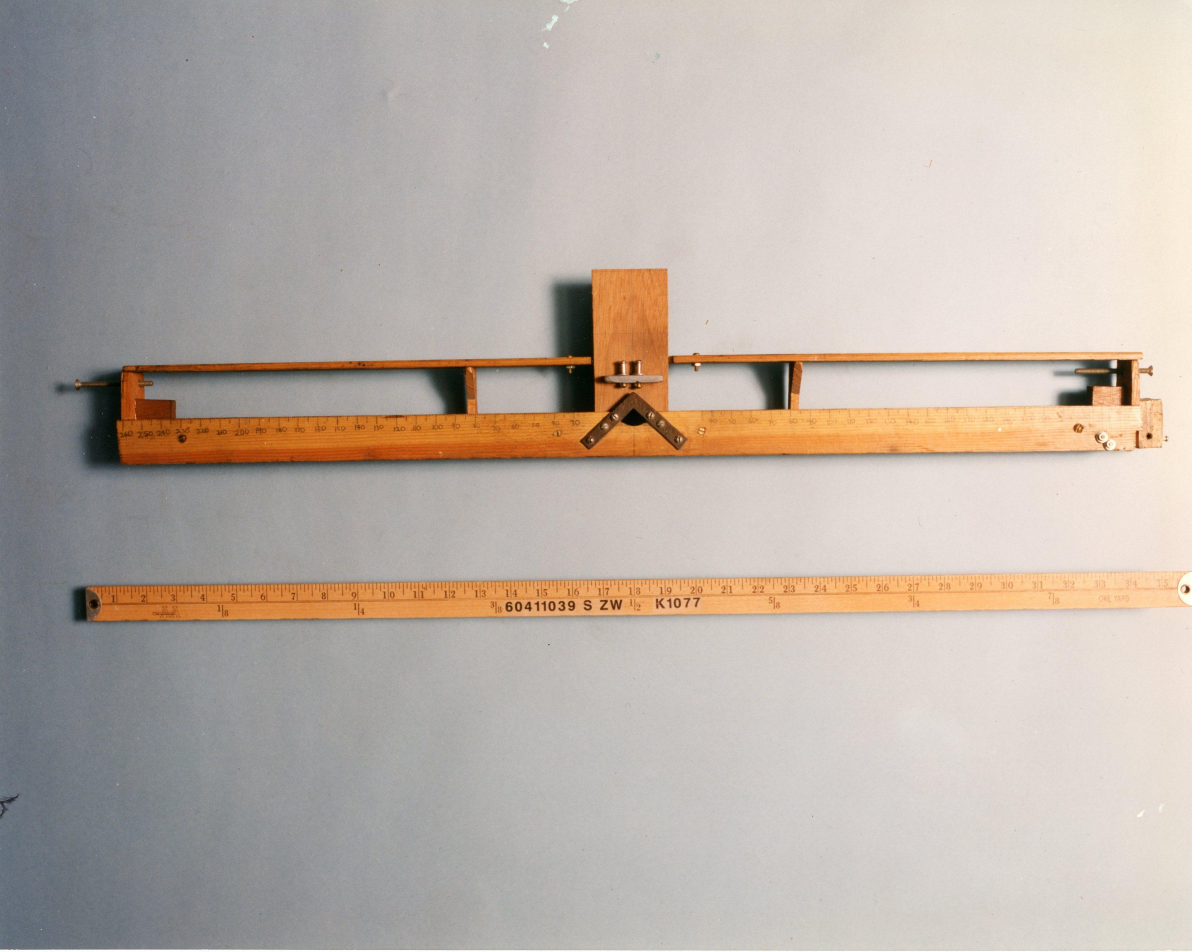

Final Bid: 2,603 USD

Bidders: 12

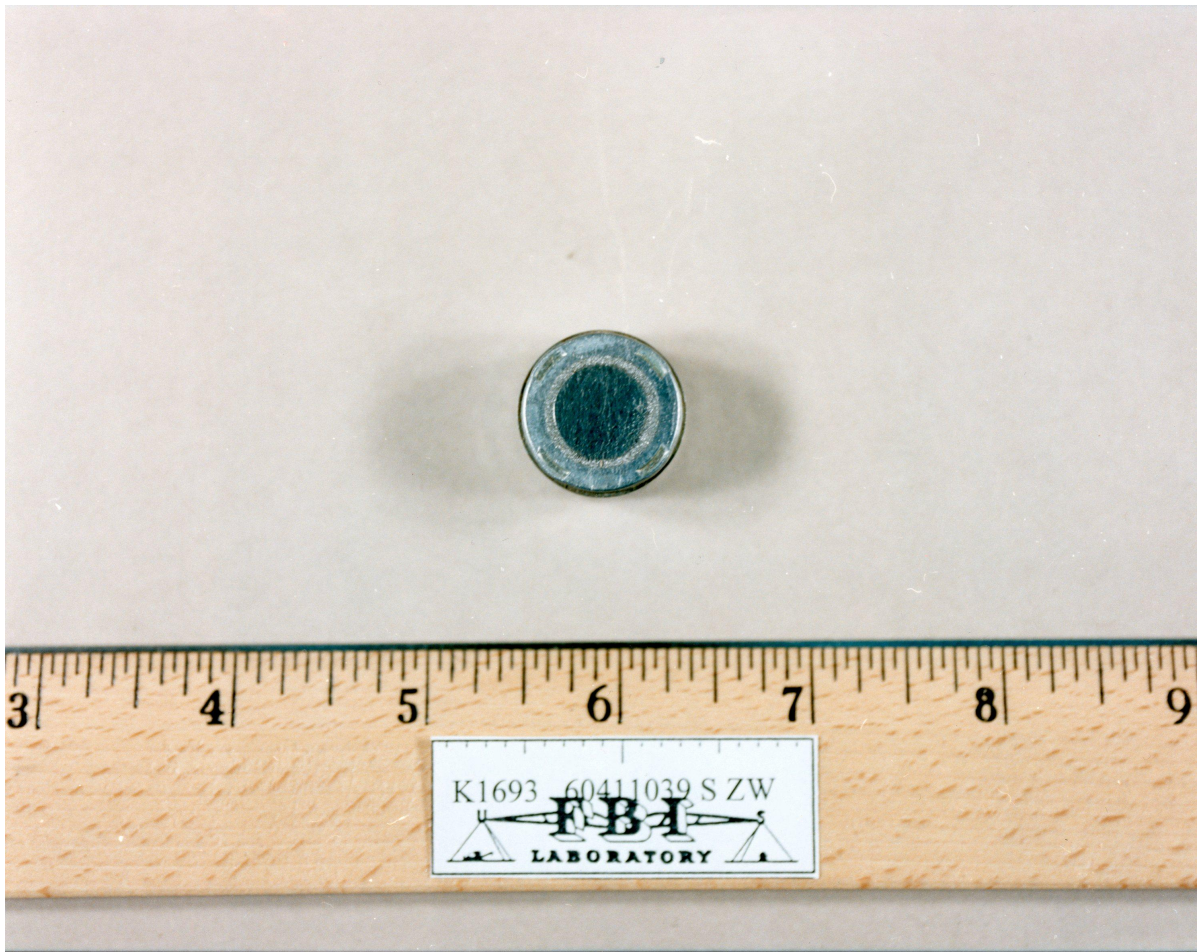

48. Hatchet and Small Handheld Knives

One lot to consist of hatchet, small handheld knives, blades, scissors, wooden handle hammer, one long handled knife, saw blades, hand drill, pair of pliers, wood shaver, pipes and cordage, tools in tide box, "Great neck #50" hacksaw, clamp. Metal file, and red vice.

Kaczynski's construction of UNABOM explosive devices was all done by hand, without assistance of power tools, and using where possible wood and metal scraps obtained

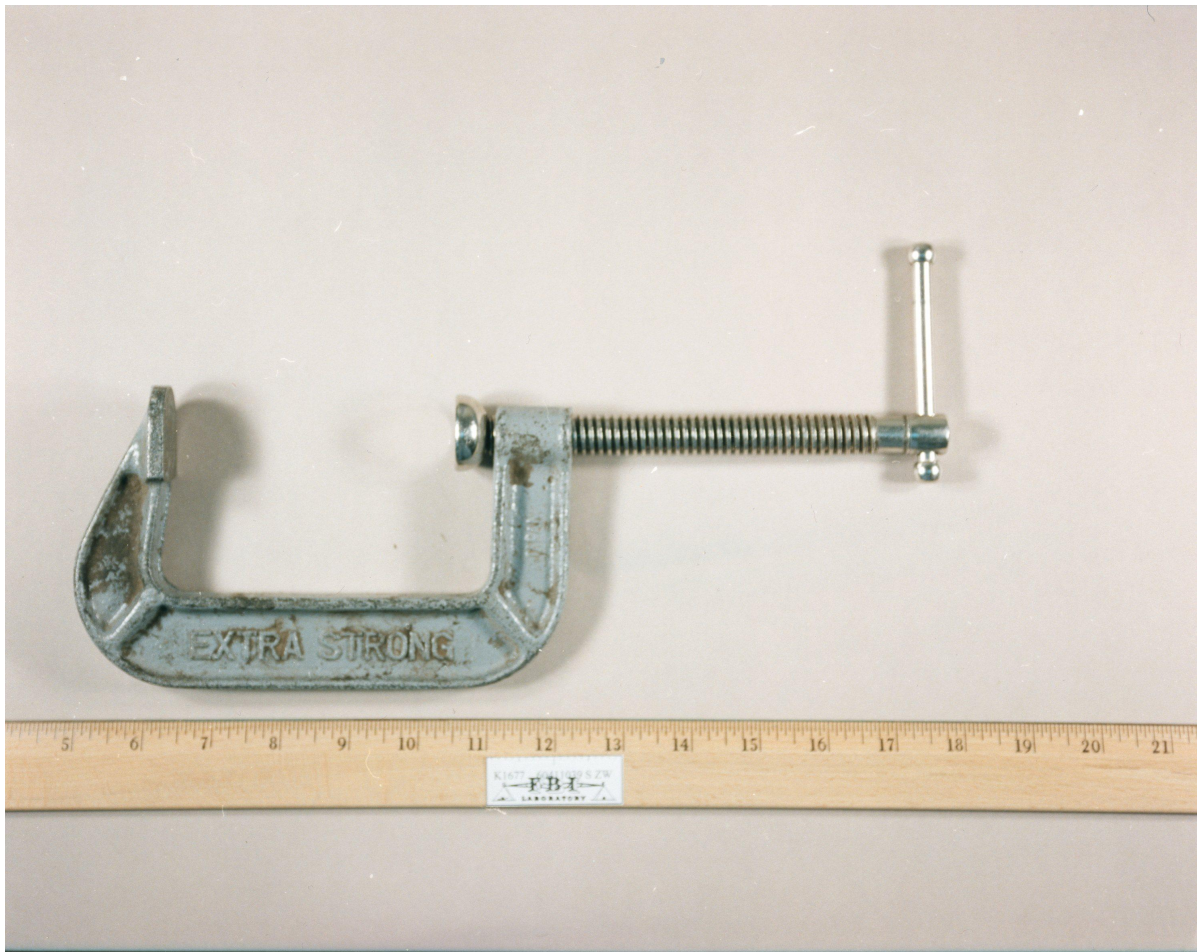

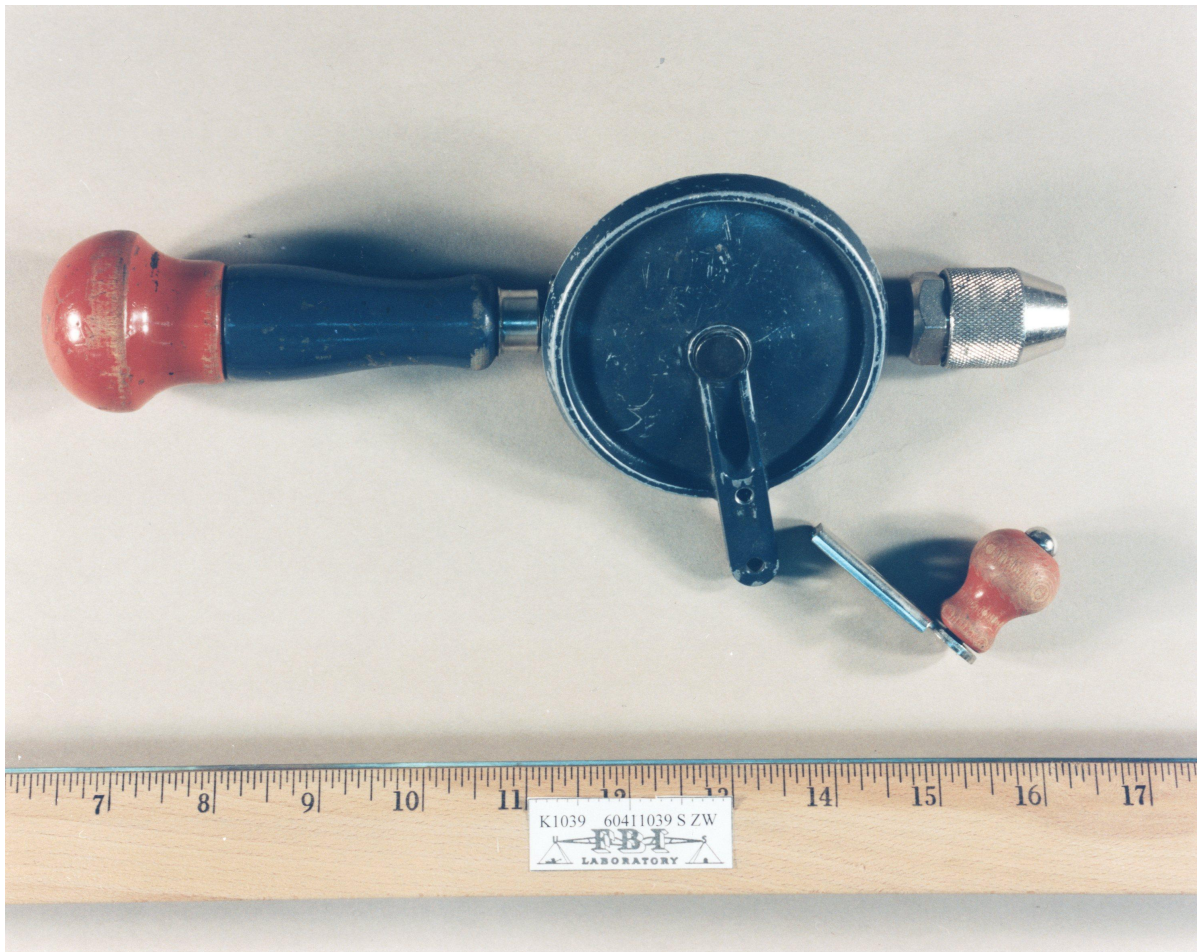

from trash. He went to great lengths to create necessary parts himself, with the general exception of screws and nails. He cast some metal parts (including aluminum) by melting metal scraps on his cabin's wood burning stove. Parts he had to purchase, Kaczynski took pains to buy far away from home, sometimes while wearing disguises. He also made some of his own hand tools. These efforts were detailed in his writings.

These items supported Kaczynski's daily life in the wilderness cabin. Many of the internal parts and containers for UNABOM explosive devices were constructed from wood. Considerable effort was expended by the UNABOM task force to determine if the types of wood could point toward the unabomber's location or if there were some behavioral significance to his choice of wood used in his devices.

Final Bid: 1,662 USD

Bidders: 19

49. Miscellaneous Clothing

One lot to consist of blue zippered sweatshirt, poncho, hats and sweaters, blue hood, and old towel. Kaczynski maintained a variety of clothing items that supported his life in the Montana wilderness. Most were very functional, warm and durable and perfect for the rugged mountainous surrounding, the clothing items could also be used as disguises on Kaczynski's travels to deliver his deadly bombs.

Final Bid: 408 USD

Bidders: 9

50. Bows and Arrows in Sears Box

One lot to consist of bows and arrows in "Sears box."

Kaczynski hunted animals for food in the mountain wilderness. This collection of bows and arrows was his lifeline if he was to stay fit and fed.

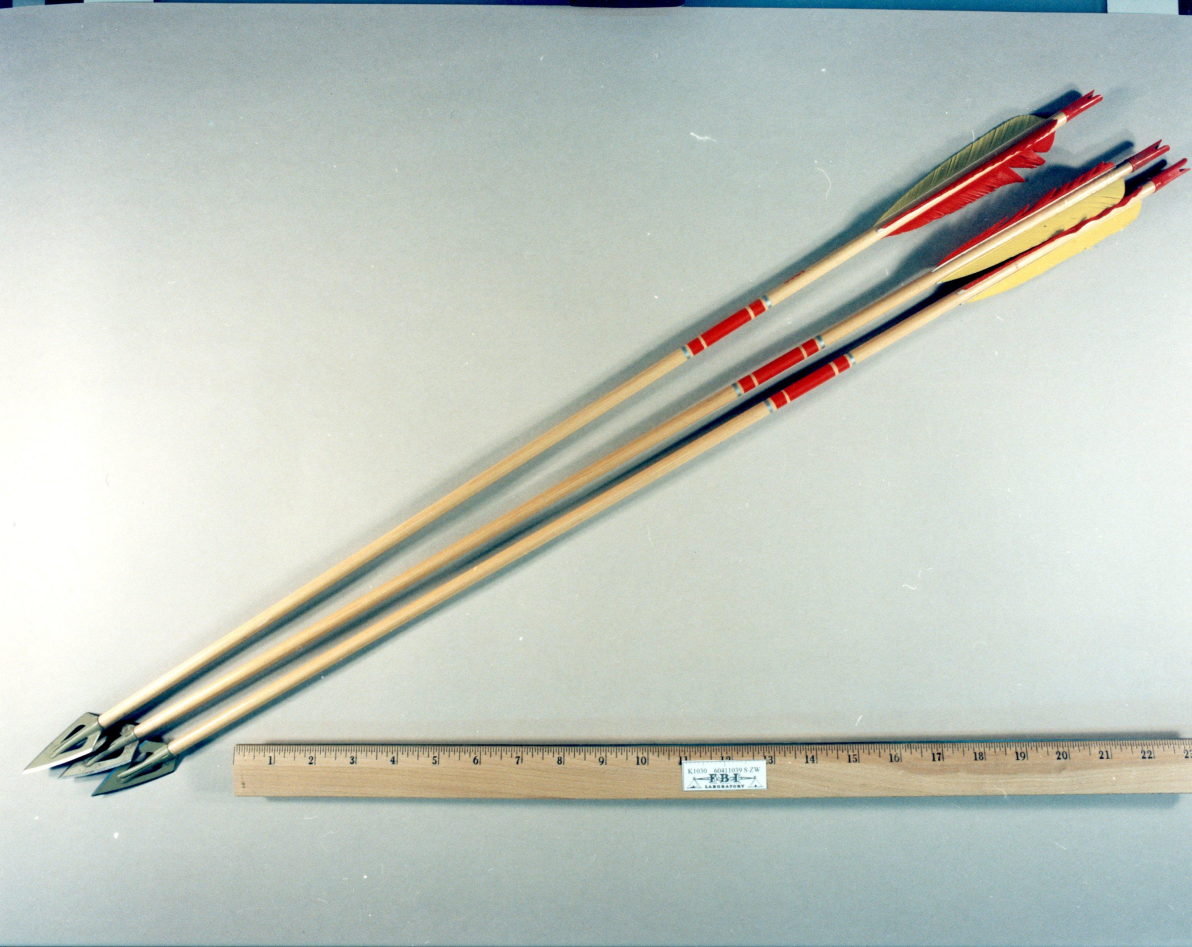

Final Bid: 810 USD

Bidders: 12

51. Books From Private Library

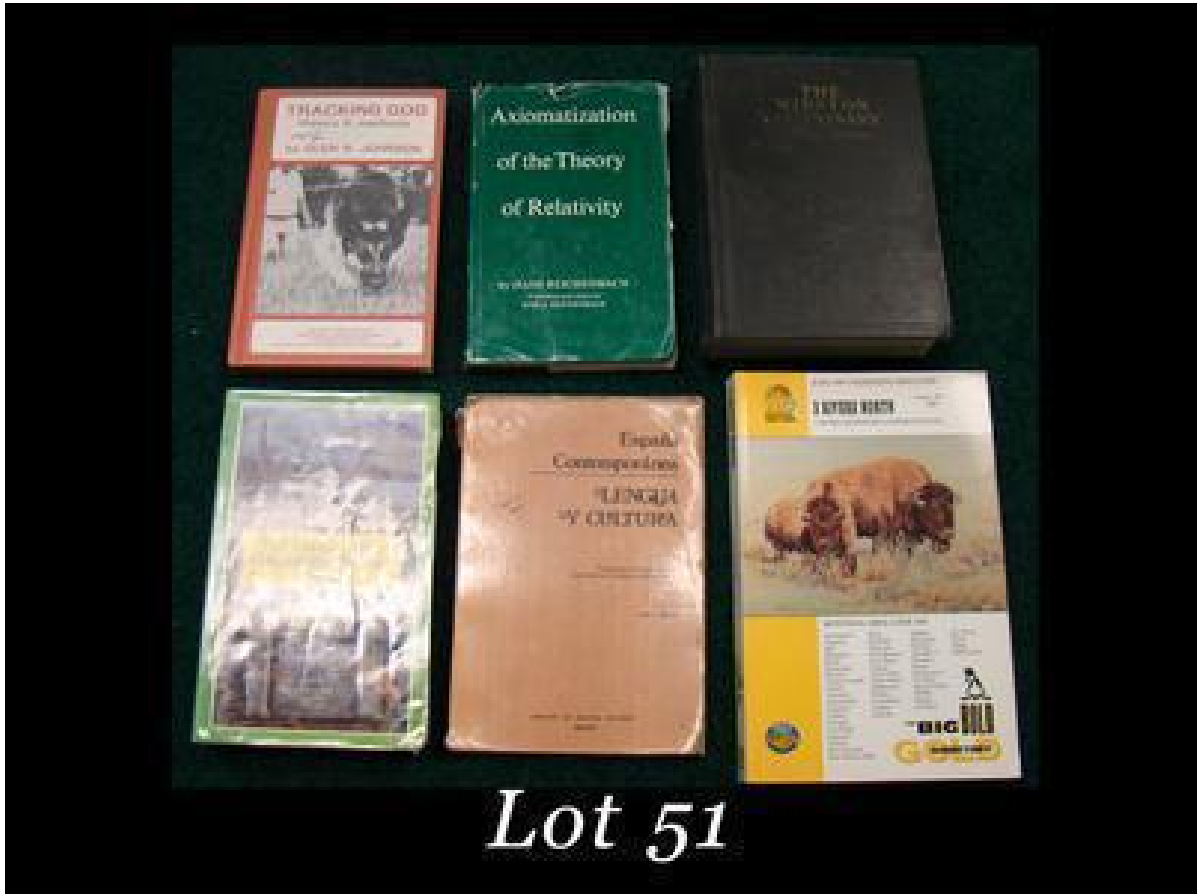

One lot to consist of books from Kaczynski's private library. Kaczynski had a vast library in his cabin. World history, nature, mathematics and science, languages and works of fiction accounted for many of the titles. Included was a copy of Joseph Conrad's "The Secret Agent", a fictional story of a serial bomber.

