Top view]

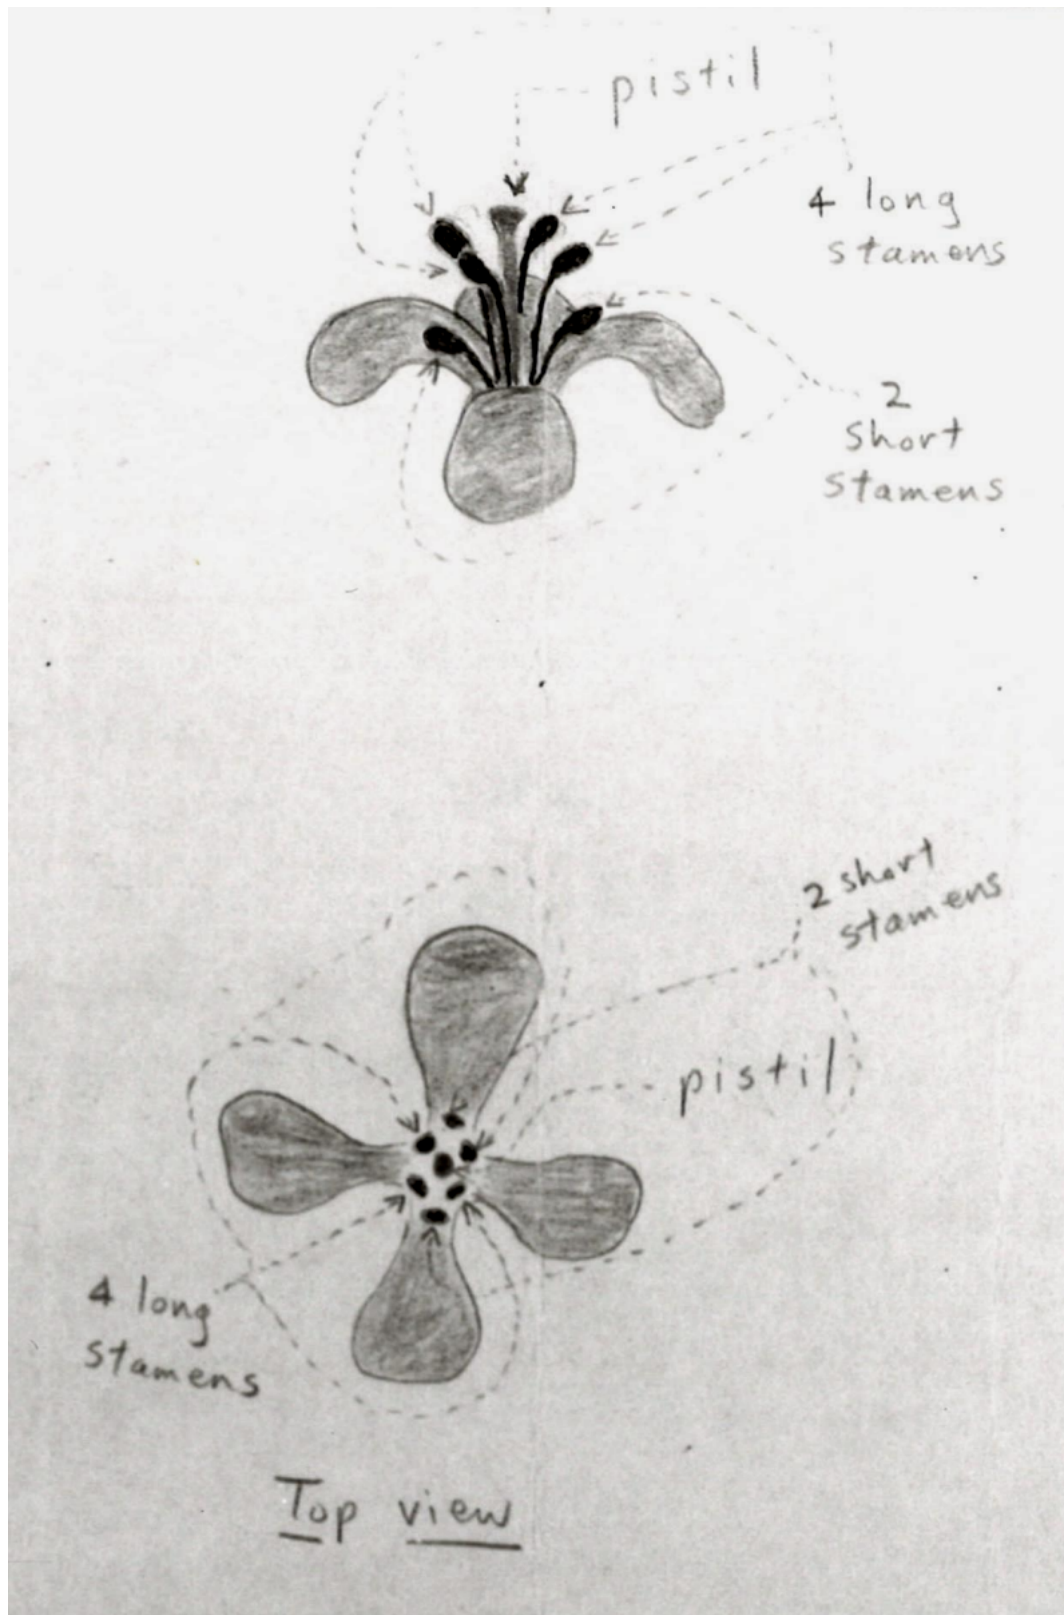

Typical flower of mustard family. For purposes of illustration, Pistil is shown in black, Stamens in blue, petals in red.

1 pistil in center is surrounded by 6 stamens, of which 2 are usually shorter than the other 4.

There are 4 petals.

For typical arrangement of seed-pods in mustard family, see illustrations in Kirk, *Wild Edible Plants of the Western United States*.

Another identifying trait of mustard family is the mustardy or radishy smell of the crushed leaves.