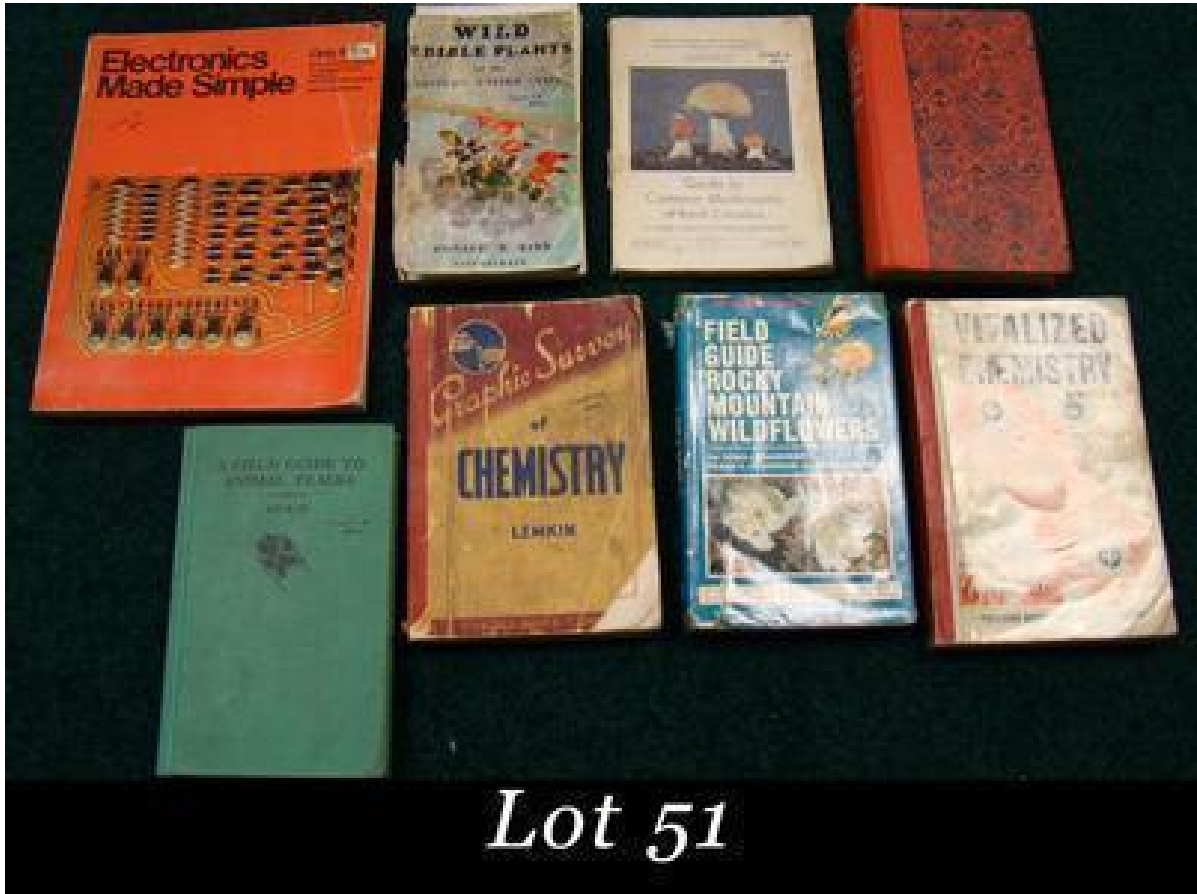

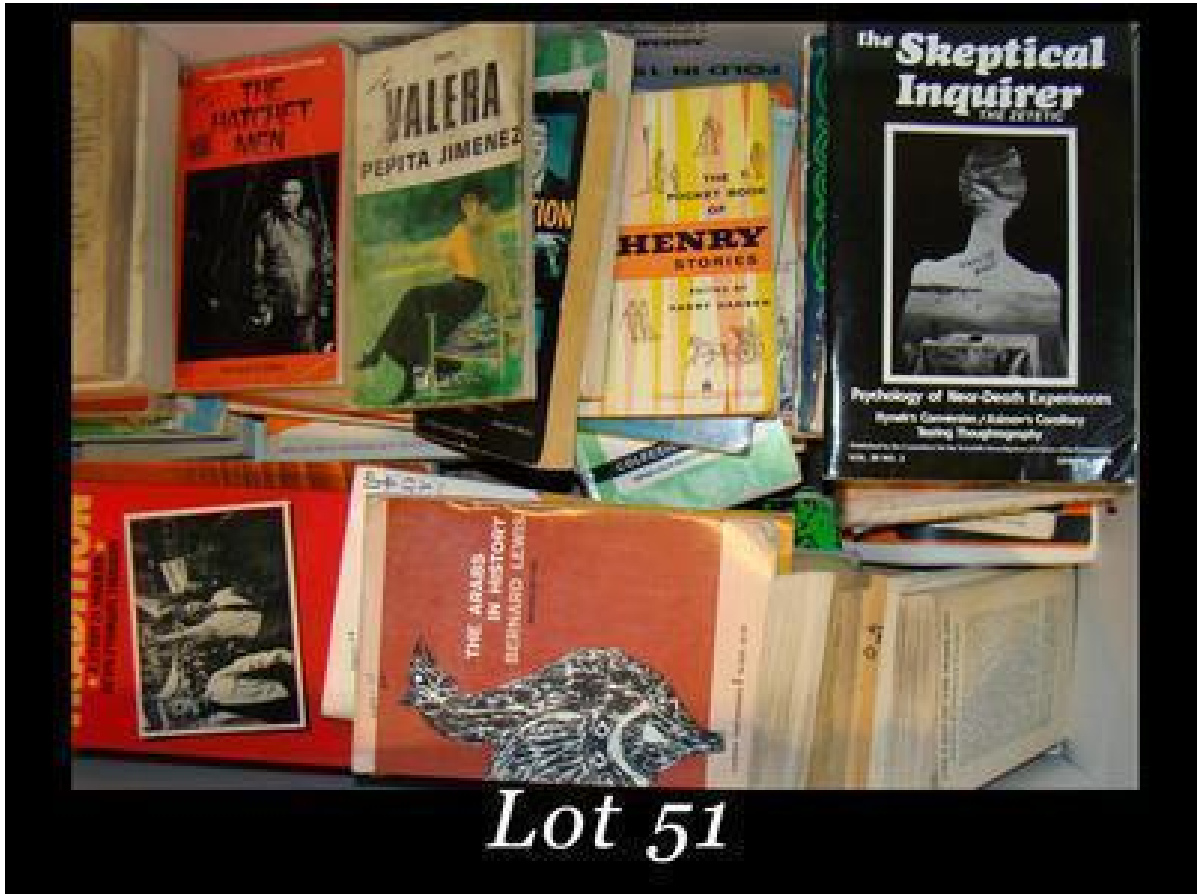

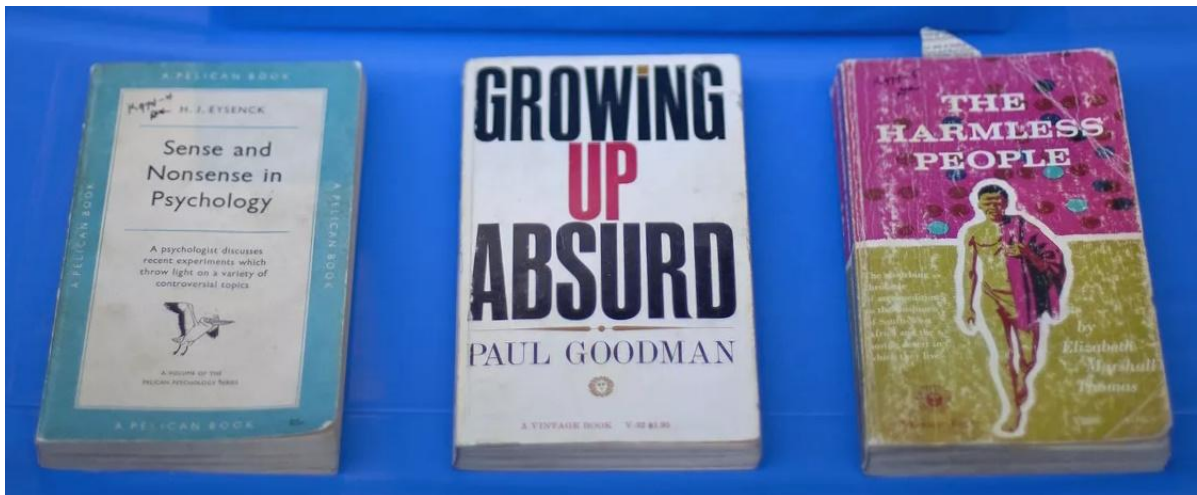

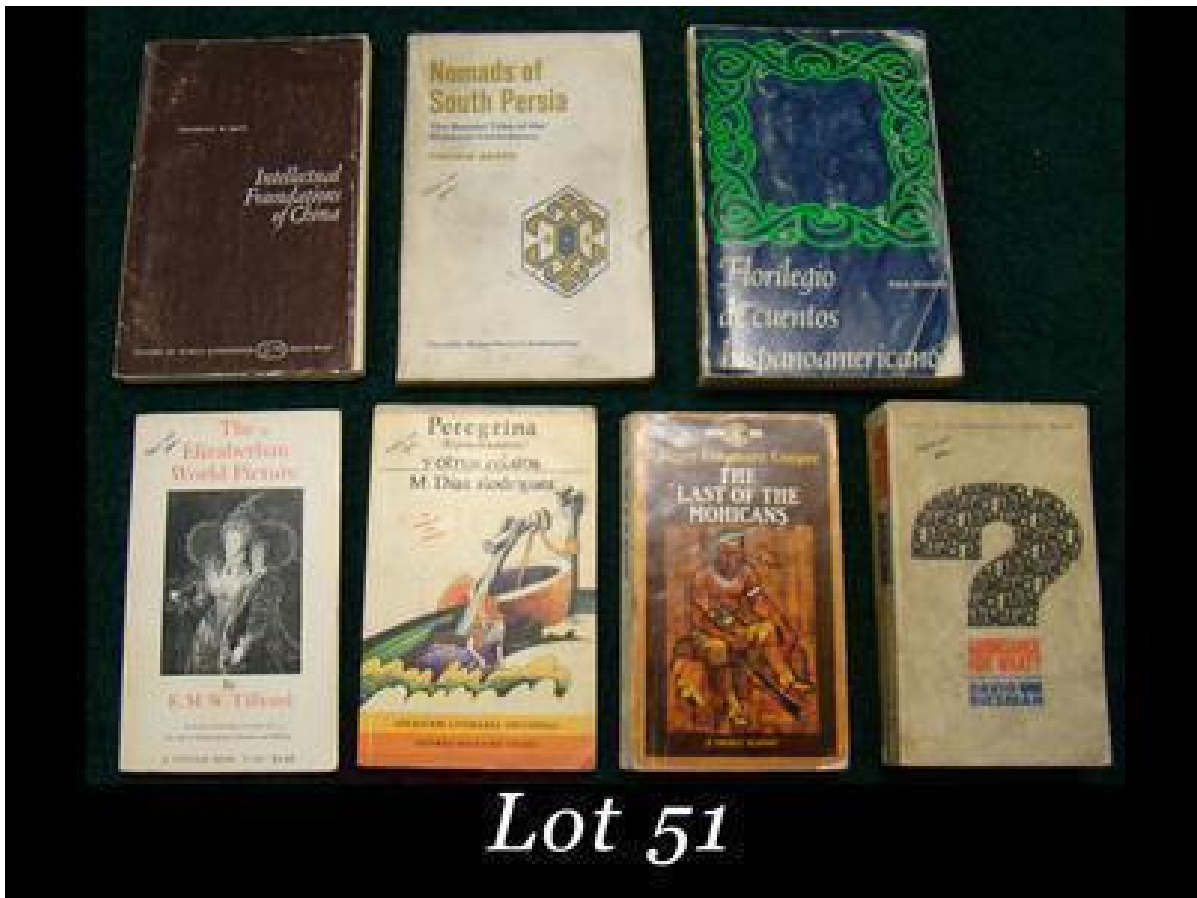

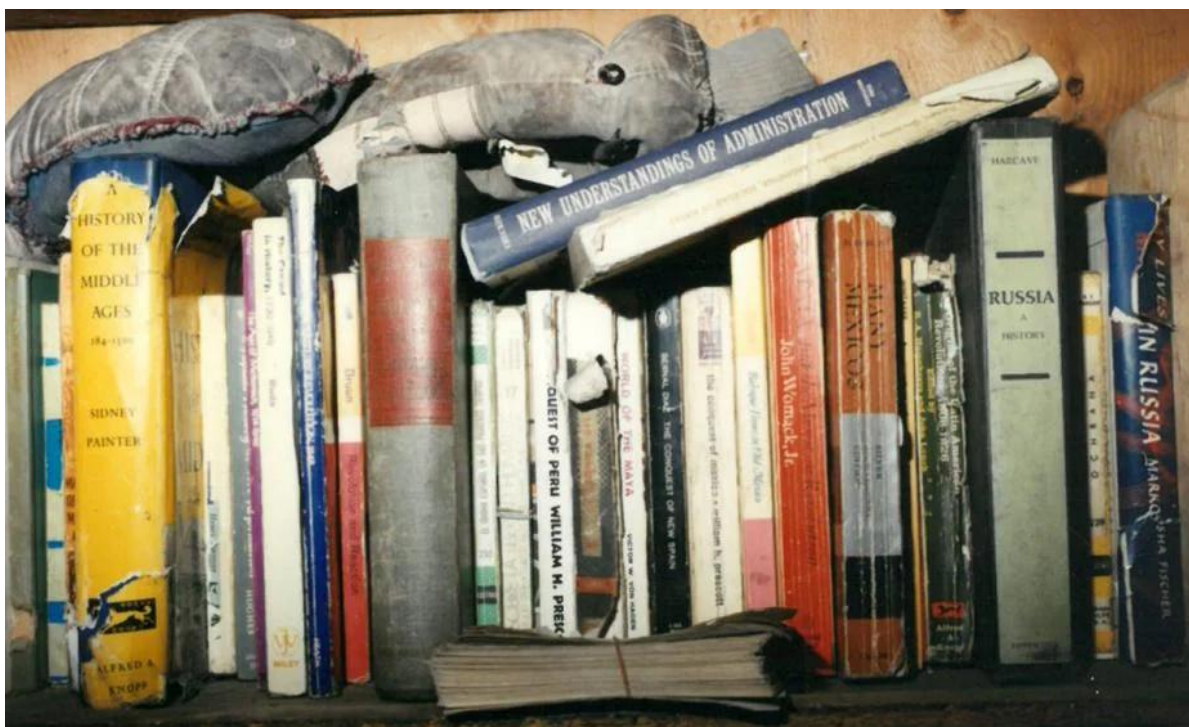

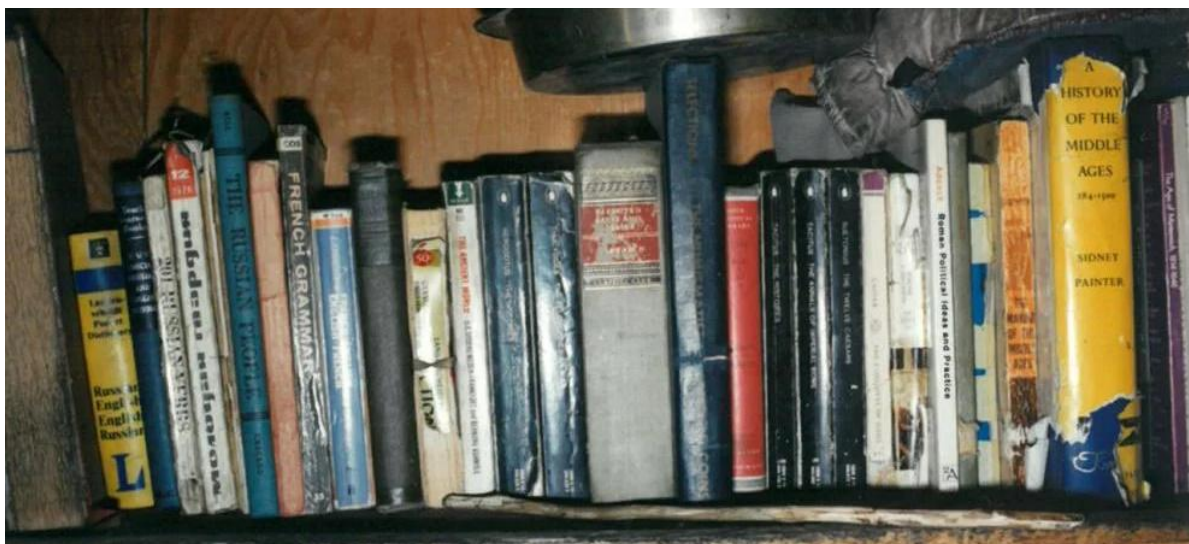

Lot 51

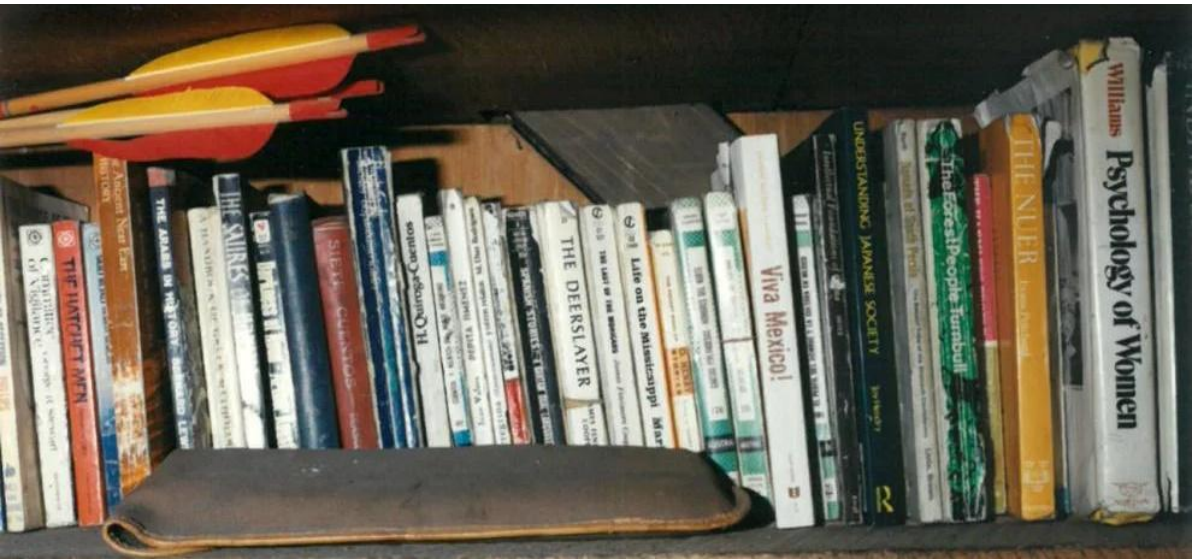

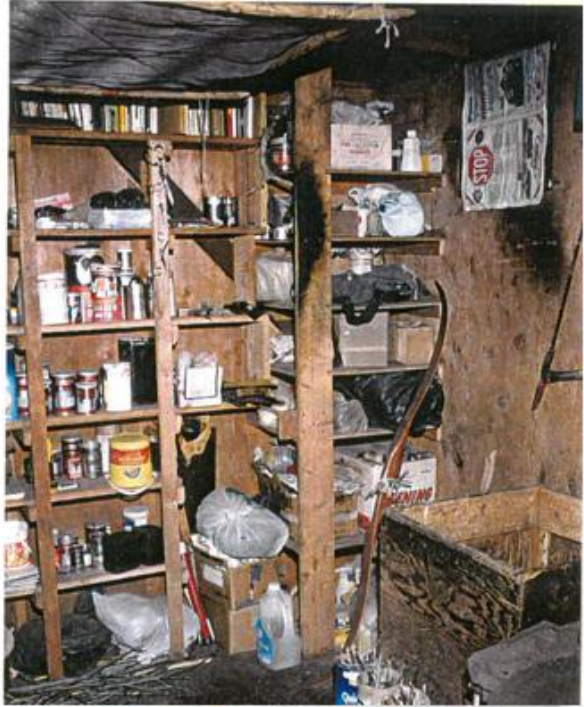

Lot 51

For a full list of the books found in his cabin see here: [Ted's Reading Interests & Influences](#)

Final Bid: 3,001 USD

Bidders: 7

52. Hanson Model 1509 Scale

Kaczynski's construction of UNABOM explosive devices was all done by hand, without assistance of power tools, and using where possible wood and metal scraps obtained from trash. He went to great lengths to create necessary parts himself, with the general exception of screws and nails. He cast some metal parts (including aluminum) by melting metal scraps on his cabin's wood burning stove. Parts he had to purchase, Kaczynski took pains to buy far away from home, sometimes while wearing disguises. He also made some of his own hand tools. These efforts were detailed in his writings.

Final Bid: 550 USD

Bidders: 10

53. Typewriters

Typewriter with brown case and typewriter in Gray case. These typewriters were found during the search of Kaczynski's Montana cabin. They were not used to type the UNABOM manifesto.

Final Bid: 3,603 USD

Bidders: 17

54. Long Black Knife

This long black knife was one of several Kaczynski had in his cabin. Kaczynski's construction of UNABOM explosive devices was all done by hand, without assistance of power tools, and using where possible wood and metal scraps obtained from trash. He went to great lengths to create necessary parts himself, with the general exception of screws and nails. He cast some metal parts (including aluminum) by melting metal

scraps on his cabin's wood burning stove. Parts he had to purchase, Kaczynski took pains to buy far away from home, sometimes while wearing disguises. He also made some of his own hand tools. These efforts were detailed in his writings.

Final Bid: 3,060 USD

Bidders: 11

55. Silvertone Watch, Radio, Glasses

The watch radio, and safety glasses found during the search illustrated Kaczynski's only technological contact with the outside world—a watch that told time and a radio that brought the news. The safety glasses were as close a thing to health insurance as Kaczynski had to prevent him from injuring his eyes during his construction work.

Final Bid: 3,503 Usd

Bidders: 12

56. Hand Bowed Wood Saw

The hand bowed saw was among Kaczynski's collection of saws found during the cabin search. Kaczynski's construction of UNABOM explosive devices was all done by hand, without assistance of power tools, and using where possible wood and metal scraps obtained from trash. He went to great length to create necessary parts himself, with the general exception of screws and nails. He cast some metal parts (including aluminum) by melting metal scraps on his cabin's wood burning stove. Parts he had to purchase, Kaczynski took pains to buy far away from home, sometimes while wearing disguises. He also made some of his own hand tools. These efforts were detailed in his writings.

Final Bid: 513 USD

Bidders: 11

57.

58.

59. Miscellaneous Clothing

One lot to consist of navy blue jacket, pants, green hooded jacket, black jacket, pair of brown/green hiking shoes, green jacket, and gloves.

Kaczynski's clothing collection was somewhat limited and very functional, chosen to protect him from the elements of the Montana wilderness.

Kaczynski utilized gloves for a variety of purposes. He used gloves, sanding and chemical treatments to remove and avoid leaving fingerprints on his bomb components. He also wore clothes so as to not leave his fingerprints at the scene of acts of vandalism he committed throughout the years in various wilderness locations.

Final Bid: 6,503 USD

Bidders: 14

60.

61.

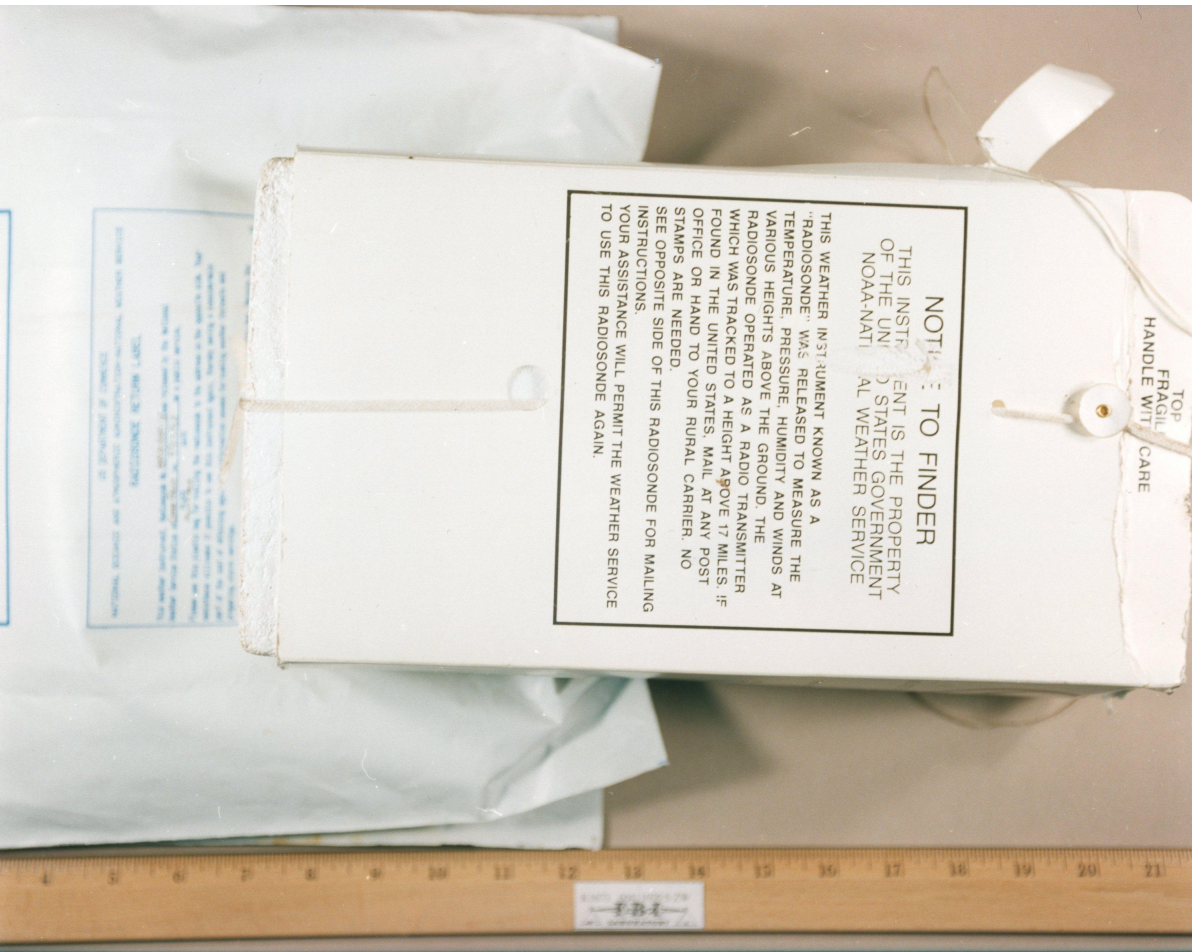

62.

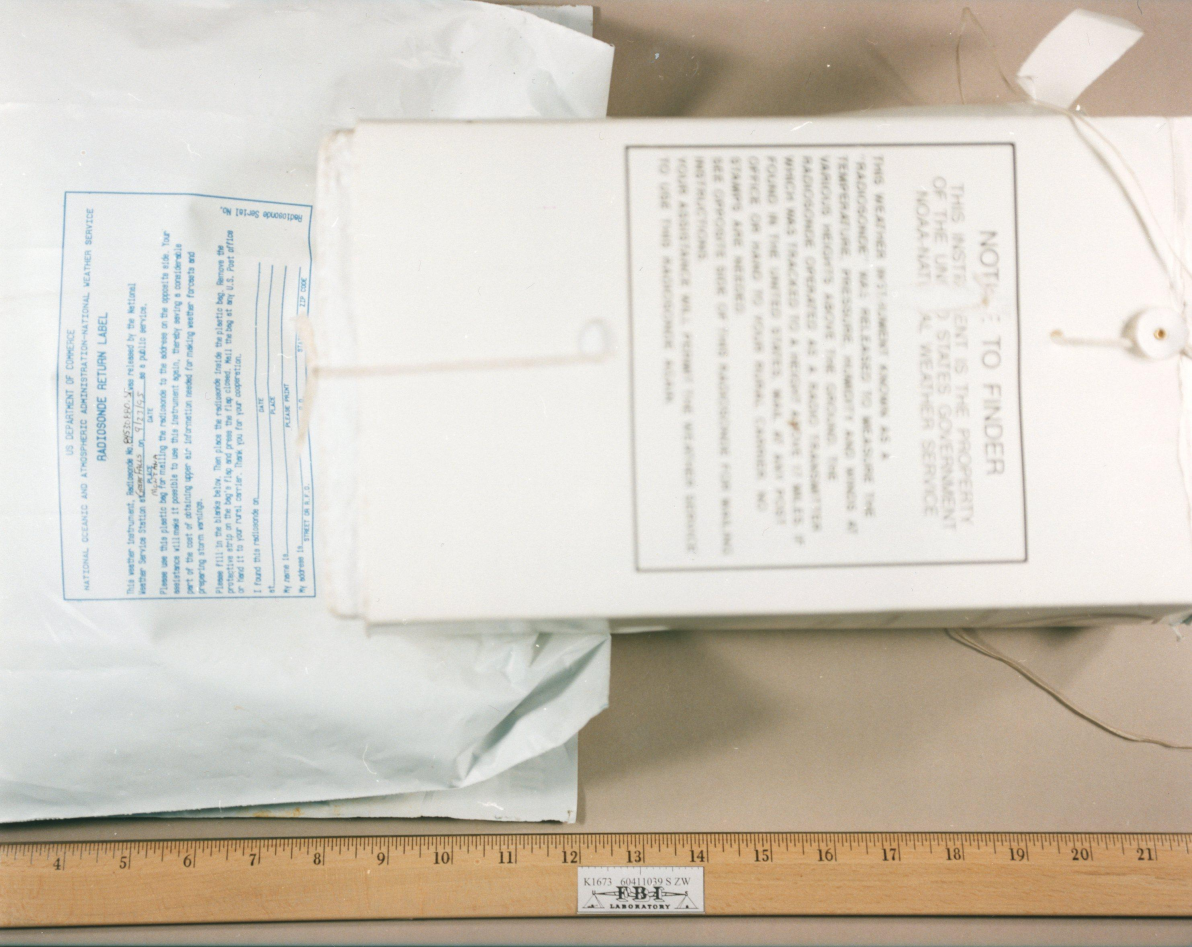

63. Radio Sonde

This lot contains a device dropped from an airplane to measure weather. Kaczynski apparently found it while hiking.

Final Bid: 333 USD

Bidders: 9

65.

66.

67.

68.

69.

70. Miscellaneous Bags

One lot to consist of tan duffel, black duffel, green canvas U.S. Army backpack, and blue backpack. These items were removed from Kaczynski's cabin during the search. The green canvas U.S. Backpack was frequently carried by Kaczynski on hikes in the mountains of Montana.

Final Bid: 607 USD

Bidders: 6

71. Letter to and From Various Groups

One lot to consist of various letters to and from various groups. Kaczynski actively corresponded with government agencies such as FEMA and nuclear regulatory agencies and advocacy groups regarding issues of concern to him, such as radiation exposure. This lot contains some of those handwritten and typed letters from Kaczynski.

Final Bid: 3,013 USD

Bidders: 9

72.

73.

74.

75. Samsonite Briefcase and Research

A black samsonite briefcase and copies of published research by Kaczynski. This black samsonite briefcase stored copies of Kaczynski's publications.

Final Bid: 825 Usd

Bidders: 6

76. Michigan and Harvard Diploma

One lot to consist of university of Michigan diploma doctor of philosophy in the name of TJK and university of Michigan diploma master of arts in the name of TJK. This was Kaczynski's doctor of philosophy diploma from the university of michigan. Years later, Kaczynski would send a mailed bomb to a university of michigan professor. This lot also includes one Harvard diploma.

Final Bid: 7,503 USD

Bidders: 22

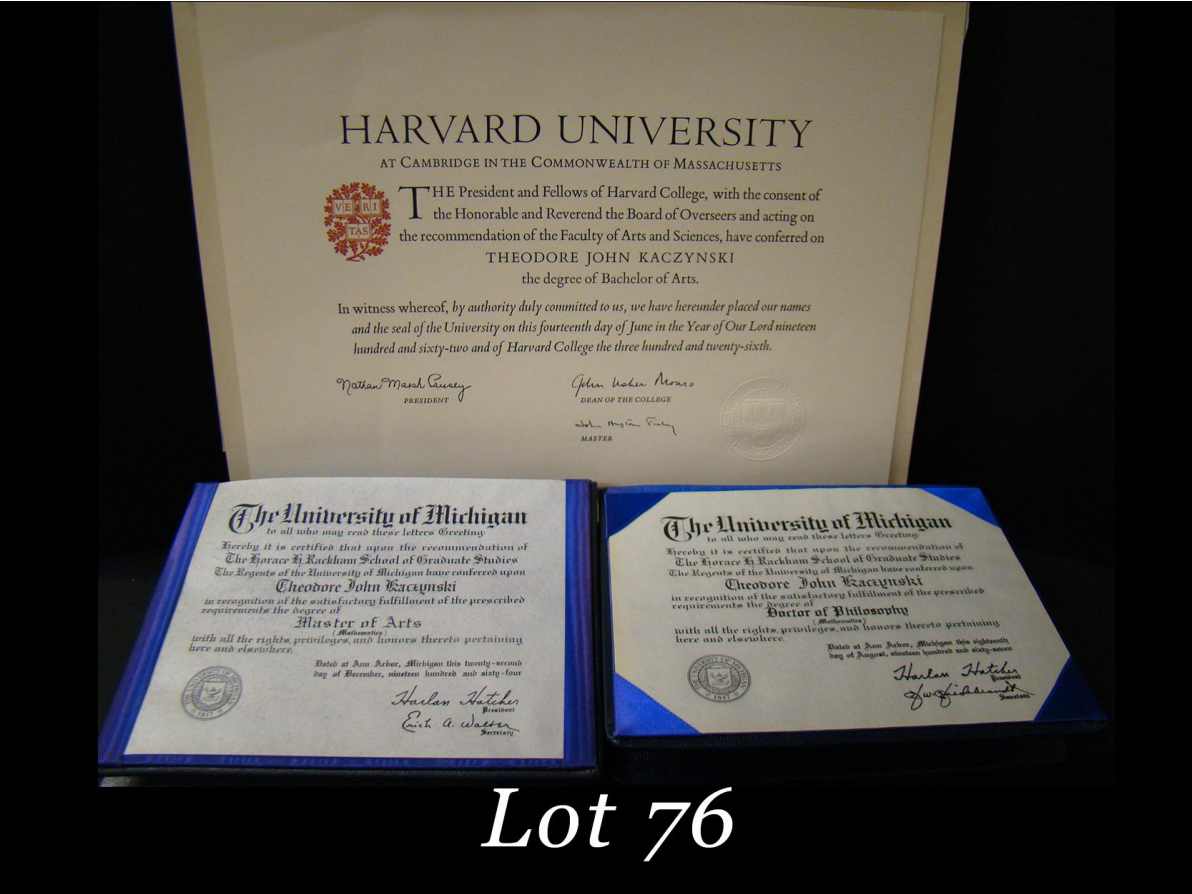

77.

78.

79.

80. Welding Mask and Deerskin Scabbard

One lot to consist of welding mask and deerskin scabbard. Kaczynski cast many of his own metal parts used in UNABOM explosive devices. To do this he melted scrap

Unabomb001

Description:

This is the L3 Smith-Corona portable manual typewriter that Kaczynski used to type most of his UNABOM documents, including the "UNABOM Manifesto." This typewriter was seized by the FBI during the search of his cabin in April 1996.

Unabomb01

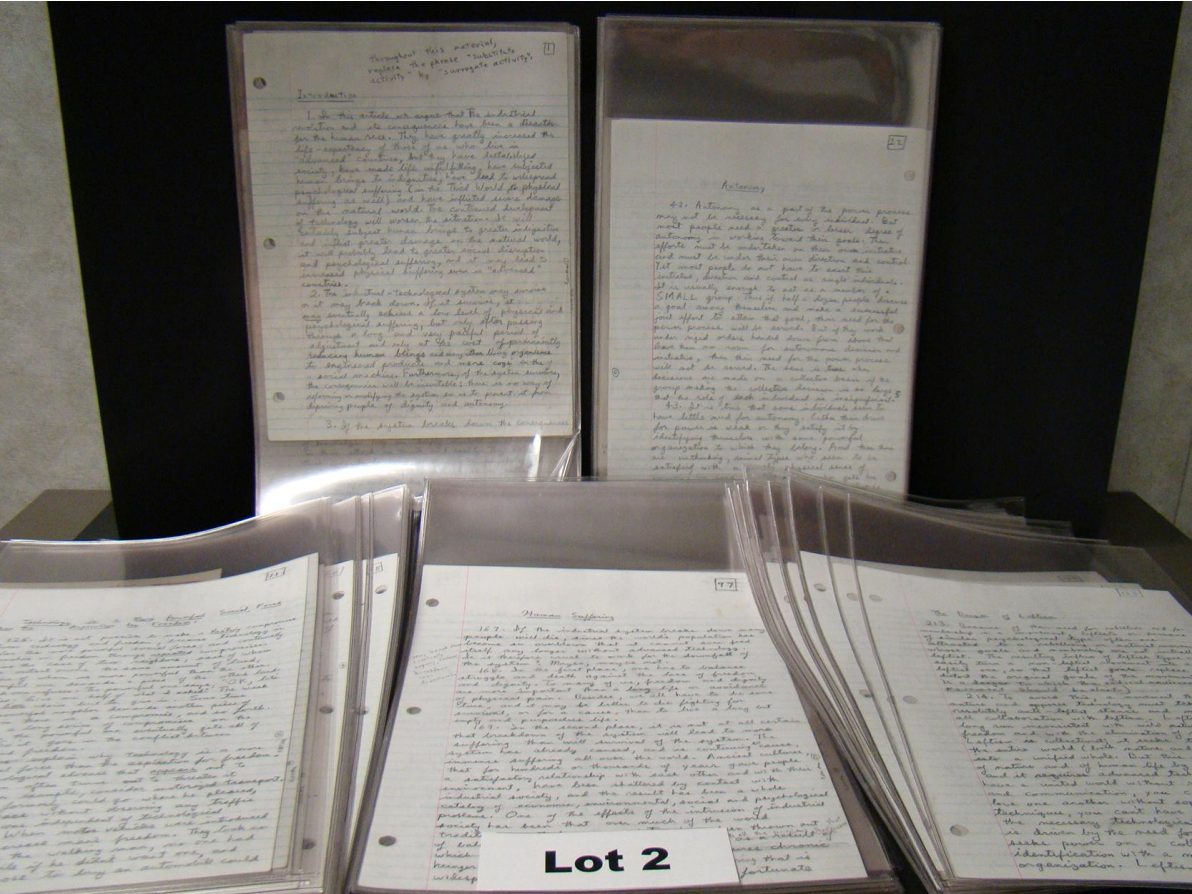

This is Kaczynski's typed version of the "Unabom Manifesto," which was ultimately published in 1995 in the Washington Post and New York Times.

Unabomb02

This is Kaczynski's handwritten rough draft of the "Unabom Manifesto," which was ultimately published in 1995 in the Washington Post and New York Times.

Unabomb03

Among all kinds of other observations about himself, in this document Kaczynski describes the circumstances, while he was a graduate student at the University of Michigan, he first realized that murdering others was at least a temporary cure for his general unhappiness. He shortly thereafter makes a considered decision to actually become a serial killer. He develops and implements a plan to learn necessary skills for both wilderness living and murder, culminating in the emergence of the "Unabomber" about 10 years later.

Lot 2

Autobiography PERIOD FROM AGE 16 - AGE 20

At age 16, in Fall 1939, I went to Harvard. I had had a particular enthusiasm for going there, but once I got there it was a tremendous thing for me to get something that I had been reading all along without knowing it, namely hard work regarding self-discipline and strenuous series of my studies. I then myself understood - I was under tremendous pressure and tension. But the time on recreation, I forced myself to keep studying long after I would have gone to sleep, I convinced myself, myself if I would get by for a month or 6 hours of sleep a night, I would overcome my slowness. I would flop down and sleep for maybe 10 solid hours. I soon fell however for the first 2 weeks at Harvard after that.

Feeling the strength of my own will, I became enthusiastic about to begin doing push-ups and other exercises on my own.

Under my high school math course, the calculus course, I took at Harvard paid a good deal of attention to the fine points of the logic underlying calculus. I learned a good deal about ideas about careful, analytical thinking.

In high school, getting in a course didn't mean much to me - it was just a matter of grinding out all the day-work.

At Harvard, I really had to exert myself to get in A, and that grade gave me a real sense of achievement. There was an atmosphere of excellence at Harvard. Of course, I had no respect

most were good men and women, but I had no respect for them. I always put my own standards first. I had a great deal of respect for the people who were really doing the work, but I had no respect for the people who were just going through the motions. I had a great deal of respect for the people who were really doing the work, but I had no respect for the people who were just going through the motions.

Unabomb04

These 20 handwritten notebooks describe in diary fashion Theodore Kaczynski's thoughts and feelings about himself, society and living in the wilderness. They include admissions to specific UNABOM and other crimes.

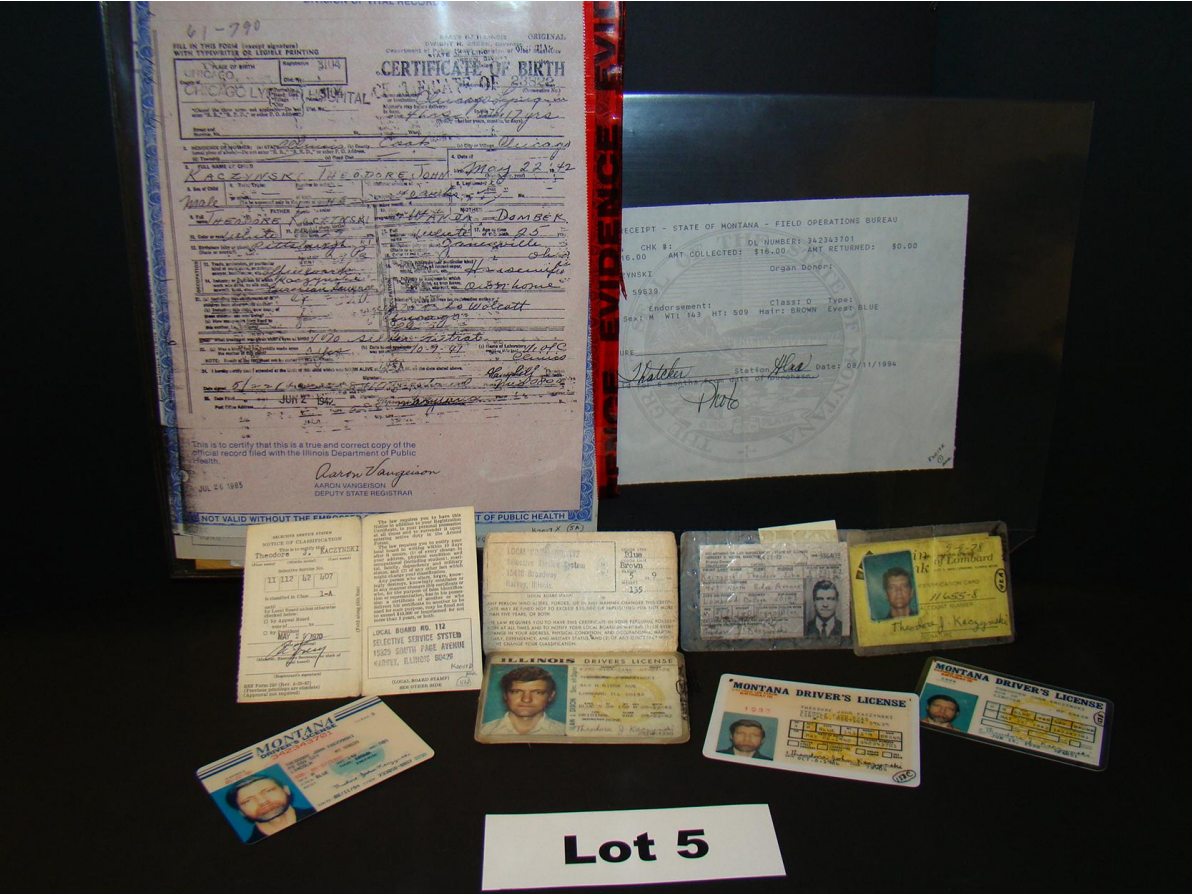

Unabomb04a

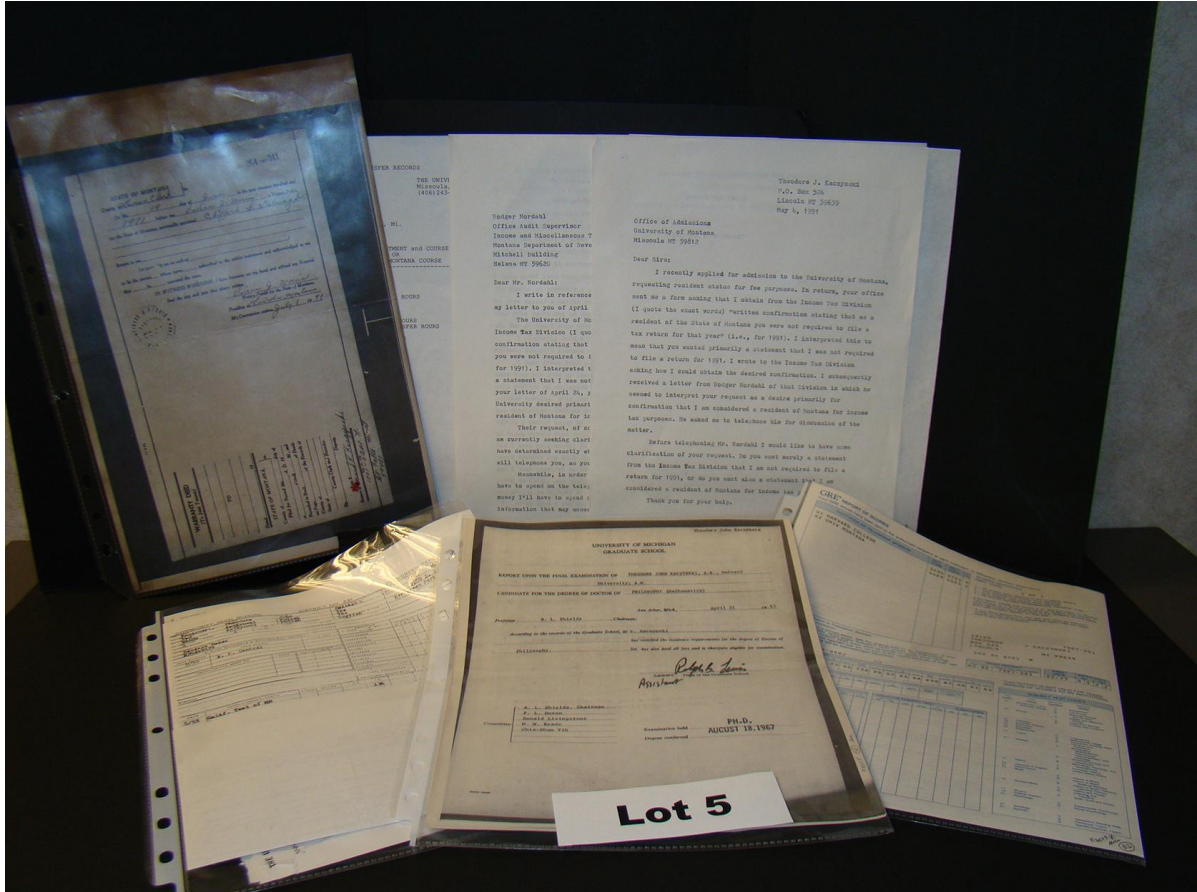

These handwritten notebooks describe in diary fashion Theodore Kaczynski's thoughts and feelings about himself, society and living in the wilderness. They include admissions to specific UNABOM and other crimes.

Unabomb05

A main investigative theory of the UNABOM Task Force was that the UNABOM subject was a white male who spent his life until early adulthood in Illinois, followed by moves to Utah and California. This turned out to be exactly the pattern Kaczynski

followed. This copy of his birth certificate partially adhered to the original evidence bag helps confirm this theory.

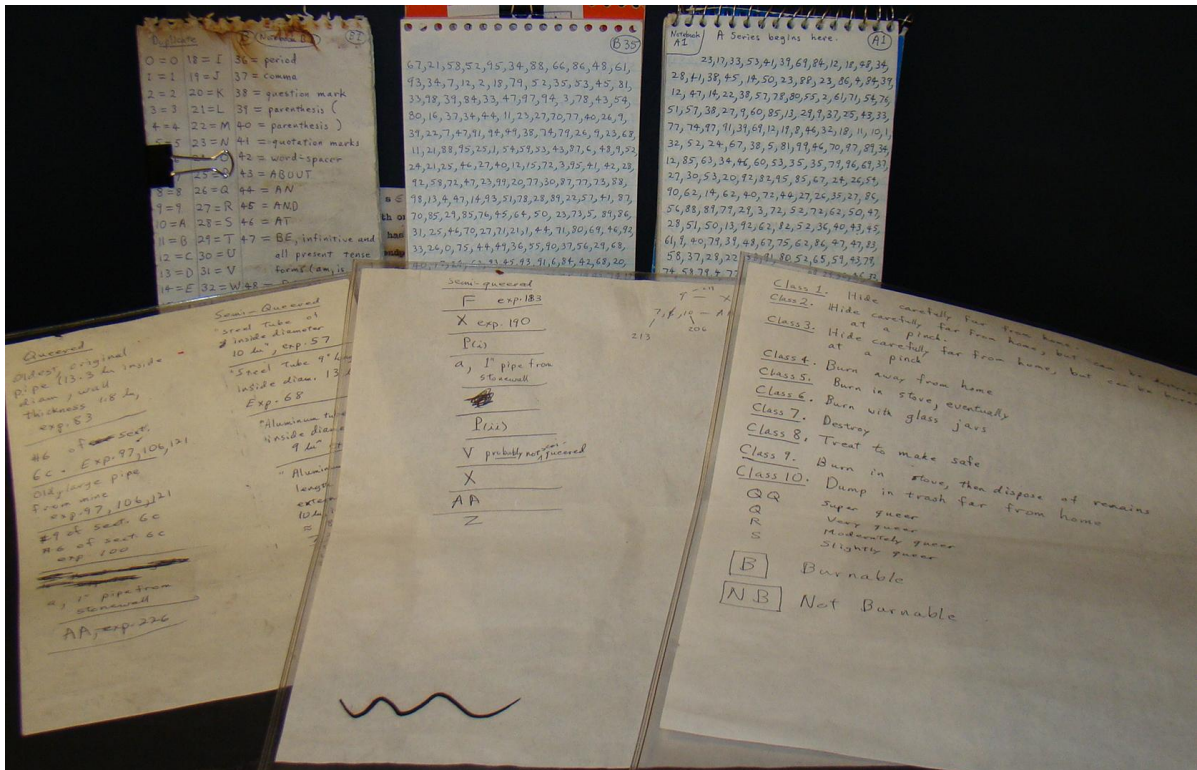

Unabomb05a

Unabomb06

These coded documents and code keys produced by Kaczynski were decoded by the FBI and determined to contain many admissions and discussions of the UNABOM crimes.

Unabomb45

Unabomb44

Unabomb07

This lot contains an individual picture of Theodore Kaczynski and another with Theodore, his brother David and their father.

Unabomb08

Unabomb09

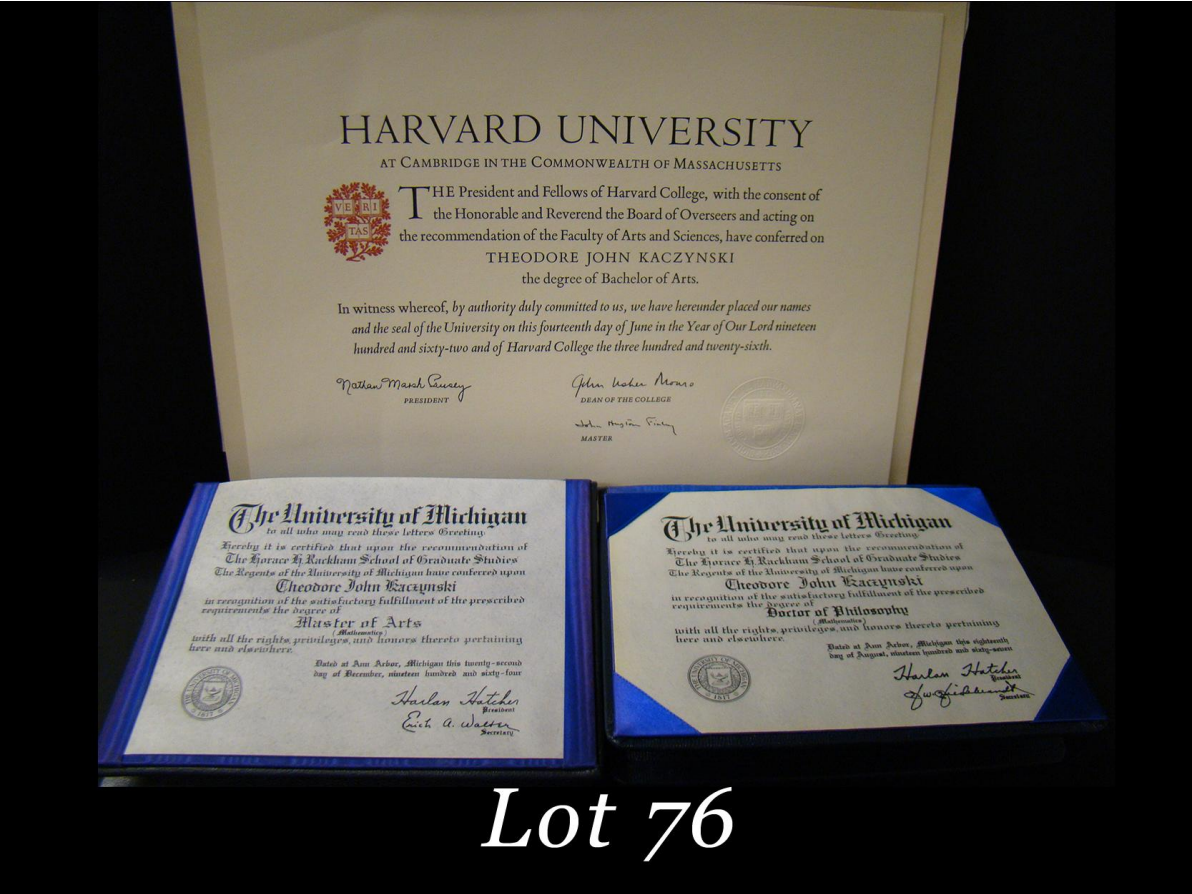

Kaczynski's clothing collection was somewhat limited and very functional, chosen to protect him from the elements of the Montana wilderness.

Lot 36

Lot 76

Unabomb10

Unabomb11

Unabomb12

Unabomb13

These small hand tools were removed from Kaczynski's cabin during the search. Kaczynski's construction of UNABOM explosive devices was all done by hand, without assistance of power tools, and using where possible wood and metal scraps obtained

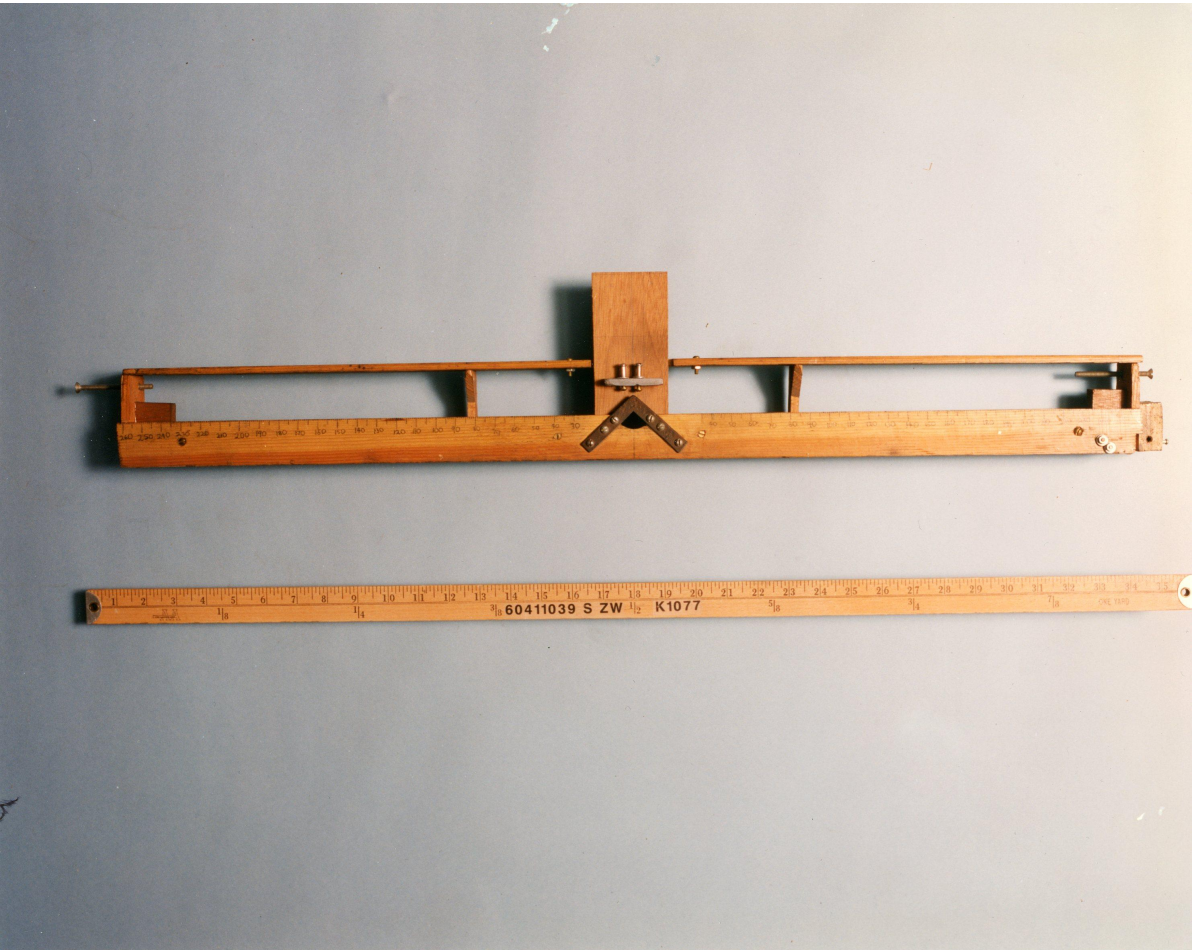

from trash. He went to great lengths to create necessary parts himself, with the general exception of screws and nails. He cast some metal parts (including aluminum) by melting metal scraps on his cabin's wood burning stove. Parts he had to purchase, Kaczynski took pains to buy far away from home, sometimes while wearing disguises. He also made some of his own hand tools. These efforts were detailed in his writings.

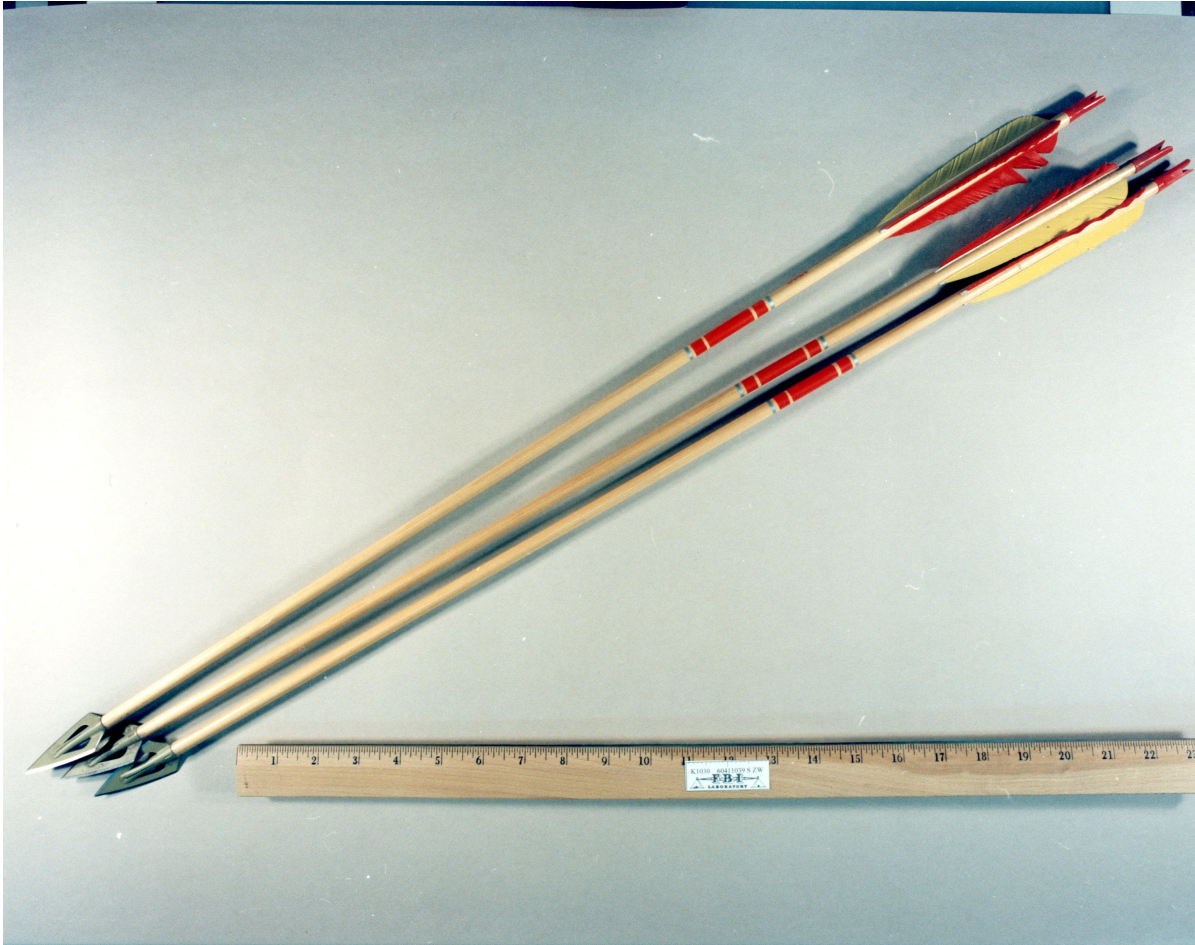

Unabomb14

Unabomb15

Unabomb16

Unabomb17

Kaczynski hunted animals for food in the mountain wilderness. This collection of bows and arrows was his lifeline if he was to stay fit and fed.

Unabomb19

Unabomb20

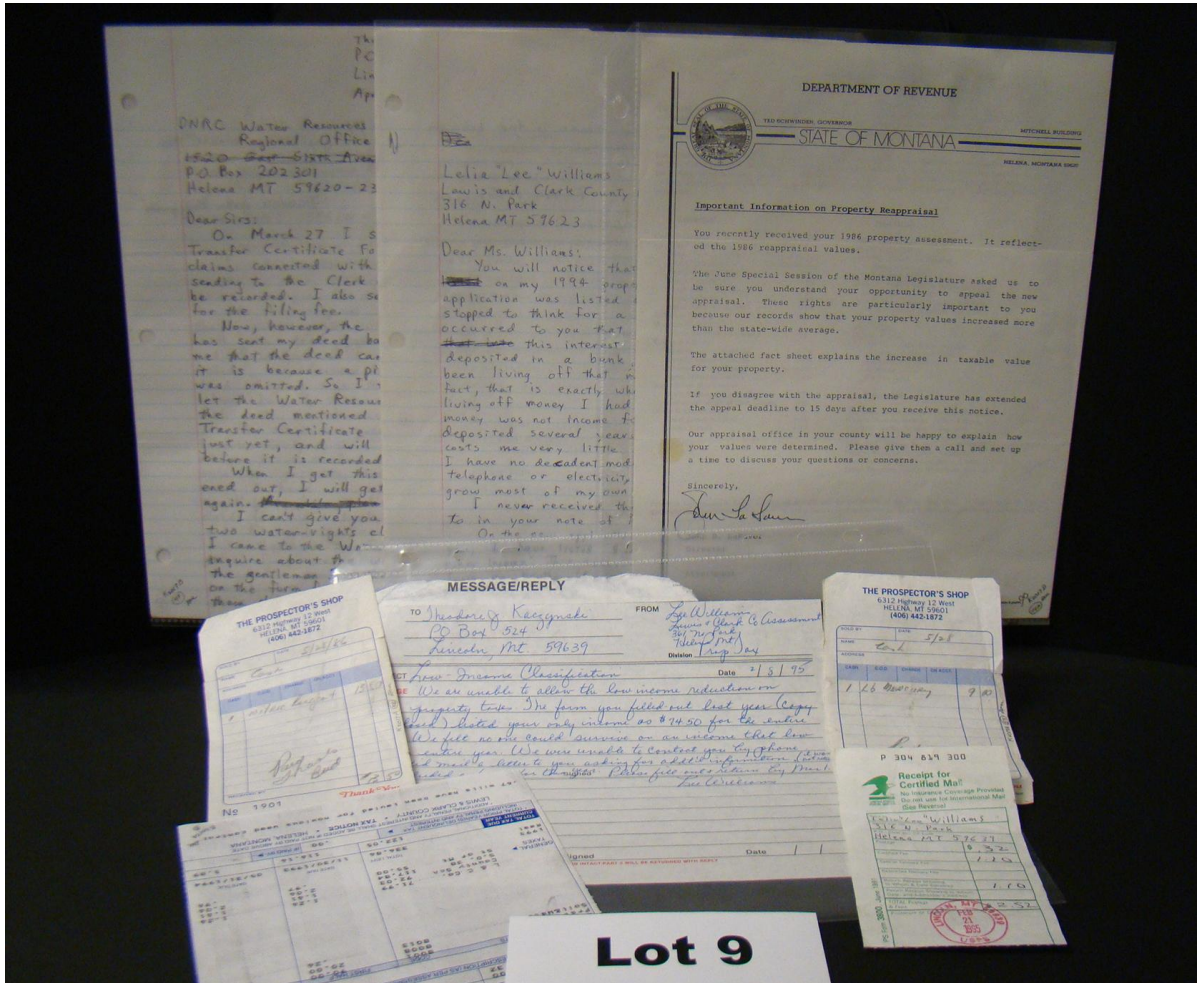

Unabomb21

Unabomb21a

Unabomb22

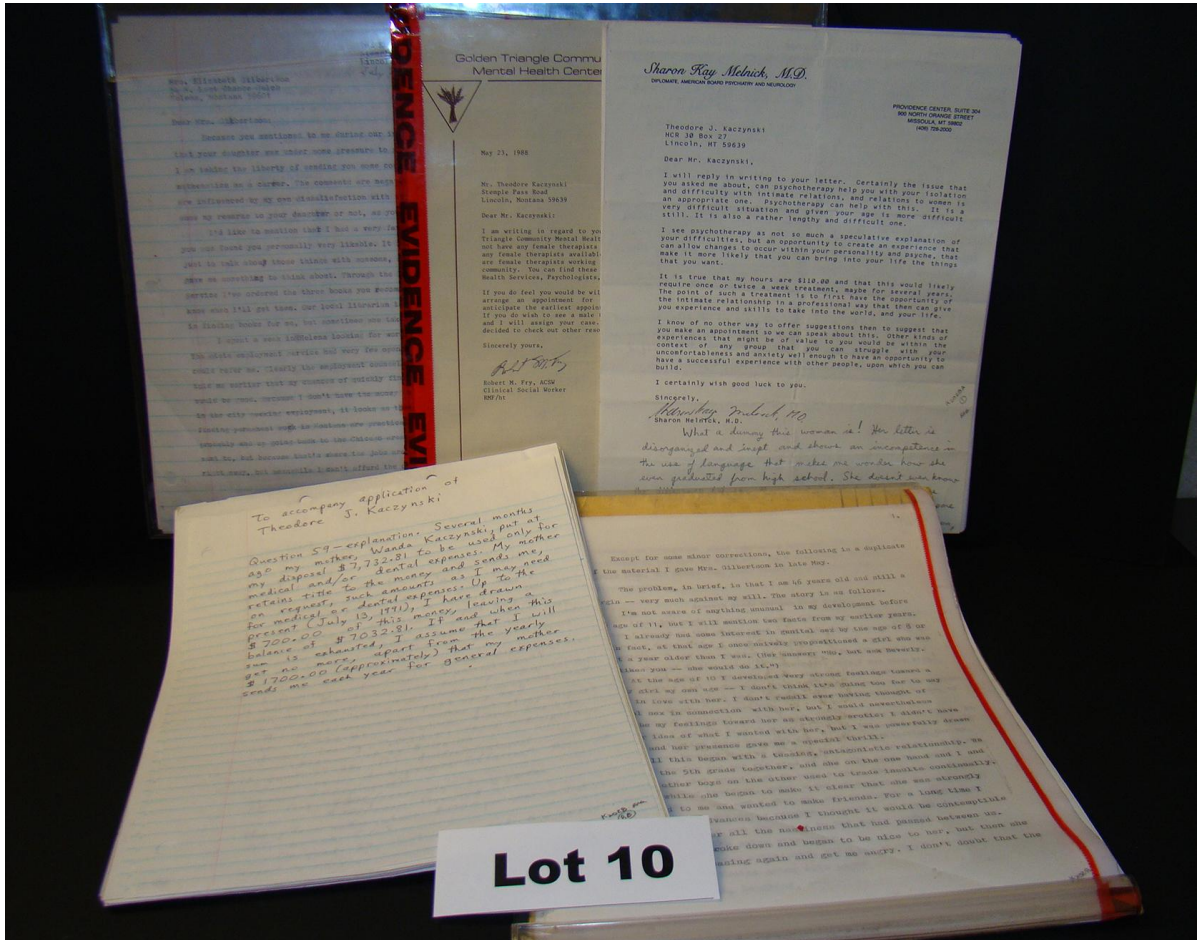

These are Kaczynski's handwritten letters to the County Assessor's Office in Montana pertaining to his Montana property. When Kaczynski's original plan to live in the British Columbia wilderness didn't work out, he turned to Alaska as his "Plan B"

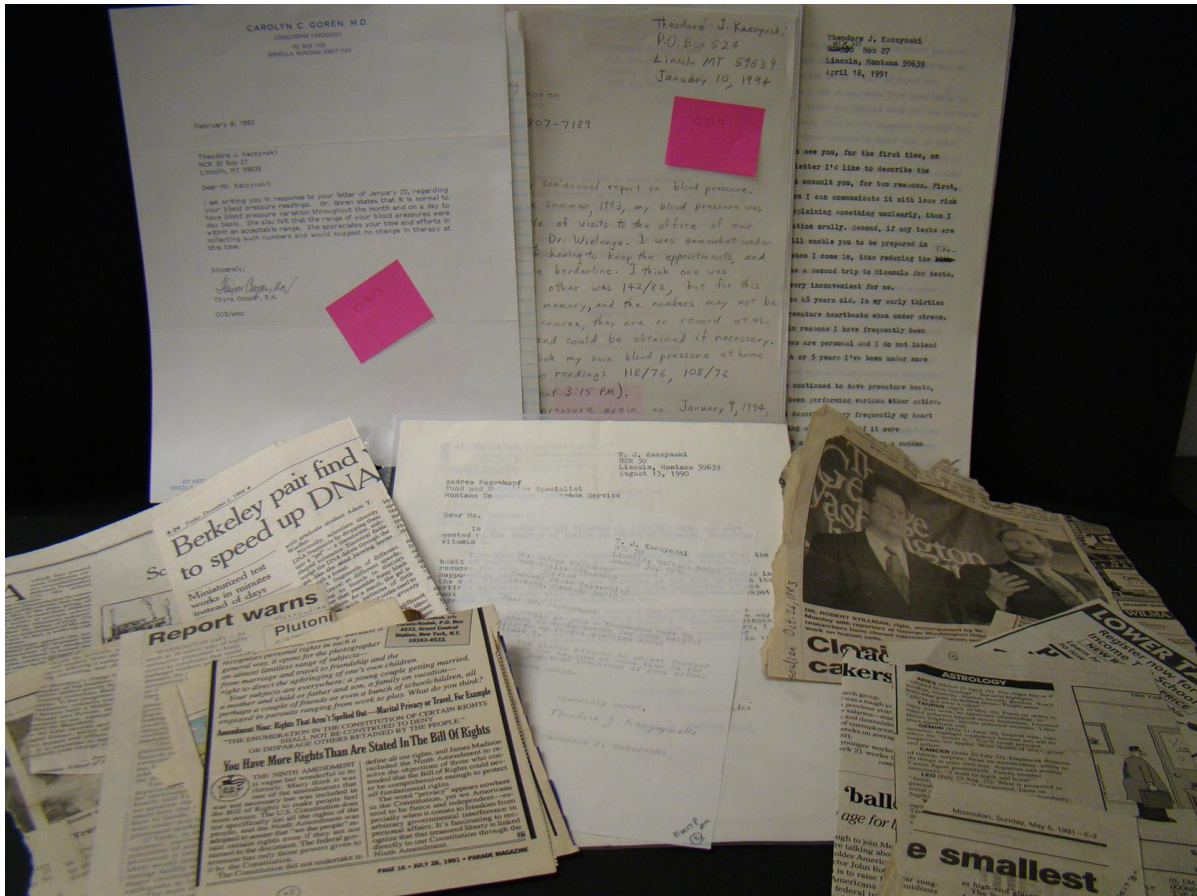

Lot 9

He traveled there but was unable to secure land in a suitable location. He therefore turned to his third choice: Montana. Scouting western Montana in 1970, he found and purchased a plot of land just outside the town of Lincoln. There, he built what would later become known as the UNABOM cabin, from which Kaczynski would plan and carry out all his UNABOM attacks starting in 1978. The UNABOM cabin is currently on display at the Newseum in Washington D.C.

Unabomb23

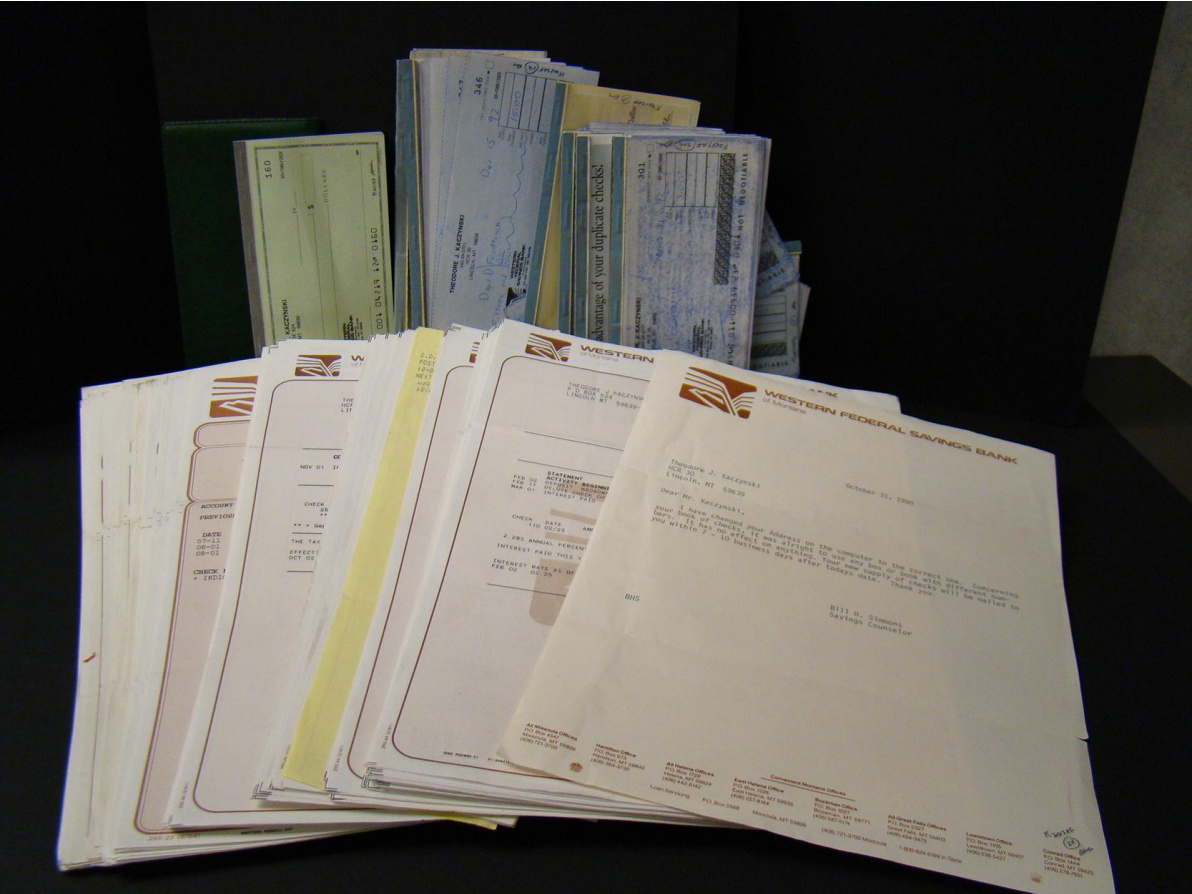

Despite his hatred of psychologists and psychiatrists, Kaczynski was acutely aware of his own unhappiness and on at least a couple of occasions sought professional assistance to deal with it. Much of his unhappiness he attributed to his social ineptness, especially regarding women and his lifelong inability to achieve a satisfying romantic relationship. This lot includes letters written by Theodore Kaczynski in regards to seeing a therapist and treating his anxiety and other issues.

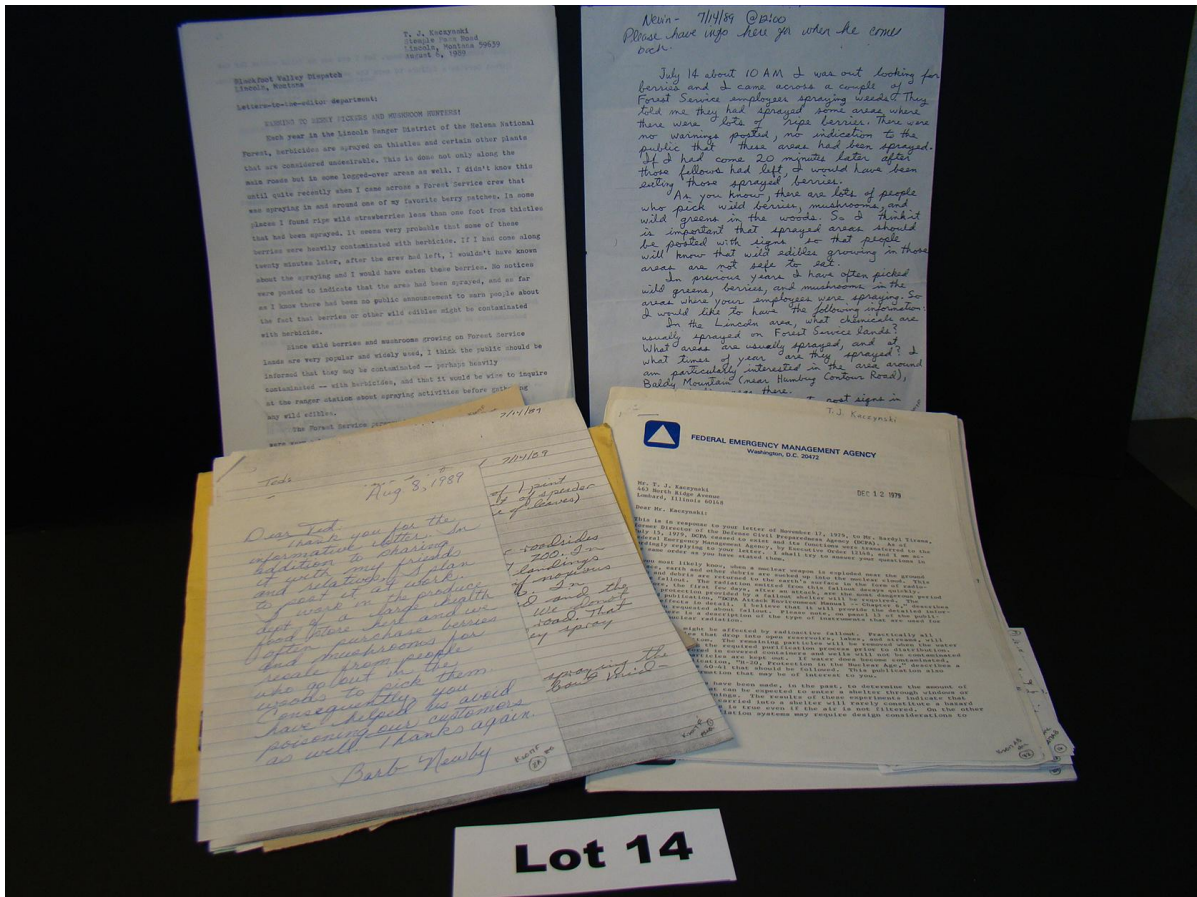

Unabomb24

Unabomb25

Once he moved to Montana, Kaczynski subsisted "off the grid" as much as possible. His expenses sometimes amounted to no more than a few hundred dollars per year. For needs he couldn't provide himself, Kaczynski bartered vegetables he grew, occasionally took odd jobs for short periods, and accepted birthday money from his mother and brother. Funds to sustain his UNABOM activities (mainly supplies and travel) were a constant drain on Kaczynski's meager resources. Kaczynski supplemented his UNABOM funds by extracting money from his mother and brother for help with fictitious problems such as medical expenses. The Western Federal Savings Bank documents in this lot illustrate how Kaczynski managed his finances. A section of the UNABOM search warrant affidavit discussed how much money Kaczynski lived off of through the years.

Unabomb26

Unabomb27

Unabomb28

These letters illustrate the complicated relationship between Kaczynski and his parents. These letters were important to both the prosecution and defense in establishing Kaczynski's emotional history in preparation for trial.

Unabomb29

SUGGESTIONS FOR EARTH FIRSTIENS

From FC

Earth First! wants to eliminate the industrial form of society. This is clearly a revolutionary goal. Yet it seems that many or most Earth Firsties still think and act like reformers, not like revolutionaries.

This is illustrated by Barry Cherny's response to the bombing in which he assassinated the president of the California Forestry Association. According to newspaper reports Cherny was upset by the bombing because he was afraid that there would be retaliatory attacks on Earth Firsties. Now we respect (with certain qualifications) the nonviolent principles of Earth First! (even though we don't think it would be practical for everyone to abide by them) and if any Earth Firsties get worked up in retaliation for our bombing we certainly sympathize with them. But Cherny's reaction shows that his mentality is that of a reformer, not a revolutionary.

To a revolutionary, what is important is not the short-term goal of saving this or that bit of wilderness or securing some grudging tolerance from timber industry sympathizers. What is important is the long-term goal of weakening and destabilizing industrial society so that a revolution against it may become possible. From this point of view it is absurd that timber industry sympathizers should make physical attacks on Earth Firstiers, because such behavior tends to increase the social stresses in industrial society and help to turn people against the system.

It is important to distinguish between what the industrial system "wants" and what certain people who claim to represent the system may want or may do. By what the system "wants" we mean that which helps to assure the survival and growth of the industrial system. This corresponds approximately with what is desired by the most rational, self-restrained and "responsible" members of the system-controlling elite. But people who believe themselves to be supporters of the system often believe in ways that are harmful to the system and thus serve as unwitting allies of those who want to overthrow the system.

Take police brutality as an example. The most rational and "responsible" members of the system's elite are against police brutality. They want the police to use just enough force (and no more than just enough) to insure public order and obedience to the system's rules, because they know that police brutality increases social stresses and tends to break down respect for the system. Bad cops (or timber industry cops) who beat people up regard themselves as proxies and hate those who are against the system, but the behavior of such cops actually helps to undermine the system. Thus police brutality is not really part of the system, but is a kind of disease of the system.

Similarly, the irresponsible politicians who are currently repealing environmental laws may be acting as unwitting allies of revolutionaries. If their actions lead to a few more cases like Love Canal and Exxon Valdez oil spill, they will be helping to destroy respect for the system. Moreover the actions of these politicians help to

APPENDIX

by Mira Goldberg that appeared in the Earth First! Journal (February 2, 1995) will help us to illustrate the leftist

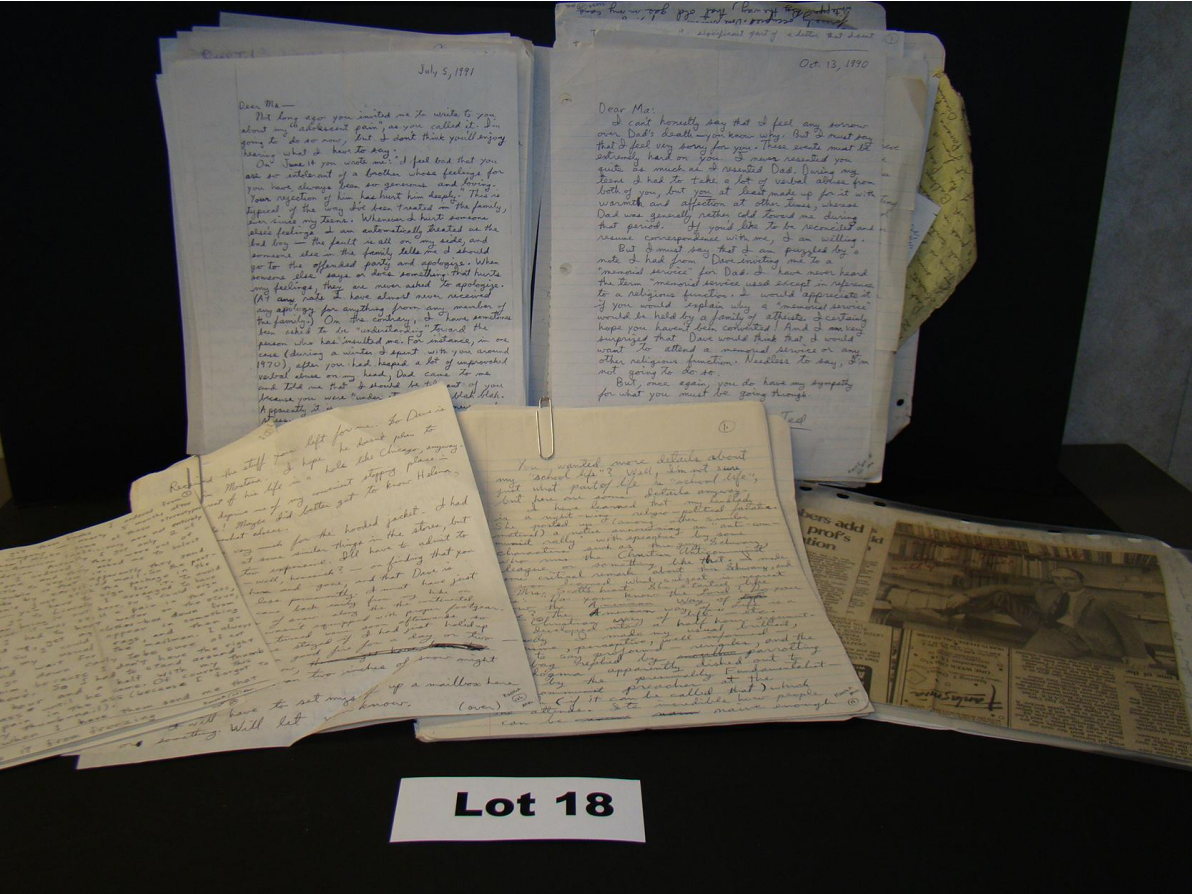

le, December 21, 1994 issue of Earth First!, David Orton article, "Rethinking Environmental-First Nations Holism" in which he criticized some "First Nations" (i.e. Indian) and some environmentalists for uncritically accepting the demands made by any Indians. In her article, "Toward Holism: A response to 'Rethinking Environmental-First Nations,'" Goldberg answers Orton, and in doing so she is a typical example of leftist thinking.

She shows the leftist trait of intense identification with claims that we (FC) mention in paragraphs 13, 22, 23, 24 and 25 and coupled with this the trait of hypersensitivity that in paragraph 11, 12. Orton's article was reasonable and he made it clear that he was criticizing only some Indians acting with environmentally destructive policies, and he environmentalists: "Such native 'holocidalists' (he writes) rely stronger minority within the First Nations than radical environmentalists in the mainstream movement are." responds to Orton's article as if it were a nasty attack on Indians. She even implies that Orton's thinking is "holist" (last paragraph of her article). She seems to think for white people ever to criticize any Indians (with her article).

Goldberg grudgingly admits that not all Indians are perfect - there are "laborators" - but then (in the eleventh to thirteenth paragraphs of her article) she tries to find excuses for lies and bad actions on the insufficiently subsequent attitudes environmentalists. Compare paragraphs 16, 22, of our (FC's)

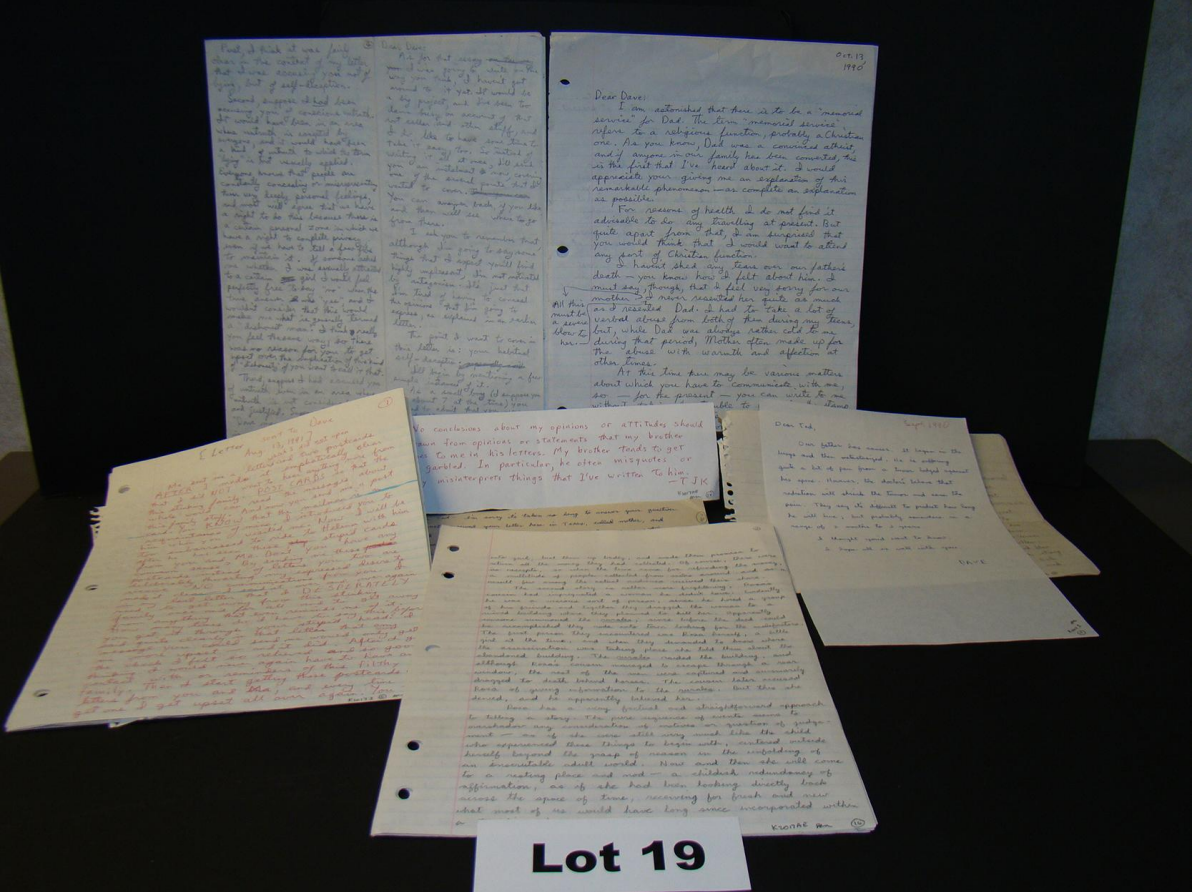

for a leftist, Goldberg is fond of certain catch-words. In 22 of FC's article. In her brief article she uses "holism" once, "genocide" twice and "ecocriticism" three times. "ecocriticism" is a term used by the environmentalists to describe the extermination of the Jews by the Nazis. This is absurd. The word "genocide" was originally used to describe the extermination of the Jews by the Nazis. It is usually applied to some disastrous century events in the history of the Indians by the whites; for example, to cases in which tribes were released through forced marches in which the death rate was extremely high. But to apply the word "genocide" to the death of Indians by whites is to compare it to the treatment by the Nazis, and that is ridiculous in the eyes of

Media Availability Scheduled for Auction of Unabomber's Personal Effects

WASHINGTON - The personal effects of Ted Kaczynski, aka the Unabomber, will be sold via an online auction by the U.S. Marshals beginning May 18. Proceeds from the auction will be used to compensate Kaczynski's victims.

WHAT: Media availability of Kaczynski's personal effects up for auction. Stand-ups will be available with Terry Turchie, the FBI Inspector who led the federal task force that captured the Unabomber in 1996, and retired FBI agent Dr. Kathleen Puckett, the behavioral expert on the case. The U.S. Marshal for the Eastern District of California, Albert Najera, will also be available for interviews.

WHERE: Peachtree Summit Federal Building, 401 W. Peachtree St., 1st Floor, Atlanta, GA 30308

WHEN: Wednesday, 10 a.m. - noon EDT (It is suggested to arrive as early as 8 a.m. to get through federal security requirements, including magnetometers and X-rays of property.)

TO REGISTER: E-mail Tonya Dillard of the General Services Administration at tonyar.dillard@gsa.gov. Include name, news agency or affiliation, and the names of persons accompanying you.

PARKING: Available across the street

ELECTRICAL OUTLETS: Limited number available. Your own source of power supply is recommended. Bring surge protectors and extension cords.

SECURITY PROCEDURES: Federal building security procedures in place. A government-issued ID card is required for entry. Bring your media credentials.

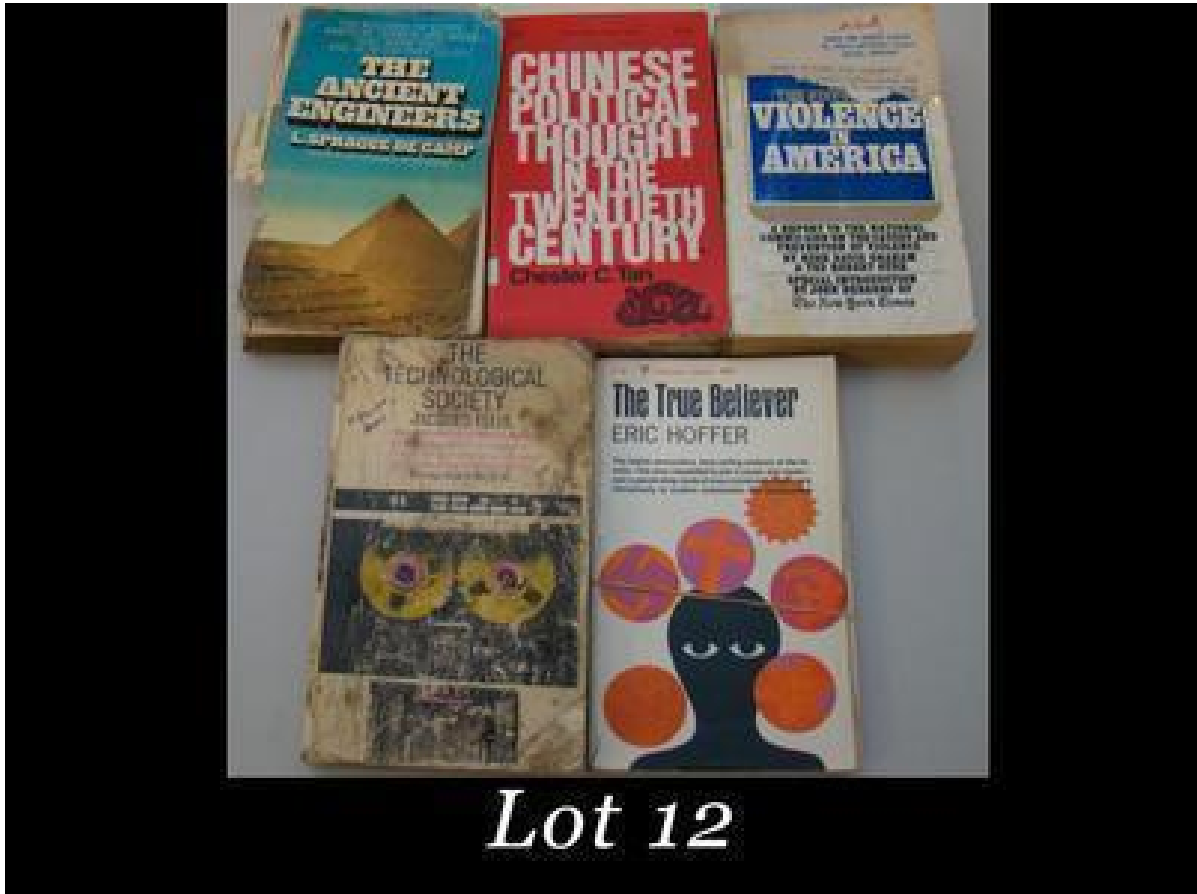

The U.S. Marshals Service occupies a uniquely central position in the federal justice system. It is the enforcement arm of the federal courts, involved in virtually every federal law enforcement initiative.

The Unabomber's Books

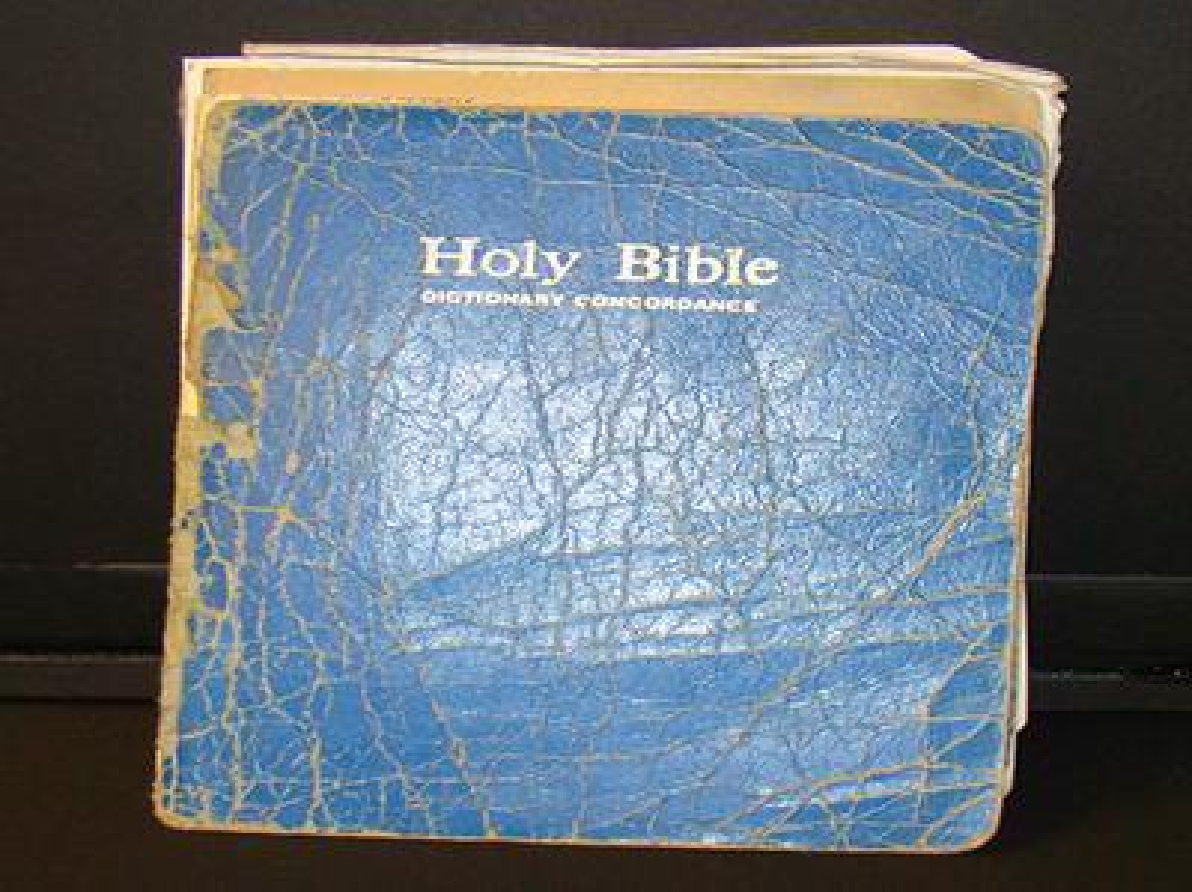

Source
May 19, 2011

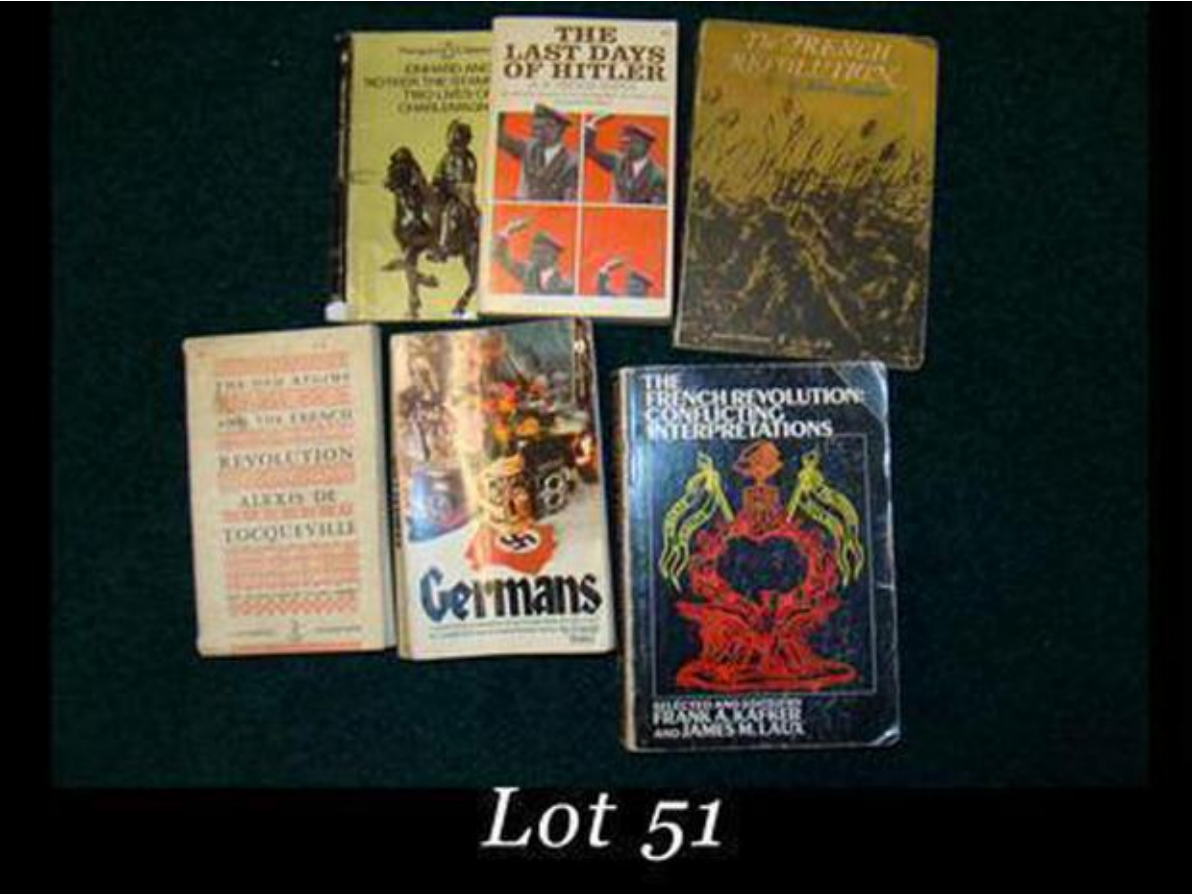

By court order, the U.S. government has to sell off Theodore "Unabomber" Kaczynski's stuff. Intrepid and well-funded buyers can bid on such things as the sunglasses and sweatshirt made famous in the forensic sketch, various tools and personal items, numerous manuscripts, and a few typewriters, including the one he used to write his manifesto. All good fun for the memento-seeker, and the proceeds go toward restitution to his victims' families.

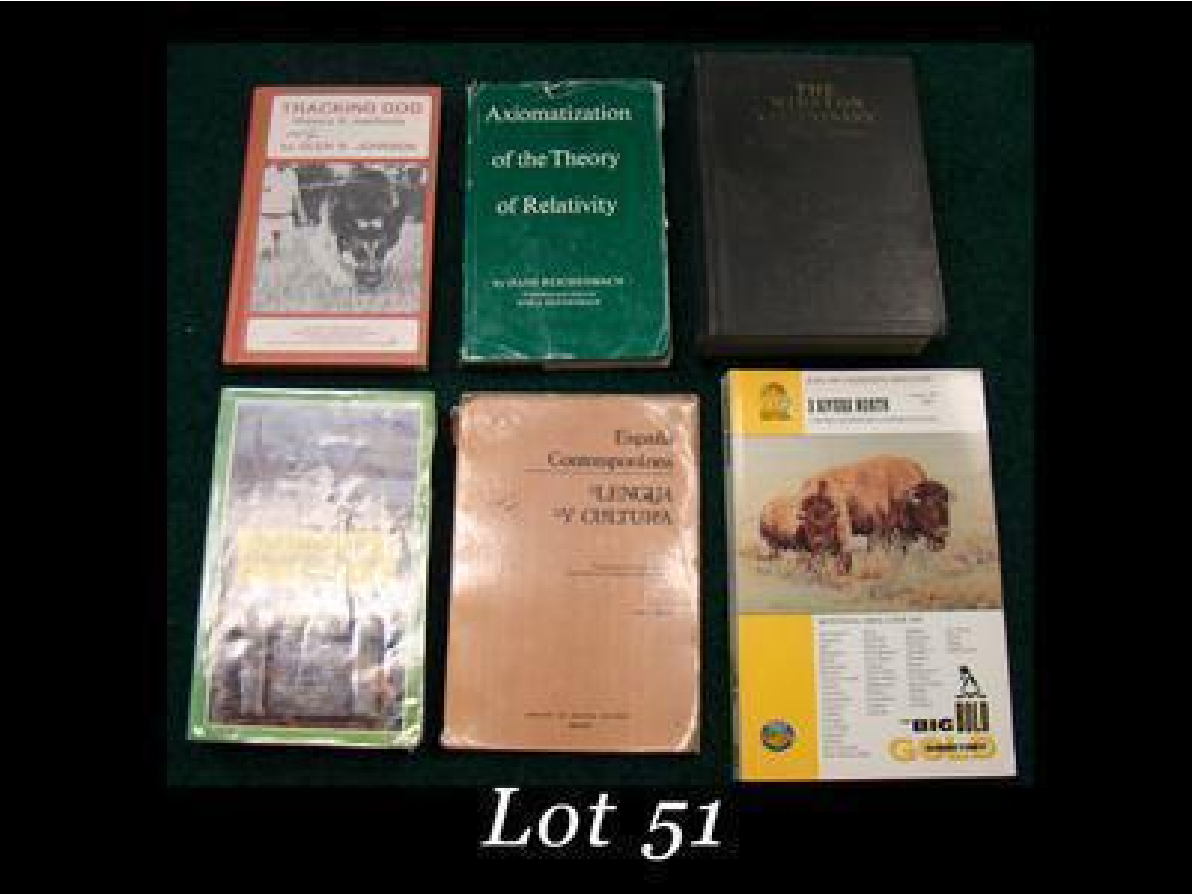

I was curious to see what books he had. Lot 12 consists of 5 paperbacks the FBI thought were particularly important: *Chinese Political Thought in the Twentieth Cen-*

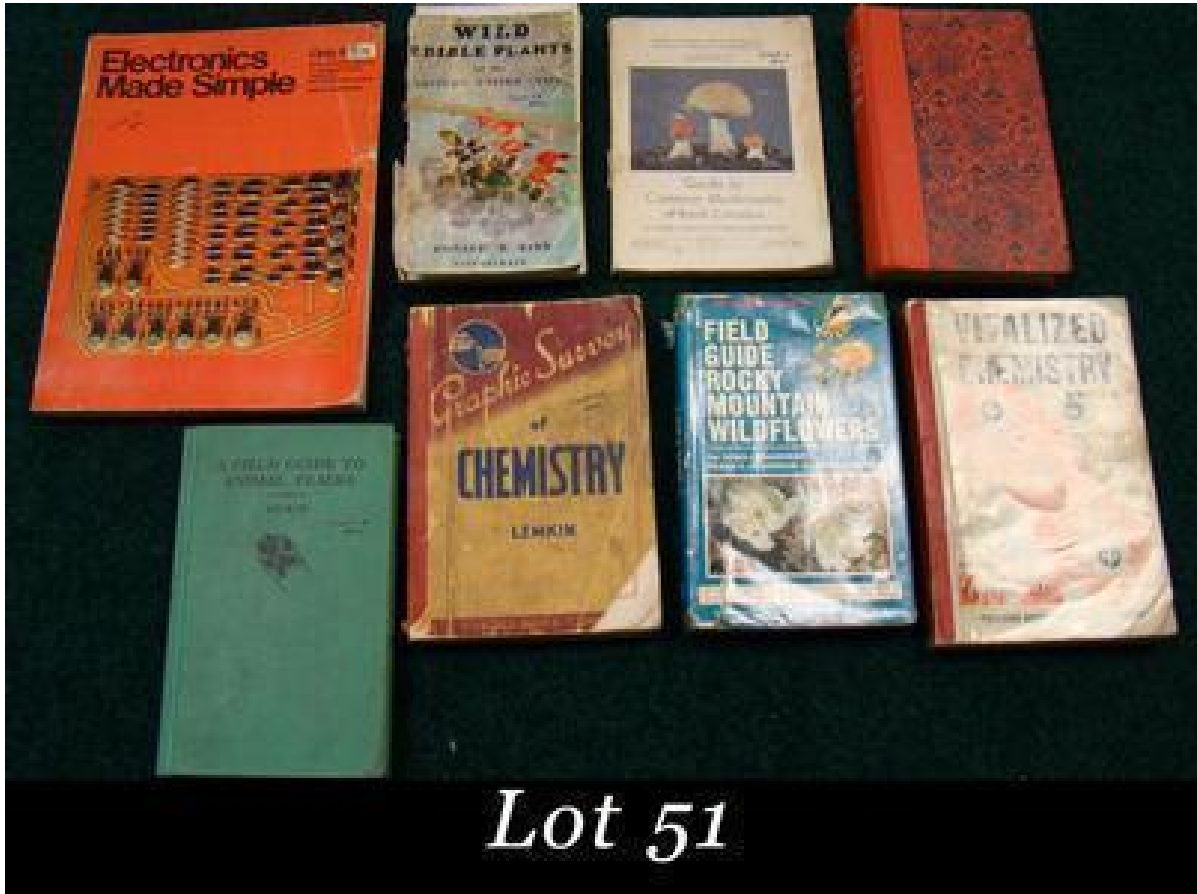

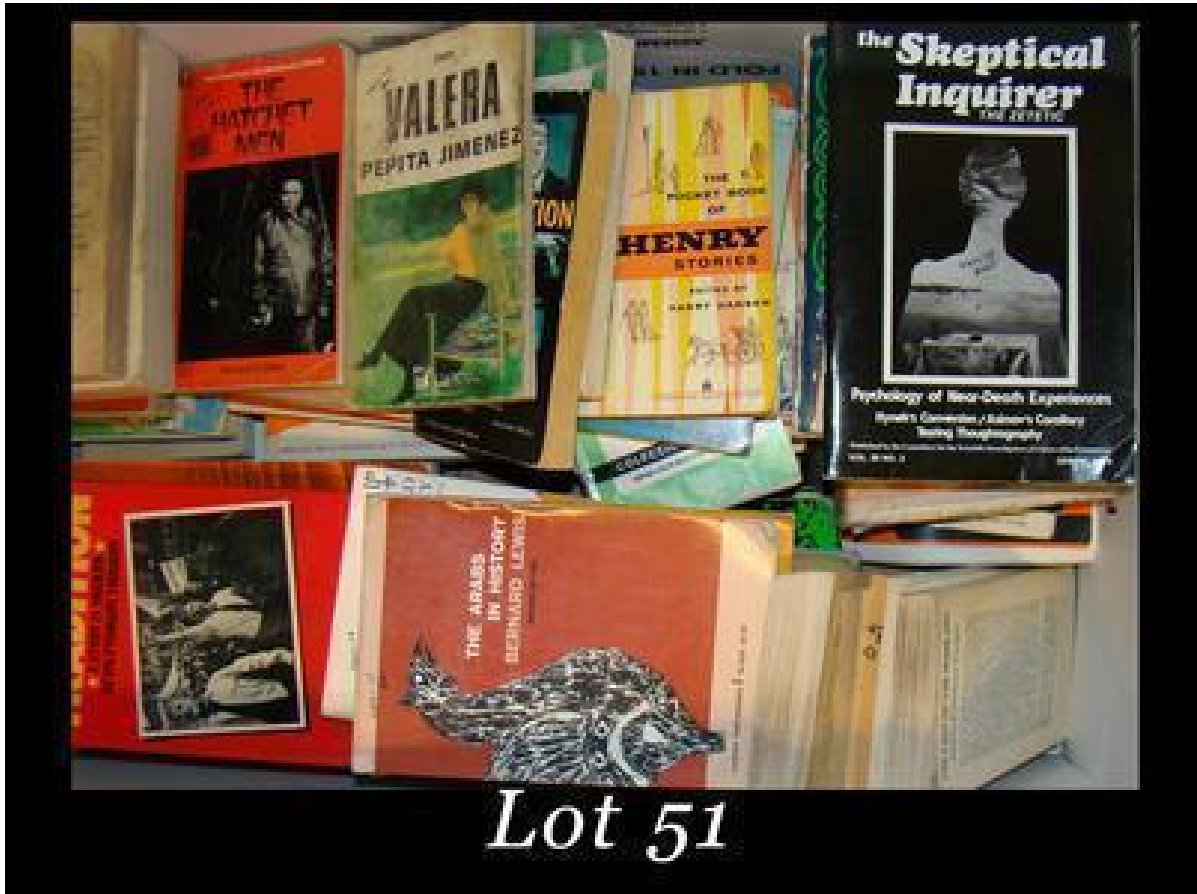

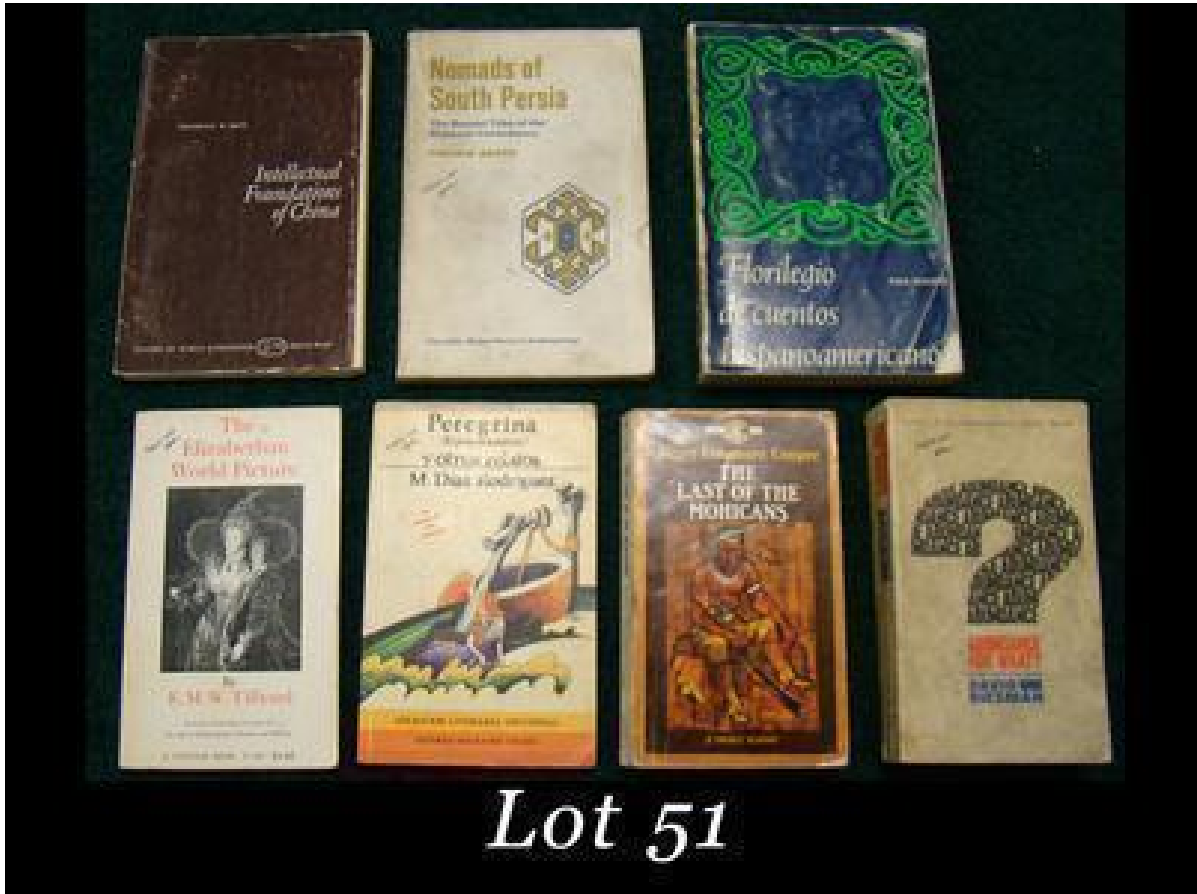

Lot 51

Lot 51

tury by Chester C. Tan, *The Technological Society* by Jacques Ellul, *The True Believer* by Eric Hoffer, *Violence in America*, and *The Ancient Engineers* by L. Sprague De Camp.

Other lots include a well-worn Bible, a manual for wilderness survival, and various battered paperbacks mostly concerned with history and science, though there's also a collection of O. Henry stories, a copy of *The Last of the Mohicans*, and *The Elizabethan World Picture*.

Bid now on your favorite terrorist relics!

Most expensive items from the Unabomber auction

Source

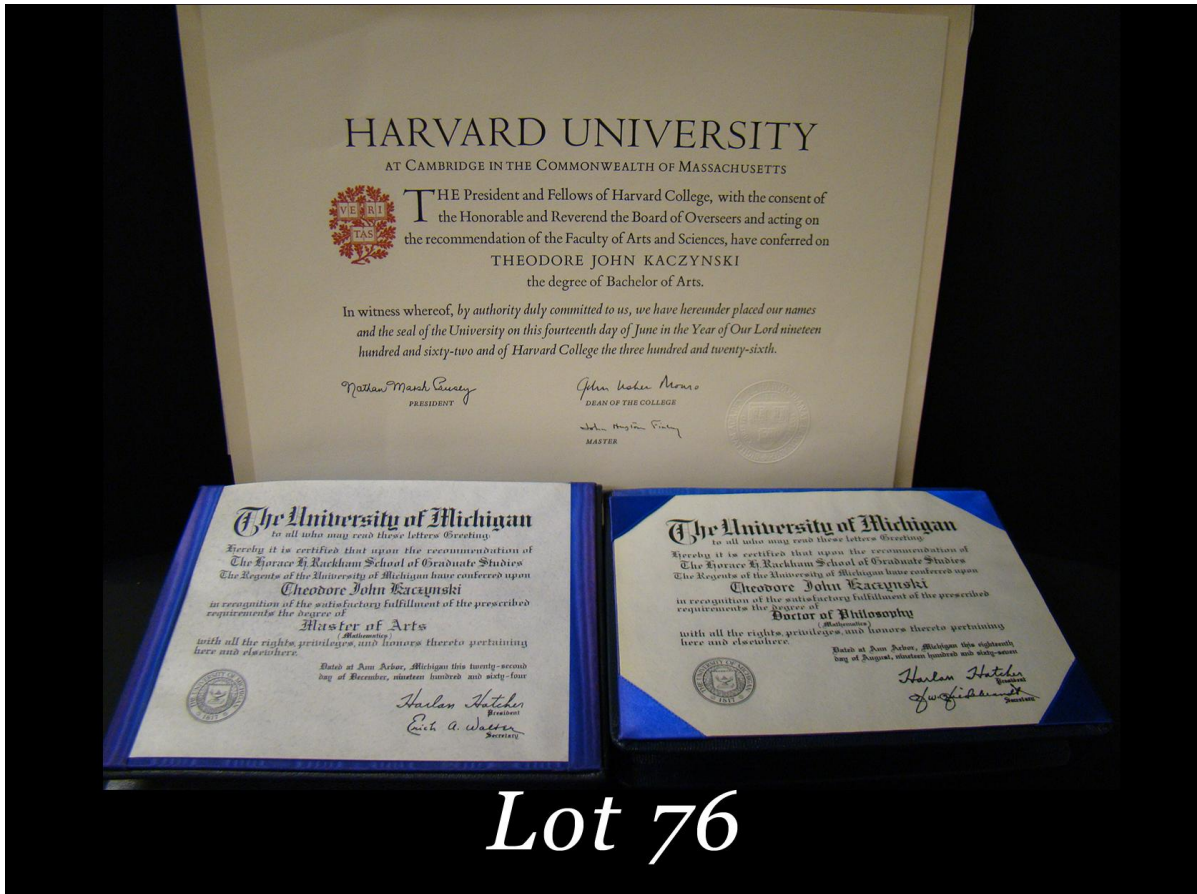

May 25, 2011 / 3:04 PM / CBS NEWS

Per a court order, the U.S. Marshals Service is holding an online auction of items owned by Unabomber Ted Kaczynski, the Harvard-educated anarchist whose mail-bomb spree claimed three lives and injured 23. Proceeds from the auction will be used to pay off a \$15 million restitution order to the victims and their families. Here are the ten most expensive items available. The auction ends on June 2.

Currently priced at over \$20,000, lot 41QSCII1279023 includes a hoodie and sunglasses owned by Kaczynski - possibly the items he wore as a disguise, which were eventually captured in the famous Unabomber suspect sketch.

Lot 76

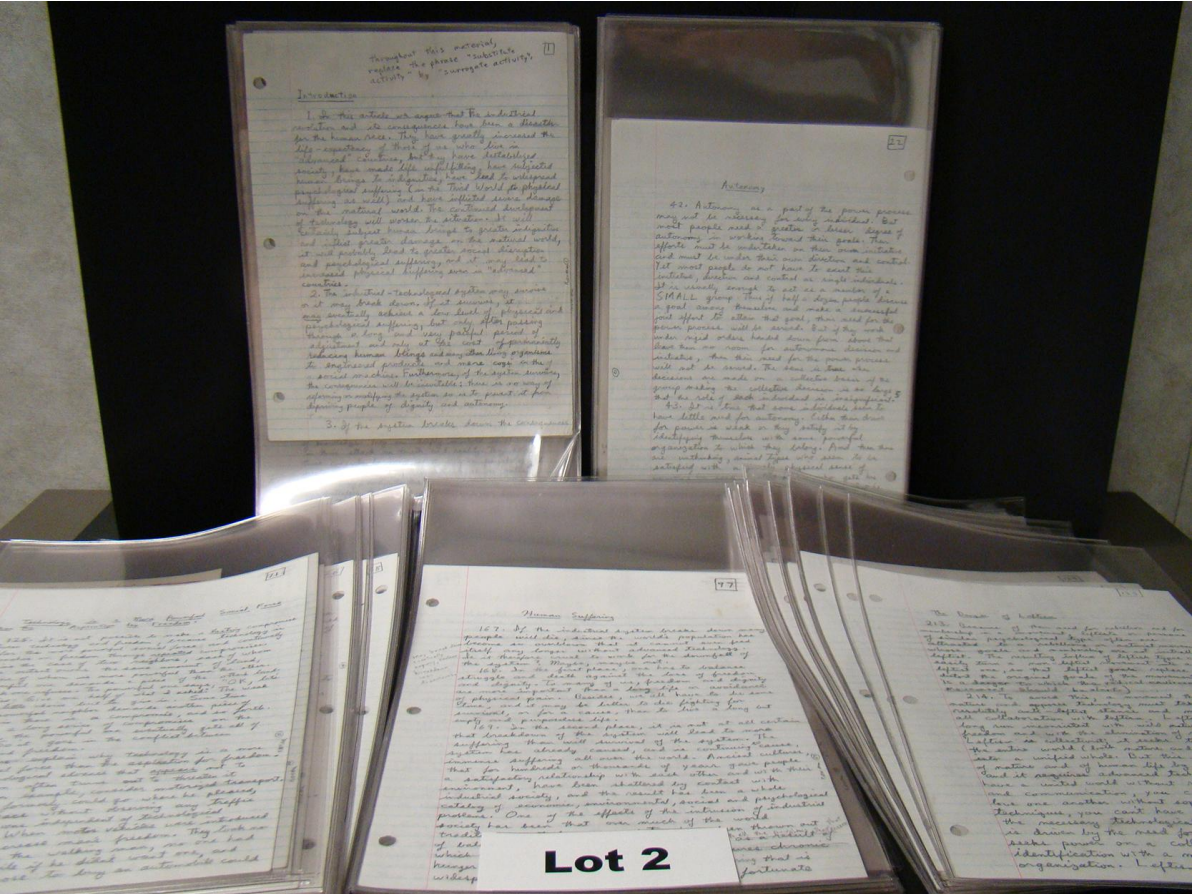

Lot 41QSCII1279076 features Kaczynski's University of Michigan PhD diploma and his Harvard undergrad diploma. It currently costs \$5000.

Lot 41QSCII1279002, currently priced at over \$17,000, is a handwritten rough draft of Kaczynski's manifesto, which was eventually published in the Washington Post.

This manual - "Your Chance to Live" - was one of the books Kaczynski apparently studied to learn about wilderness survival. It's listed as lot 41QSCII1279015 and currently costs over \$2000.

This Smith Corona portable typewriter - lot 41QSCII1279008 - was used by Kaczynski to type many documents, including letters and his manifesto. It's price is over \$11,000.

Currently at over \$3000, this long black knife, lot 41QSCII1279054, was found in Kaczynski's cabin.

throughout this material
replace the phrase "individual
activity" by "aggregate activity"

Introduction

In the article we argue that the industrial
revolution and the consequent loss of a sense of
direction for the human race. They have greatly increased the
life-expectancy of those of us who live in
"advanced" countries, but they have also
caused human beings to suffer from a variety of
psychological sufferings. In the Third World the physical
suffering is well known, but the psychological suffering
is not. The continued development
of technology will make the situation still
worse. Unless we find a way to give individuals
and nations greater control over the material world,
it will probably lead to greater mental suffering
and psychological suffering, and it may lead to
increased physical suffering even in "advanced"
countries.

2. The industrial-technological system may seem
to be very much more advanced than any other
system, but it is actually a low level of progress and
psychological suffering, but only after passing
through a long and very painful period of
adjustment and only at the cost of great
losses of human beings and other things of value.
The industrial-technological system is a
series of human beings and other things of value
that are being destroyed. The industrial-technological
system is a series of human beings and other things
of value that are being destroyed. The industrial-
technological system is a series of human beings
and other things of value that are being destroyed.

3. If the system breaks down, the consequences

Autonomy

21. Autonomy as a part of the human process
may not be necessary for every individual, but
most people need it. Greater degrees of
autonomy in working toward their goals, than
efforts must be undertaken in their own activities,
and must be under their own direction and control.
Not every people do not have to control their
intended, direction and control in their individual
life, in order to act as a member of a
SMALL group. They will do things people believe
a good thing, because they will be successful
and effort to allow that goal, then used for the
group purpose, will be successful. But if they work
under rigid orders, based down from above, that
does not give room for autonomous decision and
initiative, then the need for the group process
will not be served. The aim is to have the
members act in a collective sense of the
group, making the collective decision as a group
and the role of each individual is insignificant.
22. It is true that some individuals do not
have little need for autonomy. Like the need
for purpose which is the ability to be
developed through work and group
organization to which they belong. And then they
are satisfied with a purely physical sense of
purpose.

Human Suffering

16.7. If the industrial-technological system
breaks down, the consequences will be
catastrophic. The industrial-technological
system is a series of human beings and other
things of value that are being destroyed. The
industrial-technological system is a series of
human beings and other things of value that are
being destroyed. The industrial-technological
system is a series of human beings and other
things of value that are being destroyed.

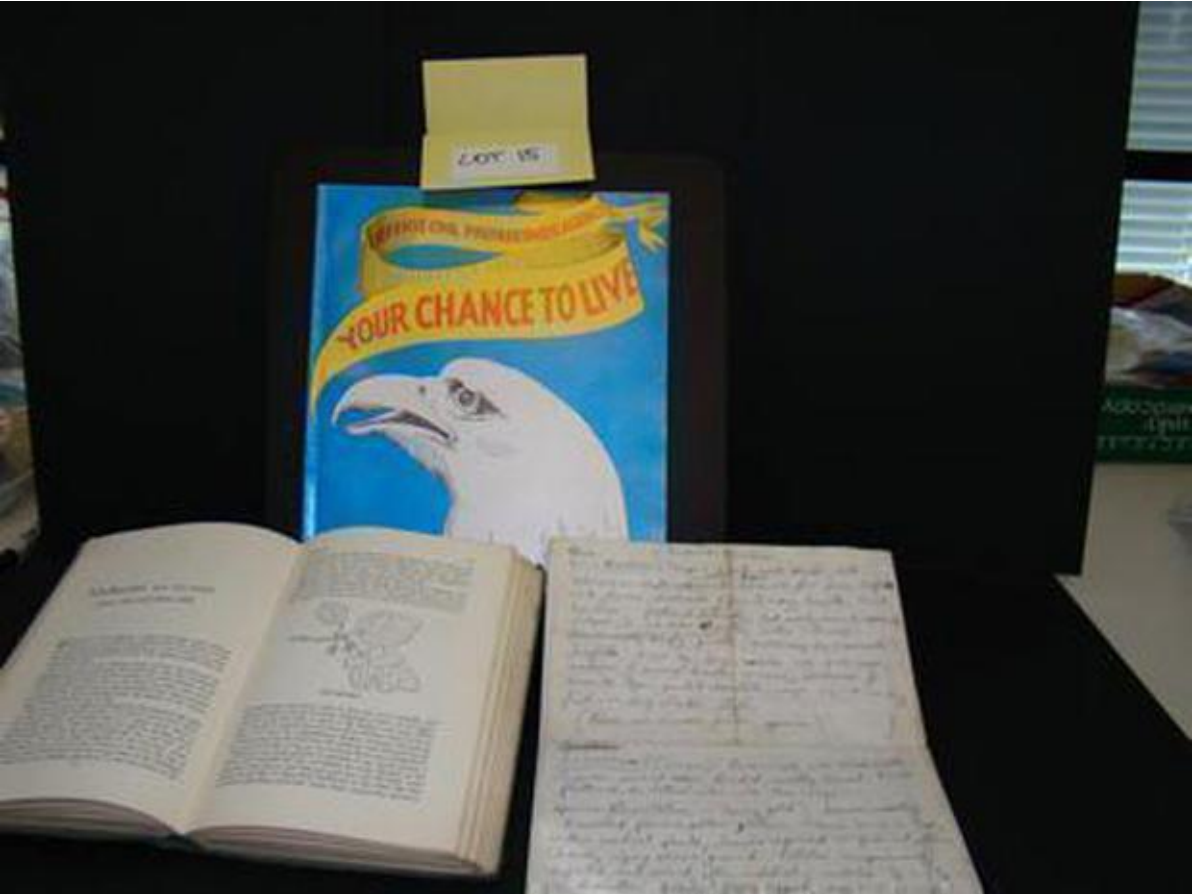

Human Suffering

16.7. If the industrial-technological system
breaks down, the consequences will be
catastrophic. The industrial-technological
system is a series of human beings and other
things of value that are being destroyed. The
industrial-technological system is a series of
human beings and other things of value that are
being destroyed. The industrial-technological
system is a series of human beings and other
things of value that are being destroyed.

The Basis of Loneliness

21. The basis of loneliness is the lack of
purpose and direction. The industrial-
technological system is a series of human
beings and other things of value that are
being destroyed. The industrial-technological
system is a series of human beings and other
things of value that are being destroyed.

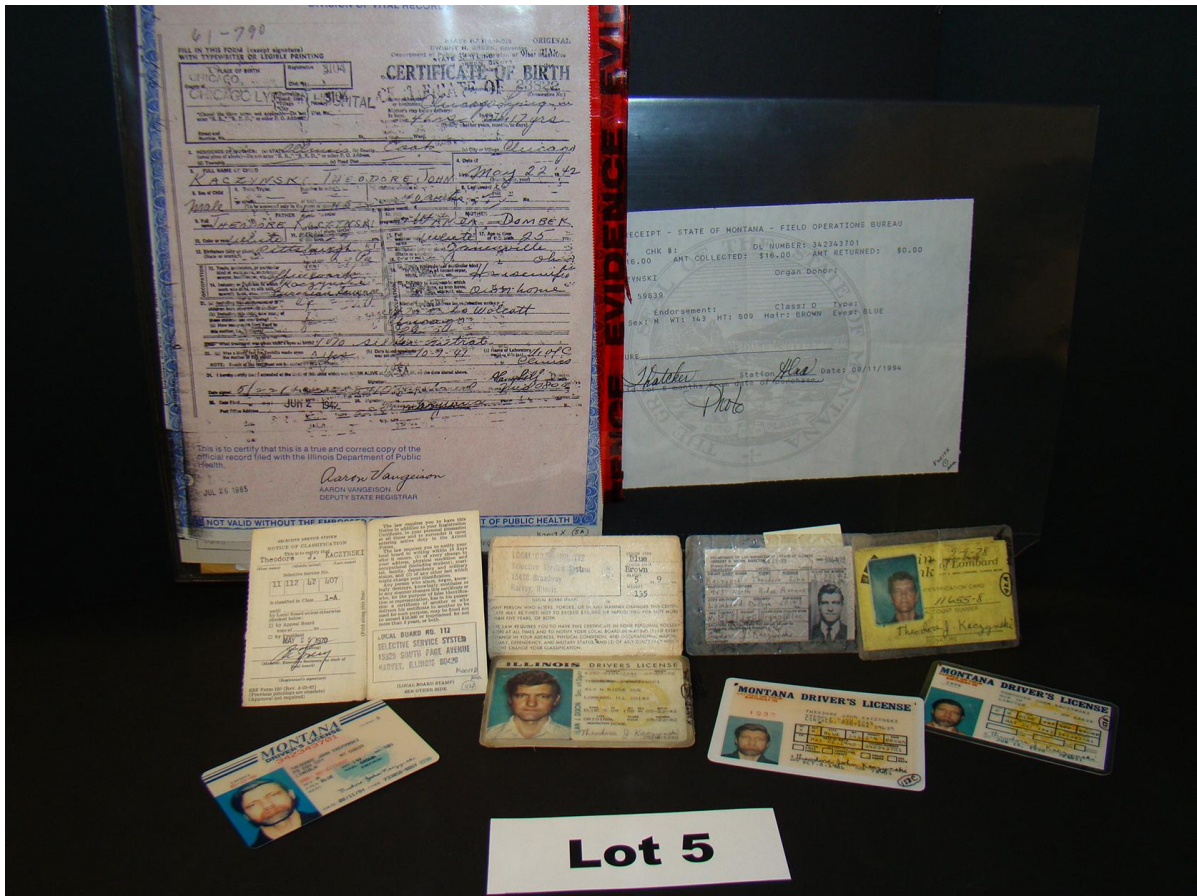

Lot 2

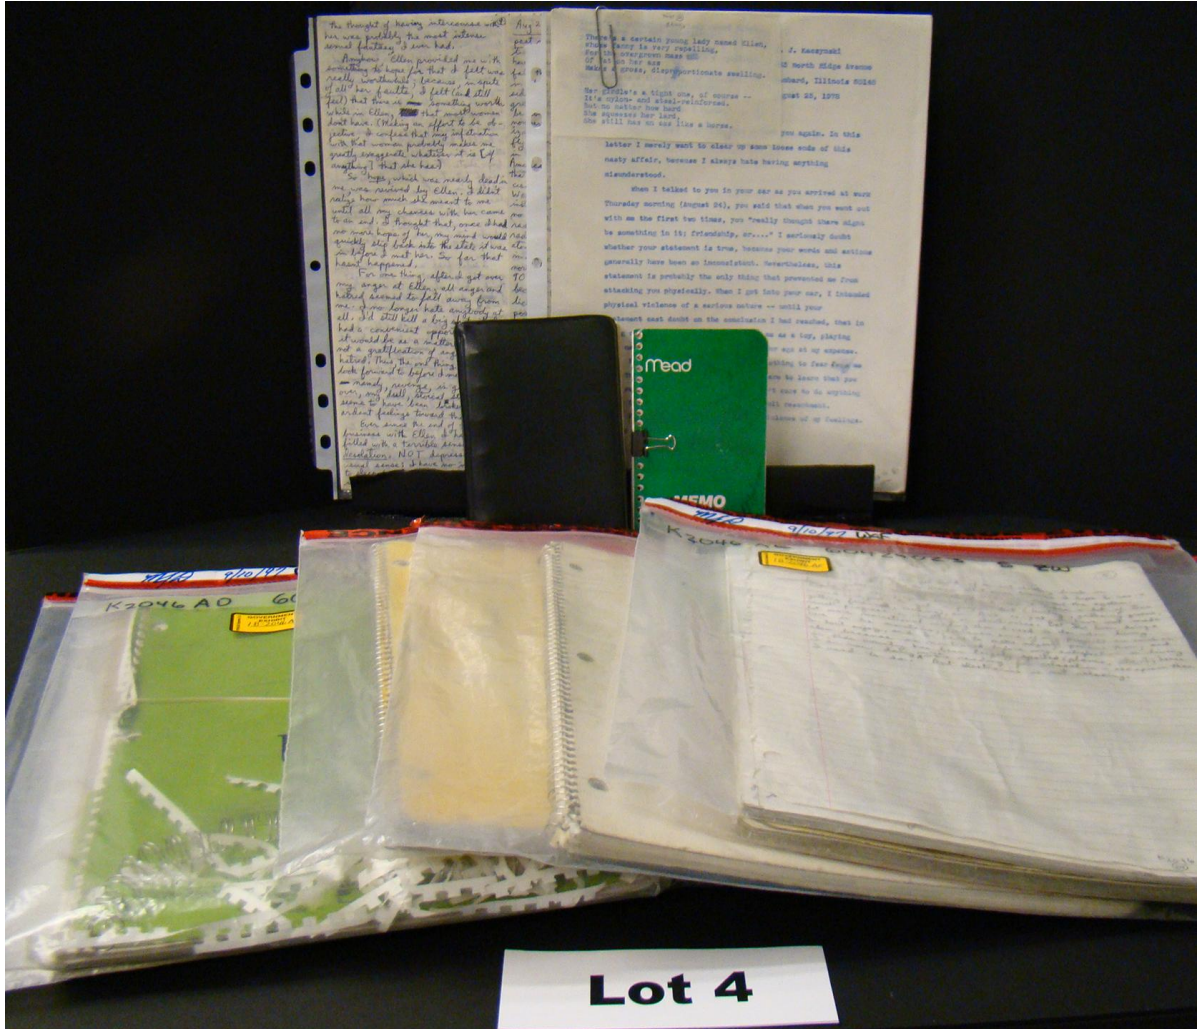

Lot 41QSCI11279003 is a copy of Kaczynski's autobiography, where, according to the auction description, he details his decision to become a serial killer. It is bidding at over \$2000.

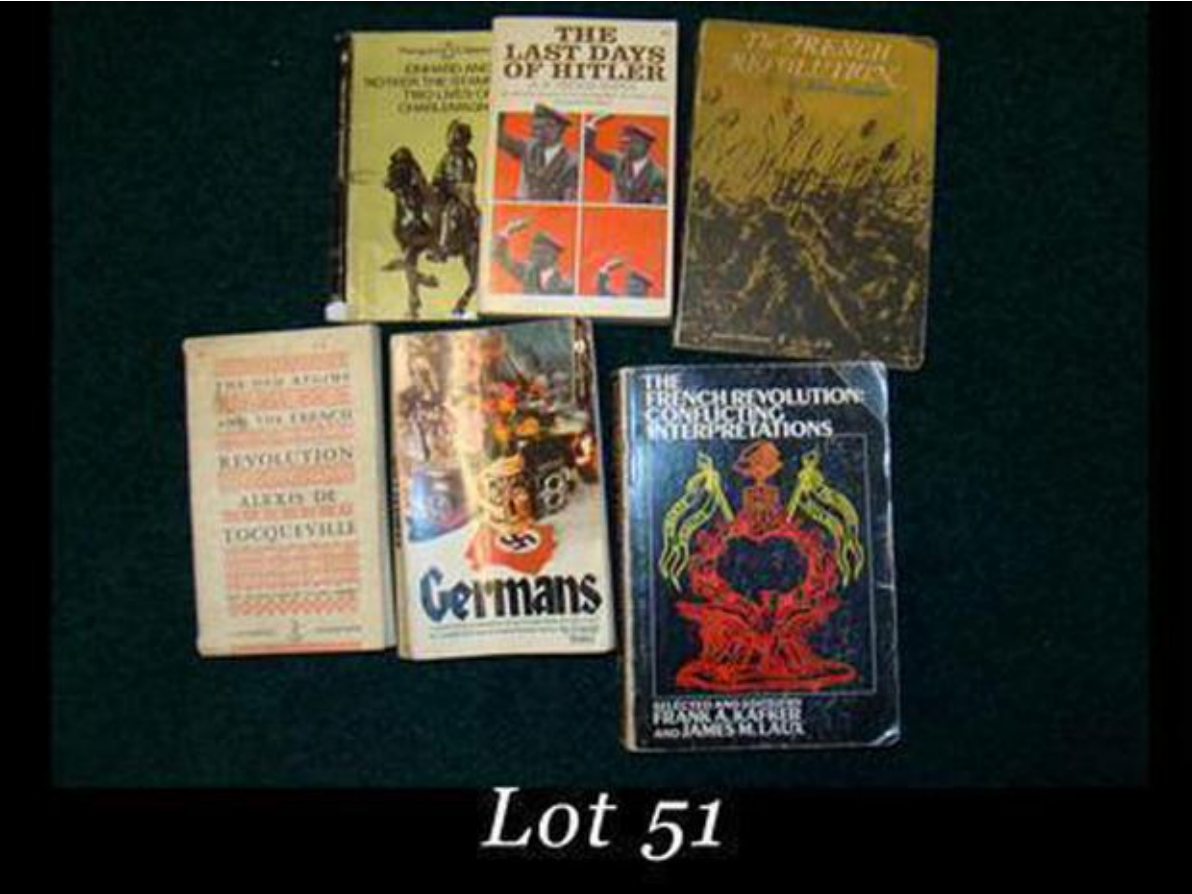

This lot - 41QSCI11279005 - of personal documents including Kaczynski's driver's license and birth certificate is currently at \$3500.

Lot 41QSCI11279004, bidding at over \$4000, is made up of personal journals composed by Kaczynski. According to the site, they feature descriptions of his time in the wilderness and admissions related to the Unabomber crime spree.

This lot of books from Kaczynski's personal library - 41QSCI11279051 - includes texts on history, mathematics and science. The current bid is over \$1000.

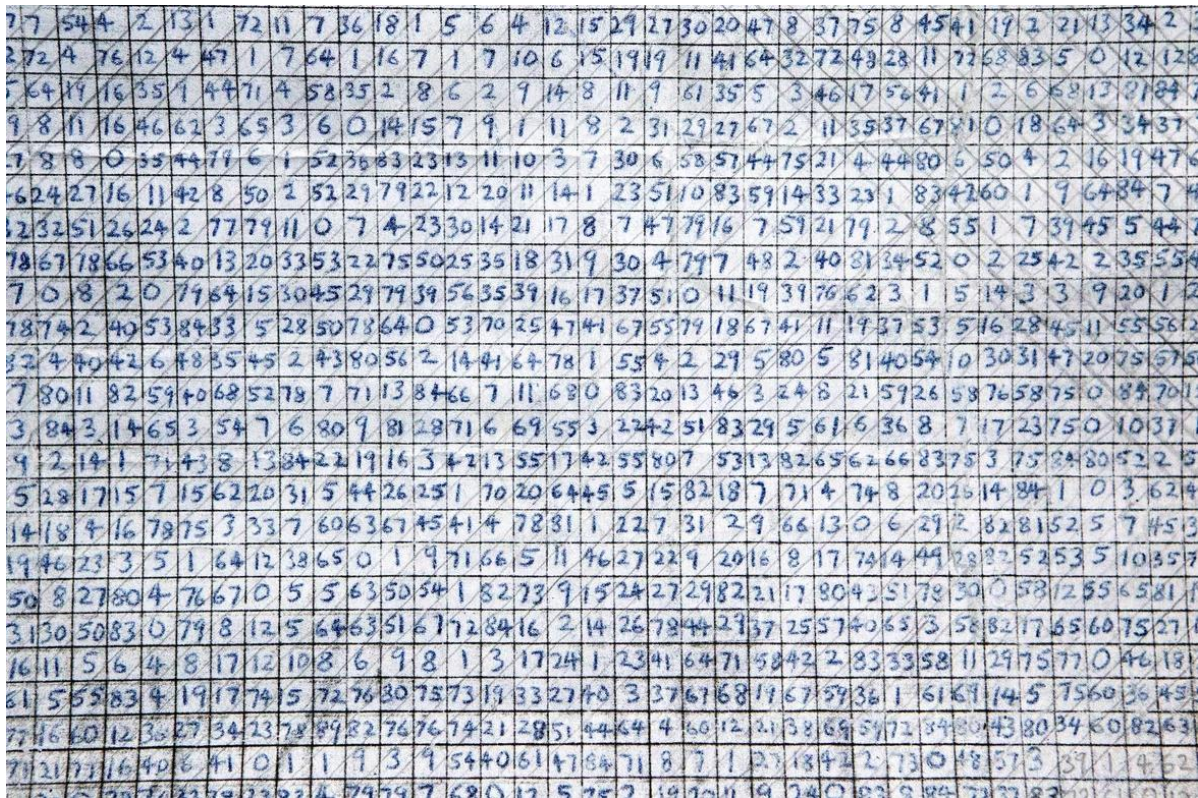

Unabomber auction

Ted Kaczynski's, also known as the Unabomber, personal items are displayed for an online auction with proceeds to benefit the victims' families Wednesday, May 18, 2011 in Atlanta. The items include handwritten letters, typewriters, tools, clothing and several hundred books.

Source

Wed., May 18, 2011

The image shows a grid of handwritten numbers, likely a code sheet. The grid is approximately 20 rows by 40 columns. The numbers are written in a cursive, handwritten style. The numbers are arranged in a regular pattern, with some numbers appearing to be part of a sequence or code. The grid is filled with numbers, and the handwriting is consistent throughout.

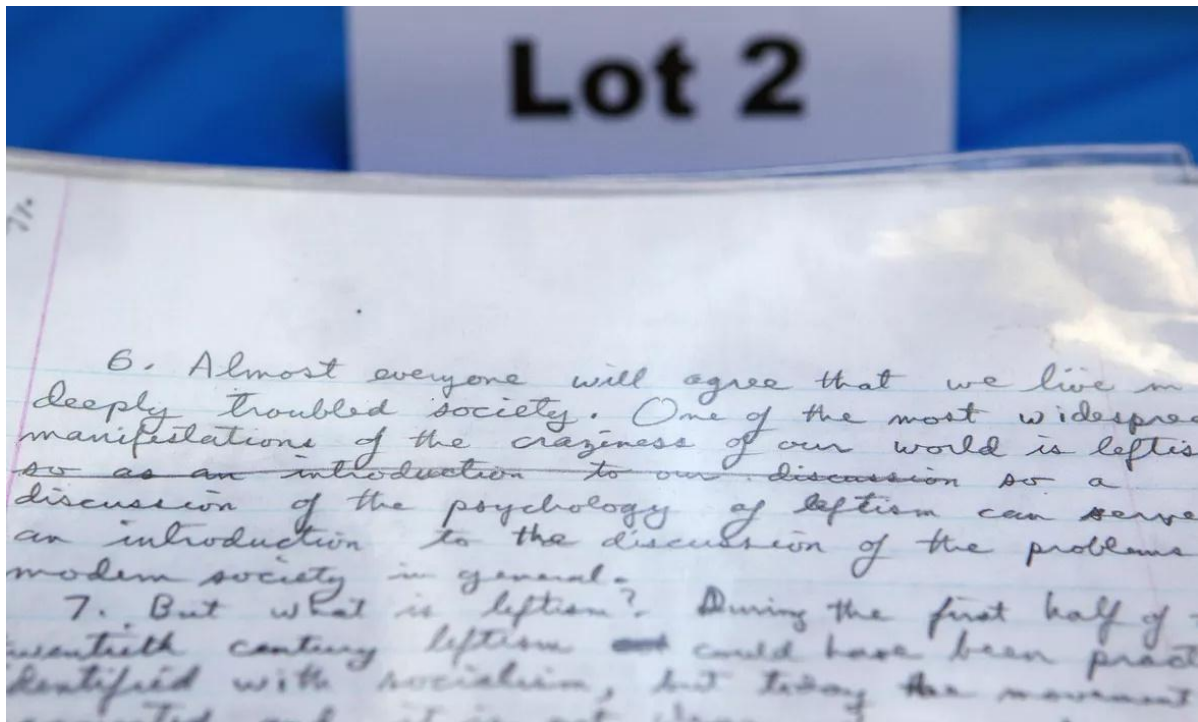

A code sheet belonging to Ted Kaczynski, aka the Unabomber, is displayed as personal items of Kaczynski are auctioned off online with proceeds to benefit the victims' families Wednesday, May 18, 2011 in Atlanta. The codes were decoded by

the FBI and determined to contain many admissions and discussions of Kaczynski's crimes.
